Separation Anxiety:

Separation Anxiety in Children and Adolescents Andrew R. Eisen, Charles E. Schaefer, 2007-02-13 This volume presents a unique research based approach to treating the prevalent distressing yet highly treatable problem of separation anxiety. The authors provide step by step guidelines for planning and implementing the entire process of therapy with children, adolescents and their families from intake and assessment through coping skills training, cognitive behavioral interventions and relapse prevention. Comprehensive case examples illustrate the complexities of building strong relationships with families under stress and effectively intervening with 3 to 17 year olds across multiple situations, day and night and setting home, extracurricular, school and camp. The book is written for maximum accessibility for clinicians from any background, even those with limited cognitive behavioral therapy experience.

Separation Anxiety in Adulthood Stefano Pini, Barbara Milrod, 2023-11-23 This book presents data that challenges the long established view that separation anxiety disorder should be reserved for diagnosis among children and adolescents by demonstrating that adult onset is prevalent in many countries and that adult onset separation anxiety disorder is just as persistent and impairing as the pediatric onset form. Separation anxiety disorder in adulthood is associated with high levels of disability. Research and clinical data indicate that overlooking the diagnosis of adult separation anxiety disorder may result in substantial costs in the form of disability and suffering. Over the last decades, the Psychiatry School of Pisa, in the person of Director Giovanni B. Cassano, M.D. and Stefano Pini, M.D., has conducted seminal studies in this area and brought research data into clinical practice. At the same time, the Pisa School has made a paramount contribution to the DSM 5 reformulation of adult separation anxiety disorder, which has since been transferred to the Anxiety Disorders chapter. Barbara Milrod, M.D., is an unusual clinical investigator. She has conducted clinical research in separation anxiety disorder, panic disorder and post-traumatic stress disorder for the past two decades. She has incorporated separation anxiety constructs into her approach to mechanisms of psychotherapy research across these disorders and in affect-focused psychotherapies. The book consists of 10 chapters organized into two sections: a General Principles Section and a Diagnosis and Treatment Section. The first section focuses on the biological underpinnings of separation anxiety and on the historical pathways that led to its DSM 5 categorization; the second elaborates on clinical topics, preventive strategies and treatments. This book will help the reader to understand and diagnose separation anxiety disorder and to bear it in mind during the differential diagnosis of patients of all ages presenting not only with anxiety but also with a variety of psychiatric and behavioral disorders.

What to Do When You Don't Want to Be Apart Kristen Lavalley, Silvia Schneider, 2021-07-15 Imagine you are a hot air balloon pilot flying high in the sky. Where would you want to go? What do you think the view would be like from up high? Hot air balloon pilots have wonderful adventures where they get to see things they have never seen before and learn all about the world outside. Flying a hot air balloon sounds like a lot of fun to some kids. But for other kids, the idea of flying off on their own away from their parents or homes doesn't sound like fun at all. What to Do

When You Don't Want to Be Apart guides children and their parents through the emotions underlying separation anxiety using strategies and techniques based on cognitive behavioral principles. This interactive self-help book is the complete resource for educating, motivating, and empowering children to overcome separation anxiety so they can become the confident pilots of their very own hot air balloons. Includes an Introduction to Parents and Caregivers. This book is part of the Magination Press What to Do Guides for Kids series and includes an Introduction to Parents and Caregivers. What to Do Guides for Kids are interactive self-help books designed to guide 6-12 year olds and their parents through the cognitive behavioral techniques most often used in the treatment of various psychological concerns. Engaging, encouraging, and easy to follow, these books educate, motivate, and empower children to work towards change. **Separation Anxiety** Christian Rivera, 2015
