Contextualizing Theology in the South Pacific Randall G. Prior, 2019-07-10 This book engages with a widespread contemporary dilemma how do we do theology in a context where the cultures of the people are oral and not literate The nations of the South Pacific from their missionary beginnings inherited an approach to theology that was dominated by Western cultural categories The global movement of contextualization began to impact upon Pacific churches in the 1960s and challenged this inherited approach Significant changes have resulted but the dilemma has remained The dominant approach is still one that is defined by and better suited to literate cultures The consequence is that theology remains an alien enterprise distant from the life of the local churches and distant from the hearts and minds of the indigenous people In facing the dilemma this book exposes the fundamental differences between primary oral cultures and primary literate cultures and identifies the key factors that lie at the heart of the theological problem By addressing each of these in turn the author then paves the way ahead He offers a methodology for theology that is rooted within the oral cultural context of the South Pacific and potentially in any context where oral cultures are the norm The consequences for theology and for theological education are profound

Why the Japanese Lost Bryan Perrett, 2014-06-30 This sweeping historical study examines the military culture and fighting style of Imperial Japan from the mid nineteenth century to the end of WWII. In *Why the Japanese Lost*, military historian Bryan Perrett presents an in depth portrait of a nation that believed itself to be invincible even when its strength was being systematically destroyed by the greatest industrial power in the world. Perrett analyzes the Japanese Army from the middle of the nineteenth century through the closing months of the Second World War, highlighting its various successes as well as the flaws that led to its greatest failures. Prior to the mid nineteenth century, Japan was content to remain in medieval isolation. But by the twentieth century, the nation was armed and determined to carve out a new identity characterized by a dominating spirit. Dejected by the Great Depression of the early 1930s, the nation had grown from moderate to militant. Following the attack on Pearl Harbor in 1941, the Japanese Army was emboldened. Hong Kong, Malaya, Singapore, Burma, the Philippines and the Dutch East Indies were all overrun with deceptive ease, leading the Army to become dangerously overconfident. Through each episode of note in the history of the Japanese military, Perrett analyses and endeavors to explain the root causes and pivotal decisions that led to defeat.

Changing Church Jann Aldredge-Clanton, 2011-11-01 Through the fascinating stories of pioneering ministers, this book reveals a unique picture of progressive changes occurring in the Christian tradition. Meeting challenges and overcoming obstacles, these twelve diverse ministers are changing the church as they take prophetic stands on gender, race, interfaith cooperation, ecology, sexual orientation, economic opportunity and other social justice issues. Believing in the power of sacred symbolism to shape social reality and to provide a foundation for justice and freedom for all people, these ministers lead worship with inclusive language and imagery for humanity and divinity. They include multicultural female and male images of the Divine. Their stories affirm the connection between this expansive theology and an ethic of justice and equality in human relationships. In working from within to change the church, these ministers have risked censure by denominational authorities, loss of opportunities for promotion to larger congregations or to prestigious denominational positions, and even loss of their jobs. They have found creative ways to balance advocating for change and working to support the church using their positions as ordained clergy to bring liberating change to the church and the wider culture.
