**Pacific Island Languages** J. H. C. S. Davidson, 2021 First Published in 1990 Routledge is an imprint of Taylor Francis an Pacific Island Languages Jeremy H. C. S. Davidson,1990 Pacific Languages John Lynch, 2016-06-01 Almost one guarter of the world's languages are or were spoken in the Pacific making it linguistically the most complex region in the world Although numerous technical books on groups of Pacific or Australian languages have been published and descriptions of individual languages are available until now there has been no single book that attempts a wide regional coverage for a general audience Pacific Languages introduces readers to the grammatical features of Oceanic Papuan and Australian languages as well as to the semantic structures of these languages For readers without a formal linguistic background a brief introduction to descriptive linguistics is provided In addition to describing the structure of Pacific languages this volume places them in their historical and geographical context discusses the linguistic evidence for the settlement of the Pacific and speculates on the reason for the region s many languages It devotes considerable attention to the effects of contact between speakers of different languages and to the development of pidgin and creole languages in the Pacific Throughout technical language is kept to a minimum without oversimplifying the concepts or the issues involved A glossary of technical terms maps and diagrams help identify a language geographically or genetically reading lists and a language index guide the researcher interested in a particular language or group to other sources of information Here at last is a clear and straightforward overview of Pacific languages for linguists and anyone interested in the history of sociology of Language Planning and Policy in the Pacific Richard B. Baldauf, Robert B. Kaplan, 2006 This volume the Pacific covers the language situation in Fiji The Philippines and Vanuatu explaining the linguistic diversity the historical and political contexts and the current language situation including language in education planning the role of the media the role of religion and the roles of non indigenous languages The authors are indigenous and or have been participants in the language planning context Language Description, History and Development Jeff Siegel, John Lynch, Diana Eades, 2007-03-14 This volume in memory of Terry Crowley covers a wide range of languages Australian Oceanic Pidgins and Creoles and varieties of English Part I Linguistic Description and Typology includes chapters on topics such as complex predicates and verb serialization noun incorporation possessive classifiers diphthongs accent patterns modals in Australian English and directional terms in atoll based languages Part II Historical Linguistics and Linguistic History ranges from the reconstruction of Australian languages to reflexes of Proto Oceanic to the lexicon of early Melanesian Pidgin Part III Language Development and Linguistic Applications comprises studies of lexicography language in education and language endangerment and language revival spanning the Pacific from South Australia and New Zealand to Melanesia and on to Colombia The volume will whet the appetite of anyone interested in the latest linguistic research in this richly multilingual part of the globe Indentured Identities Farzana Gounder, 2011 The book explores the historical dimension of Indian indenture from

within the lived experience of laborers who emigrated to Fiji from colonial India a century ago As these laborers are no longer alive one could argue that the experience of indenture is no longer accessible if there had not been recordings of the laborers life narratives It is seven of these audio recordings made for public broadcast which form the data for a fine grained language analysis to unearth the life world of indenture Through the merging of Labov s high point analysis with Bamberg s positioning analysis the book focuses on the situated discursive performativity of identities and draws attention to the complex and at times conflicting positions within the life narratives Sorting through those positions resulted in the ultimate challenge to the essentially homogenizing current master narrative discourse on who can be classified as an indentured laborer and what signifies as an indenture experience Archaeological Research at Caution Bay, Papua New Guinea Thomas Richards, Bruno David, Ken Aplin, 2016-12-31 The first volume of the Caution Bay monographs is designed to introduce the goals of the Caution Bay project the nature and scope of the investigations and the cultural and natural setting of the study area Evolutionary Phonology Juliette Blevins, 2004-07-22 Evolutionary Phonology is a theory of sound patterns which synthesizes results in historical linguistics phonetics and phonological theory In this book Juliette Blevins explores the nature of sounds patterns and sound change in human language over the past 7000 8000 years the time depth for which the comparative method is reasonably reliable This book presents an approach to the problem of how genetically unrelated languages from families as far apart as Native American Australian Aboriginal Austronesian and Indo European can often show similar sound patterns and also tackles the converse problem of why there are notable exceptions to most of the patterns that are often regarded as universal tendencies or constraints It argues that in both cases a formal model of sound change that integrates phonetic variation and patterns of misperception can account for attested sound systems without reference to markedness or naturalness within the synchronic grammar **Comparative Austronesian Dictionary** Darrell T. Tryon, 2011-06-01 No detailed description available for Comparative Austronesian Dictionary The Languages and Linguistics of South Asia Hans Henrich Hock, Elena Bashir, 2016-05-24 With nearly a guarter of the world s population members of at least five major language families plus several putative language isolates South Asia is a fascinating arena for linguistic investigations whether comparative historical linguistics studies of language contact and multilingualism or general linguistic theory This volume provides a state of the art survey of linguistic research on the languages of South Asia with contributions by well known experts Focus is both on what has been accomplished so far and on what remains unresolved or controversial and hence offers challenges for future research In addition to covering the languages their histories and their genetic classification as well as phonetics phonology morphology syntax and sociolinguistics the volume provides special coverage of contact and convergence indigenous South Asian grammatical traditions applications of modern technology to South Asian languages and South Asian writing systems An appendix offers a classified listing of major sources and resources both digital online and printed The Oceanic Languages John

