Part-Time Perverts Lauren Rosewarne, 2011-04-19 This book offers an erudite yet highly accessible exploration of the presence of sexual perversion in popular culture and its manifestation in everyday life An interdisciplinary exploration of sexual perversion in everyday life Part Time Perverts Sex Pop Culture and Kink Management starts from the premise that for better or worse everyone is exposed to a continual barrage of representations of sexual perversion both subliminal and overt Our involvement Dr Lauren Rosewarne contends is universal but our management strategies cover a spectrum of behavioral possibilities from total repression to total immersion It is those strategies that she examines here Drawing on her own experience as well as on pop culture and a multidisciplinary mix of theory Rosewarne shifts the discussion of perversion away from the traditional psychological and psychiatric focus and instead explores it through a feminist lens as a social issue that affects everyone Her book examines representations of perversion from suppression to dabbling to full body immersion and proposes a classification for perversion management and charts the

diverse strategies we use to manage and perhaps enjoy exposure Who Am I? Miguel Angel Gonzalez-Torres, 2024-10-17

Identity as a concept does not appear in psychoanalysis until the work of Erik Erikson in the 1950s but today it is considered a key factor in understanding individuals and groups. It is a concept of enormous complexity encompassing biological aspects, internalised object representations that determine the inner world of the subject, and relational aspects in the real world. Answering the question 'Who am I really' is a task that can span a lifetime. Constructing one's own identity involves social, cognitive, rational, and unconscious processes. These elements underpin the answer to this question and its corollary: 'What is my value?' As we move from looking at individuals in isolation to looking at groups, we are also confronted with processes of identity construction and repair. This time, group identities through movements in which sexuality and its expression in the group play a major role. This volume begins by exploring how issues of identity underlie many of the phenomena that attract our attention today, both as clinicians and as citizens. It opens with social and political phenomena such as nationalism, where identity issues are most evident, and then looks at individual nations such as Spain and their difficulty in maintaining a valuable identity shared by its citizens. This is followed by an analysis of some aspects of social violence and the response to it, electoral processes, and the manipulation of citizens, and also the impact on personal and group identity of the contemporary dynamics in large corporations where double speak and the infantilisation of employees have become commonplace. In the second part, Miguel Angel Gonzalez Torres reflects on how we can understand the sexual functioning of individuals and groups from an identity perspective, emphasising the role of female sexuality as a sentinel element that signals deep group identity dynamics. Gender identities and the social response to new proposals and attitudes in this area, the contrast between desire and submission, and the under-explored complexity of the father's role in the contemporary family unit also require a look at the role of individual and collective identity. Finally, the focus is on artistic creation. Mythical authors and mythical works always have an impact on personal and even social identity. Many cinematographic works presuppose that the authors are searching for an answer to the question of identity: 'who am I?' Or rather, 'who are we?' The book concludes with a reflection on the reparative effect that the urban landscape can have on citizens through buildings and urban plans that relate to people and respond to their desires, both conscious and unconscious. The book proposes a journey through these three main areas, reflecting on the importance of the construction and repair of individual and collective identity in our lives as social beings, in our attitudes to sexuality and desire, and in our dual role as creators and viewers of art. It is the perfect book for curious minds.

Sexual Cultures Jeffrey Weeks, 1996-07-13. The new sociology of sexuality has a two-fold aim: to demonstrate how the social shapes the sexual and to analyse how the sexual in turn becomes a focal point for personal identity, cultural anxiety, value debates, and political action. Drawing on papers from the 1994 British Sociological Association annual conference on 'Sexualities in Social Context', this volume brings together key contributors to this stimulating new approach. Topics covered include theoretical developments, the relationship between history and contemporary controversies,

community and identity especially in the context of AIDS value conflicts and changes in the meanings of intimacy The book as a whole offers a significant intervention into debates on sexuality and a thoughtful contribution to the broadening of the sociological agenda

The Designed Self Carlo Strenger, 2013-05-13 What can contemporary psychoanalysis bring to the understanding of Generation X a cohort for whom the trivialization of a dizzying array of possible experiences teamed with the pressure to lead spectacular lives often leads to diffuse feelings of confusion depression and disorientation The Designed Self chronicles Strenger's therapeutic encounters with five extraordinarily gifted young adults for whom the ideal of authenticity long associated with the Baby Boom generation was supplanted by the need to experiment endlessly with the self Perpetual self experimentation constantly reinforced by the media came to encompass everything from career choice to hair color to body shape to gender identity In compelling clinical stories Strenger introduces us to patients for whom the project of shaping the self had become a cultural imperative no less than an expression of individuality At once insightful and cautionary The Designed Self investigates how psychoanalysis must change if it is to claim cultural relevance and therapeutic effectiveness in The Age of the Designed Self

Kazaaam! Splat! Ploof! Gordana Crnkovic, 2003-10-01 Observing European debates about EuroDisney McDonald's Hollywood films and television programs and other vehicles of alleged Americanization one might imagine that Europe was in serious risk of losing its distinct cultural identity in the melting pot of American pop culture The loaded charge of kitsch is a central aspect of the debate with Disney stories for example branded as simplified travesties of authentic European folk tales But the relationship between European and American popular cultures is vastly more complex Reciprocal and interactive it is a relationship in which the European American partnership for example in cinematic ventures has become quite common And again artifacts which have a certain meaning and reception in America may have a completely different meaning and reception in Europe in effect behaving as different artifacts altogether And finally as this book shows American cultural influences have penetrated not only the popular realms of European television fashions fast food and rock music but also such domains as youth organizations literature UFO culture and religious faith

Freudian Analysts/Feminist Issues Judith M. Hughes, 1999-01-01 In this book Judith M Hughes makes a highly original case for conceptualizing gender identity as potentially multiple She does so by situating her argument within the history of psychoanalysis Hughes traces a series of conceptual lineages each descending from Freud In the study Helene Deutsch Karen Horney and Melanie Klein occupy prominent places So too do Erik H Erikson and Robert J Stoller Among contemporary theorists Carol Gilligan and Nancy Chodorow are included in Hughes's roster In each lineage Hughes discerns an evolutionary narrative Deutsch tells a story of retrogression Erikson names his epigenesis and Gilligan continues in that vein Horney's discussion recalls sexual selection Stoller's and Chodorow's theorizing brings artificial selection to mind and finally in Klein's work Hughes sees a story of natural selection and adds to it her own notion of multiple gender identities
