Geertz, 2023-11-15 Armin Geertz corrects what he sees as basic American and European tendencies to misrepresent non-Western cultures. Carefully documenting the historical role of prophecy in Hopi Indian religion, Geertz shows how prophecies about the end of the world have been created by the Hopi Traditionalist Movement and used by non-Indian movements, cults and interest groups. Many of the seeming peculiarities of Hopi religion and culture have been invented, he says, by tourists, novelists, journalists and scholars, and the millennial Traditionalist Movement has subtly co-authored European and American stereotypes of Indians. Geertz's richly detailed examples and persuasive arguments will be welcomed by all those interested in Native American studies, comparative religions, anthropology and sociology. Ordaining Reality Made Easy Joseph E. Donlan, 2009 Many people believe in the Power of Positive Thinking but no one has succeeded in credibly explaining how mere thoughts can tangibly influence future occurrences To explain the connection this book presents a new paradigm of nature and couples it with a convincing explanation of how our right brain hemispheres have a unique ability to tap into the hidden domain of the metaphysical To support this premise the reader is lightly exposed to the divergent worlds of physics and metaphysics and is then introduced to a new view of nature that undeniably links mind to matter Important to its charge the new perspective makes the case that the future can only be created with thoughts In the final analysis the author brings his readers through the necessary steps to put this knowledge to work to help them create their own realities

Mediality on Trial Ehler Voss, 2020-09-21 This volume addresses controversies connected to the testing of the capacities and potentials of mediums Today we commonly associate the term medium with the technical communication between transmitters and receivers Yet this term likewise applies to those who cooperate with agencies that exceed the presumed domain of the material world Insofar as one presumes a division between distinctly opposed categories of religion and the secular technical media tend to be associated with the secular and human trance mediums tend to be associated with religion after 1900 This volume concerns the ways in which the term medium still marks an overlapping of and thus problematizes the aforementioned division between religion and the secular the personal and the technological The term medium carries with it a seed of doubt that is itself inseparable from investment in the medium s power insofar as they communicate with an other realm mediums offer the hope and promise of new possibilities and improved efficiency and thus of a better life yet

they have simultaneously been under suspicion of altering or even inventing the messages they communicate It is due to this combination of promise and suspicion that mediumism has tended to evoke scientific religious and moral controversies Thus we can speak of a mediumistic trial that is a process in which a medium is put to the test concerning its potentials and trustworthiness Around 1800 experts were asked if a modern secular institution would be capable of inspiring domesticating or excluding trance mediumship This question has stayed with us ever since and the answers have remained inconclusive That is why the past and present of mediumship may be asked to elucidate each other
