Piper,Hirofumi Matsumura,David Bulbeck,2017-03-24 This volume brings together a diversity of international scholars unified in the theme

of expanding scientific knowledge about humanity's past in the Asia Pacific region. The contents in total encompass a deep time range concerning the origins and dispersals of anatomically modern humans, the lifestyles of Pleistocene and early Holocene Palaeolithic hunter-gatherers, the emergence of Neolithic farming communities and the development of Iron Age societies. These core enduring issues continue to be explored throughout the vast region covered here accordingly with a richness of results as shown by the authors. Befitting of the grand scope of this volume, the individual contributions articulate perspectives from multiple study areas and lines of evidence. Many of the chapters showcase new primary field data from archaeological sites in Southeast Asia. Equally important, other chapters provide updated regional summaries of research in archaeology, linguistics and human biology from East Asia through to the Western Pacific.

The Cambridge History of the Pacific Ocean: Volume 1, The Pacific Ocean to 1800 Ryan Tucker Jones, Matt K. Matsuda, 2023-01-05

Volume I of *The Cambridge History of the Pacific Ocean* provides a wide-ranging survey of Pacific history to 1800. It focuses on varied concepts of the Pacific environment and its impact on human history, as well as tracing the early exploration and colonization of the Pacific, the evolution of Indigenous maritime cultures after colonization and the disruptive arrival of Europeans. Bringing together a diversity of subjects and viewpoints, this volume introduces a broad variety of topics engaging fully with emerging environmental and political conflicts over Pacific Ocean spaces. These essays emphasize the impact of the deep history of interactions on and across the Pacific to the present day.

The Prehistoric Exploration and Colonisation of the Pacific Geoffrey Irwin, 1992. The exploration and colonisation of the Pacific is a remarkable episode of human prehistory. Early sea-going explorers had no prior knowledge of Pacific geography, no documents to record their route, no metal, no instruments for measuring time, and none for exploration. Forty years of modern archaeology, experimental voyages in rafts and computer simulations of voyages have produced an enormous range of literature on this controversial and mysterious subject. This book represents a major advance in knowledge of the settlement of the Pacific by suggesting that exploration was rapid and purposeful, undertaken systematically, and that navigation methods progressively improved. Using an innovative model to establish a detailed theory of navigation, Geoffrey Irwin claims that rather than sailing randomly downwind in search of the unknown, Pacific Islanders expanded settlement by the cautious strategy of exploring upwind so as to ease their safe return. The author has tested this hypothesis against the chronological data from archaeological investigation with a computer simulation of demographic and exploration patterns and by sailing throughout the region himself.

Joseph Gaston,1911 The Trans-Pacific Benjamin Wilfried Fleisher,1920 *Theory in the Pacific, the Pacific in Theory* Tim Thomas,2020-07-27 *Theory in the Pacific* the Pacific in Theory explores the role of theory in Pacific archaeology and its interplay with archaeological theory worldwide The contributors assess how the practice of archaeology in Pacific contexts has led to particular types of theoretical enquiry and interest and more broadly how the Pacific is conceptualised in the archaeological imagination Long seen as a laboratory environment for the testing and refinement of social theory the Pacific islands occupy a central place in global theoretical discourse This volume highlights this role through an exploration of how Pacific models and exemplars have shaped and continue to shape approaches to the archaeological past The authors evaluate key theoretical perspectives and explore current and future directions in Pacific archaeology In doing so attention is paid to the influence of Pacific people and environments in motivating and shaping theory building *Theory in the Pacific* the Pacific in Theory makes a significant contribution to our understanding of how theory develops attuned to the affordances and needs of specific contexts and how those contexts promote reformulation and development of theory elsewhere It will be fascinating to scholars and archaeologists interested in the Pacific region as well as students of wider archaeological theory

Casteel,Jean-Claude Passeron,2011-06-03 No detailed description available for Maritime Adaptations of the Pacific *Genes, Language, & Culture History in the Southwest Pacific* Jonathan S. Friedlaender,2007-04-19 The broad arc of islands north of Australia that extends from Indonesia east towards the central Pacific is home to a set of human populations whose concentration of diversity is unequalled elsewhere Approximately 20% of the worlds languages are spoken here and the biological and genetic heterogeneity among the groups is extraordinary Anthropologist W W Howells once declared diversity in the region so Protean as to defy analysis However this book can now claim considerable success in describing and understanding the origins of the genetic and linguistic variation there In order to cut through this biological knot the authors have applied a comprehensive battery of genetic analyses to an intensively sampled set of populations and have subjected these and complementary linguistic data to a variety of phylogenetic analyses This has revealed a number of heretofore unknown ancient Pleistocene genetic variants that are only found in these island populations and has also identified the genetic footprints of more recent migrants from Southeast Asia who were the ancestors of the Polynesians The book lays out the very complex structure of the variation within and among the islands in this relatively small region and a number of explanatory models are tested to see which best account for the observed pattern of genetic variation here The results suggest that a number of commonly used models of evolutionary divergence are overly simple in their assumptions and that often human diversity has accumulated in very complex ways Pan-Pacific Progress ...
