wider children's workforce with an understanding of key theoretical concepts from a range of disciplines that might inform and enhance their work. It encourages a critical interrogation of the ideas that underpin practice by drawing on social constructionist approaches to issues such as child development, crime and punishment and related concepts. It provides a descriptive account of current practice in areas such as community corrections and incarceration, examining the evidence base for this and suggesting where appropriate alternative strategies. The key objective of the Handbook is to provide students with the confidence to critically reflect on the ideas and debates that currently influence the work undertaken with young people as well as those that may shape practice in the future. By equipping them with the basic skills of analysis and an understanding of key themes and developments, it aims to further promote their progression as reflective practitioners and autonomous learners. The Youth Justice Handbook takes a multidisciplinary approach and contains chapters from leading experts in the field which draw on original research and practical experience of working in the area. It is divided into five parts: Contexts of childhood and youth; Research knowledge and evidence in youth justice; Policy possibilities and penal realities in youth justice; Reflective practice; Widening contexts.
