The Handbook of Bird Identification
Mark Beaman, Steve Madge, 2010-09-30 An identification guide covering all the bird species to have occurred in the European region Birding is one of the most popular activities and pastimes in Europe and so it follows that it is essential to be able to identify the birds on view be it in the back garden or for making more serious in depth studies This book aims to bring together as much information as possible in one volume using extremely detailed up to date guides and identification of every species known to have occurred in Europe and the West Palearctic that is the whole of Europe North Africa as far south as the Central Sahara the Middle East to the border of Iran the Azores Madeira Canary Islands the islands off Mauritania and the Cape Verde islands as defined by Cramp and Simons 1977 They have certainly been successful in doing so and have produced a wonderfully comprehensive guide covering nearly 900 species showing a wide range of differing plumages The colour plates are exquisite and have been painted by some of Europe's leading bird artists The text is clear and can be followed by beginners but finer points of identification are included for the benefit of more serious bird watchers Particularly helpful is the cross referencing of the text and colour plates There are more than 600 colour maps to identify where the birds are to be found which are simple and easy to use with excellent descriptions of status and habitat

Birds of Britain and Europe Jim Flegg, 2002

Collins Bird Guide Stuart Keith, John Gooders, 1980 Bird watching is enjoying an ever increasing popularity That appreciation is often accompanied by a desire to know more about them this book is designed to satisfy that wish and incidentally to be in itself a treasury of bird photographs This guide covers all of Europe including that part of Russia west of the 30th meridian Iceland is included as well as the larger Mediterranean islands and the part of Turkey lying west of the Bosphorus 464 bird species are fully described and illustrated in this guide As a rule we have included a species if it has occurred in Europe more than thirty times Because the illustrations in conventional bird guides are organised by families and scattered throughout the text the reader must leaf through the entire book to find the picture

of a particular bird. Instead we have placed all the colour plates in one section and then grouped the family and species descriptions in a separate section. The unified visual key arranges birds by characteristics they have in common such as shape and colour. Simple silhouette symbols direct the reader to the group of birds most resembling the one he has sighted. He can then narrow his search to a few birds or find exactly the one he has seen. Reading the species descriptions will confirm the identification. For our illustrations we have used colour photographs of birds in their natural habitats. Besides being a pleasure to look at these photographs show birds as they really are in nature rather than an artist's interpretation. For the first time colour photographs of almost every European bird appear in one volume bringing together the work of over 100 outstanding bird photographers in a total of 613 photographs.

Birds of Britain and Europe Jim Flegg, David Hosking, 2002

Rainforest's remarkable and evocative text is expertly written by a leading authority at Fauna Flora International. Illustrated throughout with spectacular photographs, this book celebrates the diversity and beauty of the wealth of wildlife still remaining in this extraordinary and complex habitat. Rainforest describes and illustrates the major rainforests of the world from the secret forests and exotic mammals of Madagascar to the multi-coloured bird and butterfly life of Central America. This superb exploration around the world brings to life the natural splendour of the world's rich and diverse rainforest life. The precarious paradise of the Amazon with more plant and animal species than anywhere else on Earth is covered in depth as are Indonesia and the Philippines which are home to a spectacular diversity of wildlife. At the dawn of a new century with over half of the world's living species found almost exclusively within the rainforest canopy, this unique and sumptuous book brings to life this precious habitat for wildlife enthusiasts and eco-travellers alike. Royalty proceeds from this book will go to the Global Trees Campaign.

Pipits and Wagtails of Europe, Asia and North America Per Alström, Krister Mild, 2010-07-30

Pipits and Wagtails is the first comprehensive guide to all the species and subspecies that occur in Europe, Asia, North Africa and North America. The detailed species accounts cover all aspects of identification: size, structure, plumage, bare parts, geographical variation, behaviour, distribution and habitat. In particular, great care has been taken to illustrate and describe accurately the differences between all valid subspecies as well as differences relating to sex and age. There are 30 full colour plates and a number of plate parts that depict all the species and distinct subspecies in different plumages and to help further with identification there are almost 250 colour photographs, numerous line drawings, sonograms of the species and subspecies, unique songs and calls, and colour distribution maps for each species with the range of subspecies marked. Systematics are also discussed in great detail. Introductory chapters deal with identification, moult, ageing and sexing in general, species concepts, nomenclature and phylogenetic analyses. The unparalleled extent to which the authors, the world's two leading authorities in the field, have gone to cover all aspects of identification and systematics, including doing a complete taxonomic review, ensures that this is the ultimate reference guide for anyone interested in this group of birds.
