Wealth and Society in Early Sixteenth Century England J.C.K. Cornwall, 2024-12-02 The wealth of Tudor England was the object of much envy to less fortunate states in Europe The main preoccupation of Tudor governments was to siphon a proper proportion of this wealth from the hands of its owners and creators into the hands of the state Only with this transfer of resources they believed could the Tudor monarchy occupy its rightful place in the world The consequence of this zealous pursuit of revenue is that Tudor statistics on wealth and property are copious and accurate J C K Cornwall used this hitherto underexploited resource to create a remarkably clear and comprehensive picture of early Tudor society in *Wealth and Society in Early Sixteenth Century England* originally published in 1988 Through his pages can be sensed the efforts of the people to disguise their sources of income from the royal investigators and the fiscal skill of the tax gatherers in finding out the truth managing to extract both information and revenue from rich and poor alike But what this evidence also shows is a pattern of breakdown in society The rise in poverty of those tramping the roads because they had lost everything is a familiar complaint of Tudor governments The author illustrates the effect of the forcible break up of communities as new industrial and agricultural practices were making rich men of those ruthlessly able to exploit their resources His book is a fine and accurate portrait of a society in a somewhat brutal stage of transition a picture all the more valuable because it quantifies precisely what up to now has been a more impressionistic and intuitive appraisal

Cooperative Research and

Development: The Industry—University—Government Relationship Albert N. Link, Gregory Tasse, 1989-05-31 We must all hang together or surely we will all hang separately Benjamin Franklin The significant apathy that characterized relationships between industry and universities and the adversarial nature of relationships between industry and government have both faded rapidly in the 1980s as the realities of global competition have surfaced in the United States Both industry and government leaders articulate a number of constructs for regaining our competitiveness in world markets One of the more frequent strategies prescribed in this new competitiveness era is cooperation Different individuals or groups may espouse different definitions interpretations or areas of emphasis but the overall importance of this concept is substantial Although examples of cooperative research have existed for several decades the number and variety of relationships have expanded rapidly in the 1980s as corporations universities and governments have embraced this strategy Joint ventures involving two or three firms increased from under 200 per year in the 1970s to over 400 per year by the mid 1980s Multiple firm cooperative arrangements are a more recent phenomenon made possible by the National Cooperative Research Act of 1984 By mid 1988 81 of these industry level consortia had formed under the provisions of the 1984 Act The rapid growth in cooperative research and development R D is primarily a response to the pressures of international competition As a corporate strategy cooperative R D meets short term needs for assets to implement new approaches for coping with intensifying competition *Global Business Regulation* John Braithwaite, Peter Drahos, 2000-02 This book confronts the question of how the regulation of business has shifted from national to global institutions Based on interviews with 500 international leaders in business and government this book examines the role played by global institutions such as the WTO IMF and the World Bank as well as various NGOs and significant individuals The authors argue that effective and decent global regulation depends on the determination of individuals to engage with powerful agendas and decision making bodies that would otherwise be dominated by concentrated economic interests **Graphic Showbiz** Adwoa Serwaa, 2014-12-08
