Mechanical Ventilation in Critical Care Transport Susan R. Wilcox, Jason Cohen, Michael Frakes, 2024-10-25 This book focuses on managing mechanical ventilation and its impact on physiology primarily in the transport environment Mechanical ventilation is one of the most common procedures in all critical care including critical care transport Yet the management of ventilation poses significant risks to the patient In the transport environment understanding the nuances of mechanical ventilation and its impact on physiology is extremely important Respiratory therapists and critical care physicians are essential critical care team members but they may not be available in austere or remote locations and consultation may not always be practical More than ever transport clinicians are responsible for managing ventilators according to evidence based principles The objectives of this text are to Familiarize transport clinicians with common terms in mechanical ventilation Review key principles of pulmonary physiology relevant to both mechanical ventilation and specific to transport Understand the interpretation of blood gases as related to the management of the ventilated patient Discuss the basic principles of selecting ventilator settings Develop strategies for caring for ventilated patients with ARDS asthma COPD trauma and neurologic injury Provide information specific to caring for ventilated neonates and pediatric patients Assess and respond to emergencies during mechanical ventilation The book closes with a chapter of case studies which are used to review the principles taught throughout the rest of the text and a conclusion that neatly sums up the essential points of the book Chapters are enhanced with diagrams tables illustrations and photographs All transport clinicians including experienced nurses paramedics emergency medicine residents physician assistants nurse practitioners and EMS fellows will find this book to be of great use Additionally clinicians who provide emergency care for ventilated patients outside the critical care transport setting including paramedics emergency nurses emergency physicians and hospitalists will find this text valuable

Medical evacuation in emergencies World Health Organization, 2025-07-04 In times of crisis whether due to disasters armed conflicts or other health emergencies the timely and well coordinated evacuation of patients is a critical component of emergency response Past emergencies have demonstrated the urgent need for standardized approaches to both pre hospital support for medical evacuation medevac and medevac operations themselves The absence of clear protocols coupled with delays miscommunication and inadequate care during transit can severely impact patient outcomes Establishing standardized procedures ensures that medical evacuations are conducted safely efficiently and in coordination with the broader health care and emergency response system This guidance aims to provide a

comprehensive framework for the safe and context adapted coordination clinical care operations support and logistics relevant to governments national authorities including ministries of health civil protection and civil defence national and international Emergency Medical Teams EMTs nongovernmental organizations NGOs Emergency Medical Services EMS and other key stakeholders operating in the medevac space or wishing to build this kind of capacity It defines minimum standards and recommendations for the development and classification of respective specialized care teams SCTs This is particularly relevant for contexts without pre existing or functional prehospital or medevac systems and can support country level capacity building regional and sub regional planning and the development of SCTs

Comprehensive Neonatal Nursing Care, Sixth Edition Carole Kenner,Leslie Altimier,Marina V. Boykova,2019-08-28 Praise for the Fifth Edition This book provides a complete look at neonatal healthcare delivery It includes discussions of contemporary topics of interest such as informatics genetics global health and family centered care which are vital to providers caring for neonates today The case studies and evidence based practice dialogues provide great opportunities for further reflection The book is useful to a wide audience in nursing including undergraduate and graduate nursing students practicing neonatal and pediatric nurses and advanced practice nurses who care for neonates Score 92 4 Stars Doody s Medical Reviews The sixth edition of this acclaimed neonatal nursing text is completely updated to encompass the most current research findings and strategies for providing cost effective and evidence based care It continues to address neonatal

care from a physiologic and pathophysiologic perspective with a major emphasis on nursing management at the bedside and advanced practice level. It examines each neonatal body system and describes evidence based interventions that assist in understanding the why behind various clinical presentations. Integrative management is threaded throughout the text along with extensive research findings to support practice strategies and rationales for sound clinical decision making. Case studies, evidence based practice boxes, QSEN competencies and online resources help to amplify and reinforce content. New to the Sixth Edition: New technologies including neonatal health care simulation, Trauma Informed Care, Substantial revisions to the Neonatal Resuscitation Program, Updates in Continuous Quality Improvement, Emphasis on neuroprotective factors, Emerging global trends, Genomics and its relationship to precision health, prevention of diseases, Maternal Fetal Units, Neonatal Abstinence Syndrome and maternal drug use, Leadership and cost management of the NICU, Updates on neonatal care protocols and procedures, new treatments and new trends in family centered integrative developmental care, New palliative care protocols, Video clips regarding parental caregiving, Parent perspectives on care, Podcasts from experts in the field, Highlighted callouts for Emergency Alert, Quality and Safety Issues and Family Concerns, Key Features: Complete physiologic and embryologic foundation of each neonatal body system, The relevance of various diagnostic tests, Integrates quality and safety as per QSEN competencies, Case studies, evidence based practice boxes, parent handouts and online resources. Authored by internationally reputed mother of neonatal nursing, Parent Voices provide new perspective on neonatal care.

Resuscitation and Stabilization of the Critically Ill Child Derek S. Wheeler, Hector R. Wong, Thomas P.

Shanley, 2008-12-17 The care of the critically ill or injured child begins with timely prompt and aggressive resuscitation and stabilization. Ideally, stabilization should occur before the onset of organ failure in order to achieve the best possible outcomes. In the following pages, an international panel of experts provides an in depth discussion of the early recognition, resuscitation and stabilization of the critically ill or injured child. Once again, we would like to dedicate this textbook to our families and to the physicians and nurses who provide steadfast care every day in pediatric intensive care units across the globe. Derek S. Wheeler, Hector R. Wong, Thomas P. Shanley. V. Preface to Pediatric Critical Care Medicine: Basic Science and Clinical Evidence. The field of critical care medicine is growing at a tremendous pace and tremendous advances in the understanding of critical illness have been realized in the last decade. My family has directly benefited from some of the technological and scientific advances made in the care of critically ill children. My son Ryan was born during my third year of medical school. By some peculiar happenstance, I was nearing completion of a 4 week rotation in the newborn intensive care unit (NICU). The head of the pediatrics clerkship was kind enough to let me have a few days off around the time of the delivery. My wife Cathy was 2 weeks past her due date and had been scheduled for elective induction.

Paediatric Intensive Care Peter Barry, Kevin Morris, Tariq Ali, 2017

One in 70 children are admitted to paediatric intensive care (PIC) at some time during childhood. Most paediatric junior doctors will rotate through PIC and will be involved in organising acute intensive care for critically ill

children The range of children and their illnesses going through PIC is vast making it a hugely diverse specialty A critically ill child will end up there regardless of their underlying disease and as a result consultants in PIC must be true generalists and need to acquire knowledge and skills in all areas of paediatrics as well as acquiring significant knowledge of anaesthesia and surgery From setting up the ventilator to managing low cardiac output Paediatric Intensive Care gives practical and realistic advice for children's doctors and nurses in intensive care Information is presented in easily accessible 5 minute chunks to enable you to quickly get the answers you need with extensive cross referencing ensuring that different aspects of a particular clinical problem are fully covered With detailed answers to specific problems and expert guidance on how to manage the complex issues faced in PIC this handbook is an indispensable guide for all those who provide care to sick children
