

Mental Representation in Medieval Philosophy

The notions of mental representation and intentionality are intrinsically related in contemporary philosophy of mind, since it is usually thought that a mental state has content or is about something other than itself due to its representational nature. These notions have a parallel history in medieval philosophy as well, but it has been intentionality that has attracted medieval scholars' attention (for example, in Knudsen 1982, Pasnau 1997, Perler 2001 and Perler 2002). There have only been a few studies on mental representation (Tweeddale 1990, Pasnau 1997, King 2007 and Lagerlund 2007a).

One major reason for the interest in intentionality in medieval philosophy is that it has been widely recognized that Franz Brentano was reviving a scholastic notion when he introduced intentionality as "the mark of the mental" (Brentano 1874). But Brentano never used the terminology of representation to explicate intentionality. This was done much later, in post-Wittgensteinian philosophy of mind. In later medieval philosophy, it was, however, standard to explain the content of a thought by referring to its representational nature.

There are a variety of theories of mental representation in medieval philosophy, which were intensely discussed from the twelfth century up to the time of Descartes. This article will briefly trace the history of the terminology and also give a brief outline of the main theories developed during the thirteenth and fourteenth centuries.

Philosophy Of Mental Representation:

Rerepresentation S. Silvers, 2012-12-06 This collection of papers on issues in the theory of mental representation expresses a diversity of recent reflections on the idea that C D Broad so aptly characterized in the title of his book *Mind and the World Order* An important impetus in the project of organizing this work were the discussions I had with Keith Lehrer while I was a Visiting Scholar in the department of Philosophy at the University of Arizona His encouragement and friendship were of great value to me and I wish to express my thanks to him here A word of thanks too for Mike Harnish who casually suggested the title *Rerepresentation* I wish to express my thanks to Hans Schuurmans of the Computer Center at Tilburg University for his patient and cheerful assistance in preparing the manuscript Professor J Verster of the University of Groningen kindly provided the plates for the Ames Room figures Thieu Kuys helped not only with the texts but also relieved me of chores so that I could devote more time to meeting deadlines Barry Mildner had a major role in the text preparation using his skills and initiative in solving what seemed like endless technical problems My deepest thanks are reserved for Anti Sax whose contribution to the project amount to a co editorship of this volume She participated in every phase of its development with valuable suggestions prepared the indexes and worked tirelessly to its completion *Philosophy of*

Mental Representation Hugh Clapin, 2002 Five leading figures in the philosophy of mind and cognitive science debate the central topic of mental representation Each author's contribution is specially written for this volume and then collectively discussed by the others The editor frames the discussions and provides a way into the debates for new readers An exciting feature of this collection is the transcribed discussion among all the contributors following each exchange This is the latest thinking on mental representation carefully and critically analysed by the leading thinkers in the field **What are Mental**

Representations? Joulia Smortchkova, Krzysztof Dołęga, Tobias Schlicht, 2020-09-28 Mental representations are ubiquitous in cognitive science and are used to account for many cognitive capacities from perception to decision making Yet we lack a clear understanding of what they are This collection assembles essays by leading philosophers each trying to provide answers to the puzzles posed by mental representation **Meaning and Mental Representation** Robert

Cummins, 1991-02-05 In this provocative study Robert Cummins takes on philosophers both old and new who pursue the question of mental representation as an abstraction apart from the constraints of any particular theory or framework Cummins asserts that mental representation is in fact a problem in the philosophy of science a theoretical assumption that serves different explanatory roles within the different contexts of commonsense or folk psychology orthodox computation connectionism or neuroscience Cummins looks at existing and traditional accounts by Locke Fodor Dretske Millikan and others of the nature of mental representation and evaluates these accounts within the context of orthodox computational theories of cognition He proposes that popular accounts of mental representation are inconsistent with the empirical assumptions of these models which require an account of representation like that involved in mathematical modeling In the

final chapter he considers how mental representation might look in a connectionist context A Bradford Book

Stich, Ted A. Warfield, 1994-07-19 This volume is a collection of new and previously published essays focusing on one of the most exciting and actively discussed topics in contemporary philosophy naturalistic theories of mental content The volume brings together important papers written by some of the most distinguished theorists working in the field today Authors contributing to the volume include Jerry Fodor Ruth Millikan Fred Dretske Ned Block Robert Cummins and Daniel Dennett *Mental Representation* Gyula Klima, Alexander W. Hall, 2011 It is supposed to be common knowledge in the history of ideas that one of the few medieval philosophical contributions preserved in modern philosophical thought is the idea that mental phenomena are distinguished from physical phenomena by their intentionality their directedness toward some object As is usually the case with such commonplaces about the history of ideas especially those concerning medieval ideas this claim is not quite true Medieval philosophers routinely described ordinary physical phenomena such as reflections in mirrors or sounds in the air as exhibiting intentionality while they described what modern philosophers would take to be typically mental phenomena such as sensation and imagination as ordinary physical processes Still it is true that medieval philosophers would regard all acts of cognition as characterized by intentionality on account of which all these acts are some sort of representations of their intended objects Mental Representation explores the intricacies and varieties of the conceptual relationships between intentionality cognition and mental representation as conceived by some of the greatest medieval philosophers The clarification of these conceptual connections sheds new light not only on the intriguing historical relationships between medieval and modern thought on these issues but also on some fundamental questions in the philosophy of mind as it is conceived today Mental Representation (Volume 4) Gyula Klima, 2011-09-22 It is supposed to be common knowledge in the history of ideas that one of the few medieval philosophical contributions preserved in modern philosophical thought is the idea that mental phenomena are distinguished from physical phenomena by their intentionality

