Pyne, 2019-04-09 Repeatedly if paradoxically the Northeast has led national developments in fire Its intellectuals argued for model preserves in the Adirondacks and at Yellowstone oversaw the first mapping of the American fire scene for the 1880 census staffed the 1896 National Academy of Sciences forest commission that laid down guidelines for the national forests and spearheaded legislation that allowed those reserves to expand by purchase It trained the leaders who staffed those protected areas and produced most of America s first environmentalists The Northeast has its roster of great fires beginning with dark days in the late 18th century followed by a chronicle of conflagrations continuing as late as 1903 and 1908 with a shocking after tremor in 1947 It hosted the nation s first forestry schools It organized the first interstate and international fire compact And it was the Northeast that pioneered the transition to the true Big Burn industrial combustion as America went from burning living landscapes to burning lithic ones In this new book in the To the Last Smoke series renowned fire expert Stephen J Pyne narrates this history and explains how fire is returning to a place not usually thought of in America s fire scene He examines what changes in climate and land use mean for wildfire what fire ecology means for cultural landscapes and what experiments are underway to reintroduce fire to habitats that need it The region s great fires have gone its influence on the national scene has not The Northeast A Fire Survey samples the historic and contemporary significance of the region and explains how it fits into a national cartography and narrative of fire Included in this volume How the region shaped America s understanding and policy toward fire How fire fits into the region today and what that means for the country overall What changes in climate land use and institutions may mean for northeastern fire both wild and tame *Florida* Stephen J. Pyne, 2016-05-12 In Florida fire season is plural and it is most often a verb Something can

always burn Fires burn longleaf slash and sand pine They burn wiregrass sawgrass and palmetto The lush growth the dry winters the widely cast sparks Florida is built to burn In this important new collection of essays on the region Stephen J Pyne colorfully explores the ways the region has approached fire management Florida has long resisted national models of fire suppression in favor of prescribed burning for which it has ideal environmental conditions and a robust culture Out of this heritage the fire community has created institutions to match The Tallahassee region became the ignition point for the national fire revolution of the 1960s Today it remains the Silicon Valley of prescription burning How and why this happened is the topic of a fire reconnaissance that begins in the panhandle and follows Floridian fire south to the Everglades Florida is the first book in a multivolume series describing the nation s fire scene region by region The volumes in To the Last Smoke will also cover California the Northern Rockies the Great Plains the Southwest and several other critical fire regions The series serves as an important punctuation point to Pyne s fifty year career with wildland fire both as a firefighter and a fire scholar These unique surveys of regional pyrogeography are Pyne s way of keeping with it to the end encompassing the directive from his rookie season to stay with every fire to the last smoke