Lynch, Malcolm Ross, Terry Crowley, 2002 The volume contains five background chapters The Oceanic Languages Sociolinguistic Background Typological Overview Proto Oceanic and Internal Subgrouping Part of 2 vol set Author Ross from A Grammar of Rapa Nui Paulus Kieviet, This book is a comprehensive description of the grammar of Rapa Nui the Polynesian language spoken on Easter Island After an introductory chapter the grammar deals with phonology word classes the noun phrase possession the verb phrase verbal and nonverbal clauses mood and negation and clause combinations. The phonology of Rapa Nui reveals certain issues of typological interest such as the existence of strict conditions on the phonological shape of words word final devoicing and reduplication patterns motivated by metrical constraints For Polynesian languages the distinction between nouns and verbs in the lexicon has often been denied in this grammar it is argued that this distinction is needed for Rapa Nui Rapa Nui has sometimes been characterised as an ergative language this grammar shows that it is unambiguously accusative Subject and object marking depend on an interplay of syntactic semantic and pragmatic factors Other distinctive features of the language include the existence of a neutral aspect marker a serial verb construction the emergence of copula verbs a possessive relative construction and a tendency to maximise the use of the nominal domain Rapa Nui's relationship to the other Polynesian languages is a recurring theme in this grammar the relationship to Tahitian which has profoundly influenced Rapa Nui especially deserves attention The grammar is supplemented with a number of interlinear texts two maps and a subject index **Proceedings of the Seventh International Conference on Austronesian Linguistics** ,2023-07-24 **Neutralization** Daniel Doron Silverman, 2012-08-16 Provides in depth nuanced and critical analyses of many theoretical approaches to neutralization in phonology and argues for a strictly functional characterization of the term The book includes a glossary discussion points and lists of further reading to help advanced phonology students consolidate the main ideas and findings on neutralization

Nominal Classification Marcin Kilarski,2013-12-18 This book offers the first comprehensive survey of the study of gender and classifiers throughout the history of Western linguistics Based on an analysis of over 200 genetically and typologically diverse languages the author shows that these seemingly arbitrary and redundant categories play in fact a central role in the lexicon grammar and the organization of discourse As a result the often contradictory approaches to their functionality and semantic motivation encapsulate the evolving conceptions of such issues as cognitive and cultural correlates of linguistic structure the diverse functions of grammatical categories linguistic complexity agreement phenomena and the interplay between lexicon and grammar The combination of a typological and historiographic perspective adopted here allows the reader to appreciate the detail and insight of earlier supposedly prescientific accounts in light of the data now available and to examine contemporary discussions in the context of prevailing conceptions in the study of language at different points in its history since antiquity 

Language Contacts in Prehistory Henning Andersen, 2003 Every language includes layers of lexical and grammatical elements that entered it at different times in the more or less distant past Hence for periods

preceding our earliest historical documentation linguistic stratigraphy the systematic study of such layers may yield information about the prehistory of a given tradition of speaking in a variety of ways For instance irregular phonological reflexes may be evidence of the convergence of diverse dialects in the formation of a language and layers of material from different source languages may form a record of changing cultural contacts in the past In this volume are discussed past problems and current advances in the stratigraphy of Indo European African Southeast Asian Australian Oceanic Japanese Studies in African Linguistic Typology F. K. Erhard Voeltz, 2006-03-22 The twenty one and Meso American languages papers that make up this volume reflect the broad perspective of African linguistic typology studies today Where previous volumes would present language material from a very restricted area and perspective the present contributions reflect the global interest and orientation of current African linguistic studies. The studies are nearly all implicational in nature Based upon a detailed survey of a particular linguistic phenomenon in a given language or language area conclusions are drawn about the general nature about this phenomenon in the languages of Africa and beyond They represent as such a first step that may ultimately lead to a more thorough understanding of African linguistic structures This approach is well justified Taking the other road attempting to pick out linguistic details from often fairly superficially documented languages runs the risk that the data and its implications for the structure investigated might be misunderstood Consequentially only very few studies of this nature giving the very broad perspective the overview of a particular structure type covering the whole African continent are represented here Variation in the Caribbean Lars Hinrichs, Joseph T. Farquharson, 2011 The study of linguistic variation in the Caribbean has been central to the emergence of Pidgin and Creole Linguistics as an academic field It has yielded influential theory such as the post creole continuum or the Acts of Identity models that has shaped sociolinguistics far beyond creole settings This volume collects current work in the field and focuses on methodological and theoretical innovations that continue expand and update the dialog between Caribbean variation studies and general sociolinguistics The Cambridge History of the Pacific Ocean: Volume 1, The Pacific Ocean to 1800 Ryan Tucker Jones, Matt K. Matsuda, 2023-01-05 Volume I of The Cambridge History of the Pacific Ocean provides a wide ranging survey of Pacific history to 1800 It focuses on varied concepts of the Pacific environment and its impact on human history as well as tracing the early exploration and colonization of the Pacific the evolution of Indigenous maritime cultures after colonization and the disruptive arrival of Europeans Bringing together a diversity of subjects and viewpoints this volume introduces a broad variety of topics engaging fully with emerging environmental and political conflicts over Pacific Ocean spaces These essays emphasize the impact of the deep history of interactions on and across the Pacific to the present day A Grammar of Togabagita Frantisek Lichtenberk, 2008-11-03 Togabagita is an Austronesian language spoken by approximately 13 000 people on the island of Malaita in the south eastern Solomon Islands This two volume grammar is the first comprehensive description of the language based on the author's field work. The grammar deals with the phonology morphology syntax and

discourse patterns of the language as well as with its contact with Solomon Islands Pijin It will be of special interest to typologists and to specialists in Austronesian linguistics
