Paideia Proposal:

Paideia Proposal Mortimer J. Adler, 1998-10-01 The Paideia Proposal is a system of liberal education intended for all children It was a response to what Adler characterized as the United States antidemocratic or undemocratic educational system a holdover from the 19th century when the understanding of basic human rights fell short of 20th century expectations The Paideia Proposal was based upon the following assumptions 1 All children are educable 2 Education is never completed in school or higher institutions of learning but is a lifelong process of maturity for all citizens 3 The primary cause of learning is the activity of the child's mind which is not created by but only assisted by the teacher 4 Multiple types learning and teaching must be utilized in education not just teacher lecturing or telling and 5 A student's preparation for earning a living is not the primary objective of schooling Adler stressed that the proposal is much more than just a return to the basic skills of reading writing and arithmetic It is not simply a return to the values of classical civilization but a return to what is of enduring value It is a democratic proposal intended for the education of all and not an elitist program as some have alleged

Paideia Program Mortimer J. Adler, 2010-06-15 Paideia is a holistic approach to life long learning with roots in ancient Greece The Paideia Program is based on the belief that the human species is defined by its capacity and desire for learning The program itself argues for a public education that is at once more rigorous and more accessible

Paideia Problems and Possibilities Mortimer Jerome Adler, 1983 **Education: Ends and Means** Julius A. Sigler, 1997 In American society the ends and means of education have been debated vigorously throughout its history Most Americans enthusiastically and eagerly supported the development of public education in the mid 19th century They perceived it to be a positive force for mobility and democracy While some complained that too much Obook learningO was a waste of time most Americans were delighted with the developments of the American educational system which appeared to be a foundation for our political system The Educated Person D. G. Mulcahy, 2008-03-27 Liberal education has long been a fascination for scholars in a variety of disciplines and is closely associated with the idea of the educated person Seen at one time as a matter for colleges and universities over the years it has become central to the debate surrounding general education in high school and even the earlier grades Yet so many and varied are the uses of the term liberal education that the question arises of whether and how the idea is any longer a useful or helpful construct In what way might it speak helpfully to educational challenges we face today In what ways does it still speak helpfully to educational challenges we face today In what ways might it be a guide as we search for a better way forward These are the central questions that are addressed in this book In doing so the positions of three theorists John Henry Newman Mortimer J Adler and Jane Roland Martin who have written about liberal education in a compelling way and from different perspectives are selected for close analysis The analysis is built upon to fashion a new ideal of the educated person and a new theory of liberal education *The Paideia Proposal* ,1996

Encyclopedia of Educational Reform and Dissent Thomas C. Hunt, 2010-01-20 The history of American education is

replete with educational reform and to a lesser extent educational dissent Consider the present you have various forms of privatization school choice the No Child Left Behind act home schooling value added accountability alternative teacher preparation programs on line instruction etc This range of activity is not exceptional For instance consider the past progressive education open education the junior high school the middle school Life Adjustment education career education vocational education the comprehensive high school school to work year round schooling behavioral objectives proficiency exams high stakes testing whole language learning packages and self paced instruction modular scheduling site based management all presented as the way to reform American schools at least in part Then you have the reformers themselves such as John Dewey George Counts Herbert Kohl John Holt Charles Silberman Admiral Hyman Rickover James Bryant Conant all the way back to Horace Mann himself Dissenters and dissenting movements while not as numerous and certainly not as well known in educational circles count the various faith based schools and individuals such as Archbishop Hughes of New York Clearly this is an area rich in ideas rife with controversy and vital in its outcome for individuals and the nation as a whole And yet strangely enough there exists no major encyclopedia bringing the varied strands together in one place as a ready reference for scholars teachers school administrators and students studying to enter the educational profession This two volume work is intended to be that authoritative resource Key themes and topics include biographies of reformers and dissenters theoretical and ideological perspectives key programs and legislation judicial verdicts impacting educational change in America the politics and processes of educational reform and policy making dissent and resistance to reform technology s impact on educational reform A Reader s Guide in the front matter groups entries around such themes to help readers find related entries more easily
