unique issues that confront nighttime photographers and capture images of which you'll be proud. Co-author Jennifer Wu, an elite Canon Explorer of Light professional photographer, has become renowned for her ability to capture nighttime phenomena from quarter phase moon rises to shooting stars to the ephemeral Milky Way. This new guide reveals her methods and concentrates on photographing four principal subjects: stars as points of light, star trails, the moon, and twilight. These subjects share common photo techniques and considerations, but each also requires a distinct approach. Once captured, your digital images must be finished on the computer. Co-author and author of the bestselling *Photography Outdoors*, James Martin, delves into the settings and procedures that elevate an image from mundane to striking. This clear and practical guide will help photographers of all levels portray the stunning spectacle of the night sky, preserving those special memories and moments from a life outdoors.
