Phonology Of Danish:

The Phonology of Danish Hans Basbøll, 2005-05-06 The book is the most comprehensive account of the phonology of Danish ever published in any language It gives a clear analysis of the sound patterns of modern Danish and examines the relations between its speech sounds and grammar The author develops new models for the analysis of phonology and morphology phonology interactions and shows how these may be applied to Danish and to other languages Danish has an unusually rich vowel system and exhibits radical reduction processes that make it difficult for foreigners to understand The sound pattern is equally challenging for the analyst Professor Basbøll develops a non circular model for the sonority syllable and applies it to Danish phonotactics He presents a radically new and insightful analysis of standard syllable accent which has a complex grammatical distribution and is unique among the world's languages He also describes syllabic and word structures and stress and intonation The book is fully referenced and indexed It will be widely welcomed by phonologists and scholars of Danish and is likely to become the standard account of Danish phonology

Now in Paperback **Functional Structure in Morphology and the Case of Nonfinite Verbs** Peter Juul

Nielsen, 2016-06-10 In this book Peter Juul Nielsen examines the foundations of morphological theory from a structural functional perspective on language as a sign system. He offers a framework for the analysis of morpheme relations based on a thorough discussion of syntagmatic and paradigmatic structure, indexical relations, zero as meaningful absence, and morphological relations across grammatical categories. It is argued that when paradigmatically related morphological structures have different syntactic functions, the semantics of the paradigmatic opposition consists in the specification of functional potential. The framework is applied in three detailed studies of Danish nonfinite verbs, presenting new accounts of their morphological structure, semantic coding, and paradigmatic organisation.
