Liability for Crimes Involving Artificial Intelligence Systems Gabriel Hallevy, 2014-11-06 The book develops a general legal theory concerning the liability for offenses involving artificial intelligence systems The involvement of the artificial

intelligence systems in these offenses may be as perpetrators accomplices or mere instruments The general legal theory proposed in this book is based on the current criminal law in most modern legal systems In most modern countries unmanned vehicles sophisticated surgical systems industrial computing systems trading algorithms and other artificial intelligence systems are commonly used for both industrial and personal purposes The question of legal liability arises when something goes wrong e g the unmanned vehicle is involved in a car accident the surgical system is involved in a surgical error or the trading algorithm is involved in fraud etc Who is to be held liable for these offenses the manufacturer the programmer the user or perhaps the artificial intelligence system itself The concept of liability for crimes involving artificial intelligence systems has not yet been widely researched Advanced technologies are forcing society to face new challenges both technical and legal The idea of liability in the specific context of artificial intelligence systems is one such challenge that should be thoroughly explored

The Criminalization of European Cartel Enforcement Peter Whelan, 2014-08-07 Cartel activity is prohibited under EU law by virtue of Article 101 1 of the Treaty on the Functioning of the European Union Firms that violate this provision face severe punishment from those entities responsible for enforcing EU competition law the European Commission the national competition authorities and the national courts Stiff fines are regularly imposed on firms by these entities such firm focused punishment is an established feature of the antitrust enforcement landscape within the EU In recent years however focus has also been placed on the individuals within the firms responsible for the cartel activity It is increasingly recognized that punishment for cartel activity should be individual focused as well as firm focused Accordingly a growing tendency to criminalize cartel activity can be observed in the EU Member States The existence of such criminal sanctions within the EU presents a number of crucial challenges that need to be met if the underlying enforcement objectives are to be achieved in practice without violating prevailing legal norms For a start given the severe consequences of a custodial sentence the employment of criminal antitrust punishment must be justifiable in principle one must have a robust normative framework rationalizing the existence of criminal cartel sanctions Second for it to be legitimate antitrust criminalization should only occur in a manner that respects the mandatory legalities applicable to the European jurisdiction in question These include the due process rights of the accused and the principle of legal certainty Finally the correct practical measures such as a criminal leniency policy and a correctly defined criminal cartel offence need to be in place in order to ensure that the employment of criminal antitrust punishment actually achieves its aims while maintaining its legitimacy These three particular challenges can be conceptualized respectively as the theoretical legal and practical challenges of European antitrust criminalization This book analyses these three crucial challenges so that the

complexity of the process of European antitrust criminalization can be understood more accurately In doing so this book acknowledges that the three challenges should not be considered in isolation In fact there is a dynamic relationship between the theoretical legal and practical challenges of European antitrust criminalization and an effective antitrust criminalization policy is one which recognizes and respects this complex interaction **Forensic Psychology** Graham M. Davies, Anthony R. Beech, 2012-04-23