their directedness toward some object As is usually the case with such commonplaces about the history of ideas especially those concerning medieval ideas this claim is not quite true Medieval philosophers routinely described ordinary physical phenomena such as reflections in mirrors or sounds in the air as exhibiting intentionality while they described what modern philosophers would take to be typically mental phenomena such as sensation and imagination as ordinary physical processes Still it is true that medieval philosophers would regard all acts of cognition as characterized by intentionality on account of which all these acts are some sort of representations of their intended objects Mental Representation explores the intricacies and varieties of the conceptual relationships between intentionality cognition and mental representation as conceived by some of the greatest medieval philosophers The clarification of these conceptual connections sheds new light not only on the intriguing historical relationships between medieval and modern thought on these issues but also on some fundamental questions in the philosophy of mind as it is conceived today

The Mechanical Mind Tim Crane, 2015-12-22 How can the human mind represent the external world What is thought and can it be studied scientifically Should we think of the mind as a kind of machine Is the mind a computer Can a computer think Tim Crane sets out to answer these questions and more in a lively and straightforward way presuming no prior knowledge of philosophy or related disciplines Since its first publication *The Mechanical Mind* has introduced thousands of people to some of the most important ideas in contemporary philosophy of mind Crane explains the fundamental ideas that cut across philosophy of mind artificial intelligence and cognitive science what the mind body problem is what a computer is and how it works what thoughts are and how computers and minds might have them He examines different theories of the mind from dualist to eliminativist and questions whether there can be thought without language and whether the mind is subject to the same causal laws as natural phenomena The result is a fascinating exploration of the theories and arguments surrounding the notions of thought and representation This third edition has been fully revised and updated and includes a wholly new chapter on externalism about mental content and the extended and embodied mind There is a stronger emphasis on the environmental and bodily context in which thought occurs Many chapters have been reorganised to make the reader's passage through the book easier The book now contains a much more detailed guide to further reading and the chronology and the glossary of technical terms have also been updated *The Mechanical Mind* is accessible to anyone interested in the mechanisms of our minds and essential reading for those studying philosophy of mind philosophy of psychology or cognitive psychology

Representation in Cognitive Science Nicholas Shea, 2018-10-22 Our thoughts are meaningful We think about things in the outside world how can that be so This is one of the deepest questions in contemporary philosophy Ever since the cognitive revolution states with meaning mental representations have been the key explanatory construct of the cognitive sciences But there is still no widely accepted theory of how mental representations get their meaning Powerful new methods in cognitive neuroscience can now reveal information processing in the brain in unprecedented detail They show how the brain performs complex calculations on

neural representations Drawing on this cutting edge research Nicholas Shea uses a series of case studies from the cognitive sciences to develop a naturalistic account of the nature of mental representation His approach is distinctive in focusing firmly on the subpersonal representations that pervade so much of cognitive science The diversity and depth of the case studies illustrated by numerous figures make this book unlike any previous treatment It is important reading for philosophers of psychology and philosophers of mind and of considerable interest to researchers throughout the cognitive sciences

Intentionality, Cognition, and Mental Representation in Medieval Philosophy Gyula Klima, 2015 The essays in this volume explore the intricacies and varieties of the conceptual relationships among intentionality cognition and mental representation as conceived by some of the greatest mediaeval philosophers including Aquinas Scotus Ockham and Buridan as well as some of their lesser known but still influential contemporaries The clarification of these conceptual connections sheds new light not only on the intriguing historical relationships between mediaeval and modern thought on these issues but also on some fundamental questions in the philosophy of mind as it is conceived today

Reference and Representation in Thought and Language María Ponte, Kepa Korta, 2017 This volume offers novel views on the precise relation between reference to an object by means of a linguistic expression and our mental representation of that object long a source of debate in the philosophy of language linguistics and cognitive science Chapters in this volume deal with our devices for singular reference and singular representation with most focusing on linguistic expressions that are used to refer to particular objects persons or places These expressions include proper names such as Mary and John indexicals such as I and tomorrow demonstrative pronouns such as this and that and some definite and indefinite descriptions such as The Queen of England or a medical doctor Other chapters examine the ways we represent objects in thought particularly the first person perspective and the self and one explores a notion common to reference and representation salience The volume includes the latest views on these complex topics from some of the most prominent authors in the field and will be of interest to anyone working on issues of reference and representation in thought and language
