strange aesthetic draws the audience in only to find it is deeper and more sophisticated than its surface appearance Japan is an honor and shame culture Anime provides a platform to discuss universal problems facing human beings It does so in an amazing variety of ways and subgenres and often with a sense of humor The themes characters stories plotlines and development are often complex This makes anime a deep well of philosophical metaphysical and religious ideas for analysis International scholars are represented in this book There is a diversity of perspectives on a diversity of anime themes content and analysis It hopes to delve deeper into the complex world of anime and demonstrate why it deserves the respect of scholars and the public alike *The (Un)Certain Future of Empathy in Posthumanism, Cyberculture and Science Fiction*

Elsa Bouet, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2015 This volume investigates the future of empathy as contemplated by posthumanism cyberculture and science fiction As humanity increasingly networks and communicates online the reconfiguration of human communities through the removal and immediacy of the body challenges traditional notions of humanity and human capacity for empathy The impact of cyberculture and posthumanism on humanity and its capacity for empathy is here assessed through research in literature films neuroscience anthropology and philosophy This volume addresses the centrality of the body to human interactions and assesses how intrinsic it is to the defining of the human The exploration of posthuman narratives which display futuristic bodily modifications also engages with the anxieties and hopes for the future of human empathy Research in dystopian narratives shows that these anxieties are also expressed without the tropes of bodily modifications and that ideological distancing creates the conditions necessary for a lack of empathy towards otherness *Mechademia 3* Frenchy Lunning, 2014-11-01 Dramatic advances in genetics cloning robotics and nanotechnology have given rise to both hopes and fears about how technology might transform humanity As the possibility of a posthuman future becomes increasingly likely debates about how to interpret or shape this future abound In Japan anime and manga artists have for decades been imagining the contours of posthumanity creating dazzling and sometimes disturbing works of art that envision a variety of human nonhuman hybrids biological mechanical human animal and human monster Anime and manga offer a constellation of posthuman prototypes whose hybrid natures require a shift in our perception of what it means to be human Limits of the Human the third volume in the Mechademia series maps the terrain of posthumanity using manga and anime as guides and signposts to understand how to think about humanity's new potentialities and limits Through a wide range of texts the folklore inspired monsters that populate Mizuki Shigeru's manga Japan's Gothic Lolita subculture Tezuka Osamu's original cyborg hero Atom and his manga version of Fritz Lang's Metropolis along with Tomo Katsuhiko's 2001 anime film adaptation the robot anime Gundam and the notion of the uncanny in Ghost in the Shell 2 Innocence among others the essays in this volume reject simple human nonhuman dichotomies and instead encourage a provocative rethinking of the definitions of humanity along entirely unexpected frontiers Contributors William L Benzon Lawrence Bird Christopher Bolton Steven T Brown Joshua Paul Dale Michael Dylan Foster Crispin Freeman Marc
