Extreme Conflict and Tropical Forests Wil De Jong, Deanna Donovan, Ken-ichi Abe, 2007-04-08 There are many compelling reasons for policymakers to pay more attention to forested regions and invest more resources there Forests provide valuable products and environmental services and several hundred million extremely poor people live near them Perhaps the most compelling reason of all however is that unless policymakers take forest governance seriously and respond better to the needs of the people living there these regions will continue to be breeding

grounds for violent conflict banditry and illicit crops From Nicaragua's Atlantic Coast to the jungles of Cambodia there are several dozen countries around the world that have experienced severe breakdowns in law and order in their forested regions In many of these cases those breakdowns had widespread economic social and political consequences that have threatened entire societies You would think that after all of the suffering over the last few decades in the forested regions of Colombia Peru Mexico Guatemala the two Congo's Liberia Mozambique Philippines Solomon Islands Nepal Angola Rwanda Nicaragua Cote d'Ivoire Myanmar Bangladesh India Sri Lanka Indonesia Sierra Leone Senegal Sudan Uganda and Vietnam people would begin to take note After all they don't call it jungle warfare for nothing **Quick Bibliography Series** ,1976

Tropical Forests: Management and Ecology Ariel E. Lugo, Carol Lowe, 2012-12-06 Forestry professors used to remind students that whereas physicians bury their mistakes foresters die before theirs are noticed But good institutions live longer than the scientists who contribute to building them and the half century of work of the USDA Forest Service's Institute of Tropical Forestry ITF is in plain view an unprecedented corpus of accomplishments that would instill pride in any organization There is scarcely anyone interested in current issues of tropical forestry who would not benefit from a refresher course in ITF's findings its early collaboration with farmers to establish plantations its successes in what we now call social forestry its continuous improvement of nursery practices its screening trials of native species its development of wood processing technologies appropriate for developing countries its thorough analysis of tropical forest function and its holistic approach toward conservation of endangered species Fortunately ITF has a long history of information exchange through teaching like many others I got my own start in tropical forest ecology from just such a course in Puerto Rico And long before politicians recognized the global importance of tropical forestry the ITF staff served actively as ambassadors of the discipline visiting tropical countries everywhere to learn and when invited to do so to help solve local problems It is a general principle of biogeography that species turnover rates on islands are higher than those on continents Inevitably the same is true of scientists assigned to work on islands *Australian National Bibliography: 1992* National Library of Australia, 1988

Resources in Education ,2000-04 **50 Simple Steps to Save the World's Rainforests** Kim Henderson, The Green Patriot Working Group, 2012-03-12 Despite the very best conservation and environmental policy making efforts at least 80 000 acres of tropical rainforest disappear each day If action is not taken now experts estimate that the world's rainforests will mostly disappear within 50 years Currently the destruction of tropical forests is responsible for 17 percent of man made carbon emissions more than what comes from all the world's cars airplanes and ships combined Tropical rainforests need our help and that's where 50 Simple Steps to Save the World's Rainforests comes in The future of the world's rainforests lies to a large extent in the collective hands of consumers and how they shop since demand is what fuels the forces driving deforestation agriculture logging and resource extraction Through the 50 step journey you will learn how as a consumer you may unwittingly support rainforest destruction and more importantly precisely how you can make different choices that help

save rainforests For example you will learn how your paper use and purchases of rayon clothing affect Indonesian rainforests where Sumatran tigers are critically endangered or how simply eating Brazil nuts helps save the Amazon rainforest You will discover how the cultivation of palm oil a common ingredient in confections baked goods soaps and biofuels is fueling rampant deforestation in Malaysia Indonesia and Papua New Guinea and how you can avoid it 50 Simple Steps to Save the Rainforests is the ultimate primer for anyone wanting to take action to help save this ecosystem which is so critical to the future of mankind Current Issues in Non-timber Forest Products Research Manuel Ruiz Pérez,J. E. M. Arnold,Yvonne Byron,1996-01-01 **Rainforest Tourism, Conservation and Management** Bruce Prideaux,2014-09-19 Globally rainforests are under threat on numerous fronts including clearing for agriculture harvesting for timber and urban expansion Yet they have a crucial role in biodiversity conservation climate change mitigation and providing other ecosystem services As the term is used in this book rainforests include both temperate and tropical although the emphasis is on tropical rainforests Rainforests are also attractive tourist spaces and where they have been used as a tourism resource have generated significant income for local communities However not all use of rainforests as a tourism resource has been sustainable This book argues that sustainability must be the foundation on which tourism use of this complex but ultimately fragile ecosystem must be built upon It provides a multi disciplinary perspective incorporating rainforest science management and tourism issues The book is organized into four sections commencing with Rainforest Ecology and Management followed by People and Rainforests Opportunities for Rainforest Tourism Development and finally Threats to Rainforests Each major rainforest region is covered including the Amazon Central America Africa Australia and south east Asia in the context of a specific issue For example rainforests in Papua New Guinea are examined in the context of community based ecotourism development while the rainforests in Borneo are discussed in an examination of wildlife issues Other issues covered in this manner include governance empowerment issues for rainforest peoples and climate change Social Issues and Service at the Middle Level Samuel Totten,Jon Pedersen,2009-06-01 originally published by Allyn 2 Challenging Barriers A Unit in Developing an Awareness and Appreciation for Differences in Individuals with Physical and Mental Challenges Pauline S Chandler 3 Implementing an Interdisciplinary Unit on the Holocaust Regina Townsend William G Wraga 4 The Homeless An Issue Based Interdisciplinary Unit in an Eighth Grade Class Belinda Y Louie Douglas H Louie Margaret Heras 5 Making Plays Making Meaning Making Change Kathy Greeley 6 Teleconversing about Community Concerns and Social Issues Judith H Vesel 7 Using Telecommunications to Nurture the Global Village Dell Salza 8 New Horizons for Civic Education A Multidisciplinary Social Issues Approach for Middle Schools Ronald A Banaszak H Michael Hartoonian James S Leming and 9 Future Problem Solving Preparing Middle School Students to Solve Community Problems Richard L Kurtzberg Kristin Faughnan Part 2 Service contains 1 Alienation or Engagement Service Learning May Be an Answer Joan Schine Alice Halsted 2 Service Learning A Catalyst for Social Action and School Change at the Middle Level Wokie Weah Madeleine Wegner 3 The
