ABOUT THE BOOK

Physical Geography is the study of earth's physical environment which has four major spheres: Lithosphere, Atmosphere, Hydrosphere and Biosphere. The description and interpretation of various characteristics of different components of these spheres and their inter-relationships form the core content of Geography curriculum. The present book *Physical Basis of Geography* deals with the most basic aspects of Physical Geography, selected from its wide domain. The book largely covers the first semester of Undergraduate syllabi of Bapu Gandhi University in particular and most of the Indian Universities in general.

The present book includes five chapters on the fundamentals of Lithosphere (Geomorphology), five chapters on Atmosphere (Climatology), four chapters on Biosphere (Biogeography) and four chapters on Hydrosphere (Oceanography). Written in the simplest possible manner, the content of the book and explanation thereof has been kept precise to make it student friendly. It is hoped that the book will be an immense help not only to the students of Geography but also to the aspirants of different competitive examinations.
