Pincoffs, 1991 Legal Theory and the Legal Academy Maksymilian Del Mar, 2017-07-05 The third in a series of three volumes on Contemporary Legal Theory this volume deals with four topics 1 the role of legal theory in the legal curriculum 2 the teaching of legal theory 3 the relationship of legal theory to legal scholarship and 4 the relationship of legal theory to comparative law The focus of the first two topics is on the common law world where the debates over the aims and proper place of legal theory in the study of law have traversed a good deal of ground since John Austin s 1828 lecture The Uses and the Study of Jurisprudence These first two parts offer a selection of the most important papers including surveys as well as pedagogical viewpoints and particular course descriptions from analytical critical feminist law and literature and global perspectives The last three decades have seen just as many changes for legal scholarship and comparative law These changes such as the rise of empirical legal scholarship have often attracted the attention of legal theorists Within comparative law the last thirty years have witnessed intense methodological reflection within the discipline the results of these reflections are themselves properly recognised as legal theoretical contributions The volume collects the key papers including those by Neil MacCormick Mark Van Hoecke Andrew Halpin William Ewald and Geoffrey Samuel **Introduction to the Philosophy of Law** Jefferson White, Dennis Michael Patterson, 1999 Introduction to the Philosophy of Law Readings and Cases employs a combination of case based and theory based materials to show novices in the field how the philosophy of law is related to concrete and actual legal practice Ideal for undergraduates it engages their curiosity about the law without sacrificing philosophical content The authors emphasize a command of legal concepts and doctrine as a prelude to

philosophical analysis Designed to acquaint students with the fundamentals of jurisprudence and legal theory Part I of the book includes readings from influential philosophers representing eight different types of jurisprudence natural law theory positivism constructivism consequentialism critical legal studies feminist theory practice theory and new natural law theory In Part II the authors present a variety of cases that allow students to apply the theories in Part I to the actual practice of law Unlike similar texts which focus primarily on public law this unique book addresses both private and public law and includes cases on statutory interpretation contract law and tort law Brief essays precede and discussion questions follow each case Introduction to the Philosophy of Law Readings and Cases serves as an exceptional text for courses in the philosophy of law jurisprudence and legal theory

The Law-Science Chasm Cedric Charles Gilson, 2012-11-01 THE LAW SCIENCE CHASM is a socio legal study that takes seriously the varying approaches to science that physicians and scientists use as compared to legal actors such as judges and

lawyers Offering a way to mediate and translate their different perspectives and assumptions Gilson uses sociological and philosophical methodologies to explain each discipline to the other Gilson's book takes seriously the idea of the autopoietic closure of society's communicative subsystems and works out the consequences in particular for science and law This analysis both lends support to the credibility of the approach adopted and sheds light on the problems and the direction in which potential solutions might lie The book consequently makes an important contribution not only to the literature dealing with the relationship between science and law but also to the literature dealing with the application of autopoietic systems theory to tangible concerns This book is therefore of clear significance to those continuing to wrestle with the challenges thrown up by science for law and policy even when the spotlight of public attention is directed elsewhere

The Rule of Law Under Fire? Raymond Wacks, 2021-10-21 Does the rise of populism authoritarianism and nationalism threaten the welfare of the rule of law Is this fundamental democratic ideal under siege In this timely and important book Raymond Wacks examines the philosophical roots of the rule of law and its modern often contentious interpretation He then investigates 16 potential ideological economic legal and institutional dangers to the rule of law They range from the exercise of judicial and administrative discretion and parliamentary sovereignty to the growth of globalisation the war on terror and the disquieting power of Big Tech He also considers the enactment and enforcement in several countries of Draconian measures to curtail the spread of COVID 19 which has generated fears that these emergency powers may outlive the pandemic and become a permanent feature of the legal landscape thereby impairing the rule of law Wacks identifies which issues among this extensive array pose genuine risks to the rule of law and suggests how they might be confronted to ensure its defence and preservation

Philosophical Foundation of Human Rights Paul Tiedemann, 2023-10-05 This textbook presents a range of classical philosophical approaches in order to show that they are unsuitable as a foundation for human rights Only the conception of human dignity based on the Kantian distinction between price and dignity can provide a sufficient basis The

derivation of human rights from the principle of human dignity allows us to identify the most crucial characteristic of human rights namely the protection of personhood This in turn makes it possible 1 to distinguish between real moral human rights and spurious ones 2 to assess the scope of protection for many codified human rights according to the criteria of core and yard and 3 offers a point of departure for creating new unwritten human rights This philosophical basis supports a substantial reassessment of the case law on human rights which will ultimately allow us to improve it with regard to legal certainty clarity and cogency In the second edition errors have been corrected in numerous places the text has been made clearer and easier to understand In addition more recent human rights issues have been newly included especially those related to the Corona epidemic and climate change The textbook is primarily intended for advanced law students who are interested in a deeper understanding of human rights It is also suitable for humanities students and for anyone in the political or social arena whose work involves human rights and their enforcement Each chapter is divided into four parts Abstracts Lecture Recommended Reading and Questions to check reader comprehension Sample answers are included at the end of the book

Justifying Contract in Europe Martijn Willem Hesselink, 2021 This title uses contemporary political theories to address fundamental questions on European contract law It also places these theories in the context of the current European contract law landscape This book highlights future options for contract law in the EU and how it may need to change
