Lost Land Of Lemuria Fabulous Geographies Catastrophic Histories:

The Lost Land of Lemuria Sumathi Ramaswamy, 2004-09-27 During the nineteenth century Lemuria was imagined as a land that once bridged India and Africa but disappeared into the ocean millennia ago much like Atlantis A sustained meditation on a lost place from a lost time this elegantly written book is the first to explore Lemuria's incarnations across cultures from Victorian era science to Euro American occultism to colonial and postcolonial India The Lost Land of Lemuria widens into a provocative exploration of the poetics and politics of loss to consider how this sentiment manifests itself in a fascination with vanished homelands hidden civilizations and forgotten peoples More than a consideration of nostalgia it shows how ideas once entertained but later discarded in the metropole can travel to the periphery and can be appropriated by those seeking to construct a meaningful world within the disenchantment of modernity Sumathi Ramaswamy ultimately reveals how loss itself has become a condition of modernity compelling us to rethink the politics of imagination and creativity in our day

Contesting Earth's History in Transatlantic Literary Culture, 1860-1935 Richard Fallon, 2025-02-14 By the mid nineteenth century geologists and palaeontologists had reconstructed an authoritative narrative of Earth's deep history from the planet's molten origins to the rise of humanity Many figures in transatlantic science across subsequent decades however had problems with this narrative it was too secular inhuman and evolutionary or controlled too exclusively by elite scientists Speaking from palaeoscience's unevenly professionalized and controversy racked borders Christian fundamentalists charismatic psychics and respected scholars alike voiced their objections Until now no study has brought their work together for detailed comparative analysis Spanning from the 1860s to the interwar decades Contesting Earth's History examines the

fascinating stories of five significant examples of fringe or borderline palaeoscience old and young earth creationism hollow earth theory clairvoyant time travel and sunken continent catastrophism Innovatively combining methods from literary studies with the history of science this book attends not just to the conceptual content of these strange sciences but also to their proponents communication of truth claims through diverse genres ranging from the scientific textbook and the technical monograph to the lost world romance and the epic poem By paying close attention to the hitherto overlooked textual forms and literary strategies of these works of pseudoscience this volume throws into relief the variant conceptions of audience evidence and method that jostled and competed in wider scientific culture during this period It also demonstrates that for all their diversity authors of borderline palaeoscience shared the desire to shift the balance of power creating textual spaces where exclusive hierarchies of scientific expertise could be levelled away These conjurors of lost worlds often captivated wide audiences and many of their bizarre astonishing and iconoclastic ideas remain with us to this day Some even inspired early science fiction by the likes of H P Lovecraft and Edgar Rice Burroughs Hijacking geologists and palaeontologists longstanding effort at making the prehistoric past visible authors on the borderlines of palaeoscience asserted their right to scientific authority and encouraged readers to gaze into time s abyss with bold new eyes *Terra Incognita* Alfred Hiatt,2008 From the age of antiquity to the Middle Ages scholars argued about the existence of places and perhaps peoples beyond the world known to Europeans But to allow for the possibility of such lands and races raised troubling questions Was it truly impossible to reach the underside of the earth And if so how could its inhabitants receive the word of God In *Terra Incognita* Alfred Hiatt draws on sources both literary and visual to understand the appeal of the antipodes Examining maps and diagrams as well as evidence contained in geographical and historical works poetry travel narratives and legal documents he challenges long standing characterizations of medieval spatiality as exclusively symbolic and religious Instead Hiatt finds the idea of people on the other side of the Earth provided a potent and malleable symbol for political theorists satirists scholars and poets as well as for map makers *Terra Incognita* is in the end the history of a non place of lands conjured by the scientific imagination which nevertheless drove exploration and which continued to shape the world map even as they slowly vanished from it The Book Review ,2006 History and Imagination R. Cheran,Darshan Ambalavanar,Chelvanayakam Kanaganayakam,2007 This collection of essays covers a broad range of topics concerning Tamil culture all over the world Tamils originating in South India and Sri Lanka constitute a large part of the diasporic South Asians in Canada as well as the United States Australia and Europe This book is therefore of special relevance to the concerns of multiculturalism and globalization Including essays by Layne Little Archana Venkatesan Susan Schomburg Anand Pandian E Annamalai V Geetha Ravi Vaitheespara Chelva Kanaganayakam Joseph A Chandrakanthan and R Cheran *Beyond Representation* Crispin Bates,2006 The volume explores how the British rule and colonial constructions of identity affected the Indians It studies the impact of colonialism on Indian identity from the point of view that emphasizes

disjunctures as much as continuities It also steps beyond this paradigm by airing a cross section of new and original research that examines the agency of Indians themselves in the process of identity formation and dialogical nature of Indian cultures

Saler, 2009 The Re Enchantment of the World is an interdisciplinary volume that challenges the long prevailing view of modernity as disenchanted There is of course something to the widespread idea so memorably put into words by Max Weber that modernity is characterized by the progressive disenchantment of the world Yet what is less often recognized is the fact that a

powerful counter tendency runs alongside this one an overwhelming urge to fill the vacuum left by departed convictions and to do so without invoking superseded belief systems In fact modernity produces an array of strategies for re enchantment each fully compatible with secular rationality It has to because God has many aspects or to put it in more secular terms because traditional religion offers so much in so many domains From one thinker to the next the question of just what in religious enchantment needs to be replaced in a secular world receives an entirely different answer Now for the first time many of these strategies are laid out in a single volume with contributions by specialists in literature history and philosophy
