 Gastroenterologists and Surgeons was first published sixteen years ago the knowledge and clinical management of
 pancreatic diseases have developed markedly Thanks to the development of the translational research and the from bench to
 bedside concept much progress from the lab has been applied to clinical practice In addition several highly relevant clinical
 trials published over the last years have resulted in the update and optimisation of clinical guidelines A new and validated
 classification of severity and complications of acute pancreatitis is firmly rooted in clinical practice and has been the basis for
 the development of minimally invasive approaches to pancreatic necrosis The etiopathogenic knowledge of chronic
 pancreatitis and other pancreatopathies like that associated with diabetes mellitus has developed significantly Especially
 important has been the development of the field of cystic pancreatic tumours which has been reflected in the publication of
 several guidelines and consensus reports over the last few years Most research efforts have focused on pancreatic cancer
 which have led and will further lead to a significant increase in the therapeutic armamentarium against this devastating
 disease Finally many newly published studies have changed the concept causes clinical relevance diagnosis and treatment of
 exocrine pancreatic insufficiency This new edition of Clinical Pancreatology for Practising Gastroenterologists and Surgeons
