No other artist of the nineteenth century balanced a reverence for the past with such a strong ambition and spirit of innovation. Distinguishing himself from many other talented young artists in Paris, he gained renown in the 1820s for his novel subject matter, theatrical sense of composition, vibrant palette, and vigorous painterly technique. His vast production, including some eight hundred paintings, prints in a variety of media, and thousands of drawings and pages of writing, won the admiration of countless writers and artists, including Charles Baudelaire, Paul Cézanne, and Pablo Picasso. This comprehensive monograph closely examines the full breadth of Delacroix's career, including his engagement with the work of his predecessors, his fascination with the natural world, his interest in Lord Byron and the Greek War of Independence, and the profound influence of his voyage to North Africa in 1832. It brings to life his relationships with his contemporaries, ranging from the painters Pierre-Narcisse Guérin and Antoine-Jean Gros to Gustave Courbet, as well as his exploration of literary, historical, and biblical themes, his writing in personal journals, and his triumphant exhibition at the Exposition Universelle of 1855. Richly illustrated and encompassing the entire range and diversity of his art, from grand paintings to intimate drawings, Delacroix illuminates how this intrepid figure changed the course of European painting by heeding a call for the liberty of art.

Masterpieces of European Painting, 1800-1920, in the Metropolitan Museum of Art Metropolitan Museum of Art (New York, N.Y.), Kathryn Calley Galitz, 2007 *Delacroix's Moroccans* Jennifer Olmsted, 2025-04-08 The Women of Algiers in Their Apartment is arguably Eugène Delacroix's best-known work from his trip to Morocco in 1832, and the attention scholars have paid to it has obscured a crucial fact about Delacroix's Moroccan subjects: most of his paintings of North Africa depict men rather than women. After serving as a diplomat's companion on a mission to Morocco, Delacroix went on to devote over three-quarters of his massive North African oeuvre to the military prowess, effective leadership, equestrian virtuosity, and elegant dress of Moroccan men. Using the evidence of his writings, sketches, and paintings, Olmsted argues that rather than embodying a typical colonialist fantasy, Delacroix's paintings of Moroccan men instead show his subjects as models of heroic masculinity and political sovereignty, a position that ran counter to prevailing French attitudes toward North Africans. In this way, Delacroix's *Moroccans* intervenes in the discourse of imperialism to examine the multiple heterogeneous features of cultural response and provides nuanced readings of the artist's work that support the idea that European constructions of non-European cultures were not monolithic. Olmsted's multifaceted analysis creates a powerful and original understanding of Delacroix's Moroccan oeuvre and a counternarrative to the colonialist imagery of his era. Through close attention to Delacroix

s paintings drawings and writings as well as their historical and political contexts this book illuminates the artist s practice and offers a fresh avenue for assessing colonialism and art produced within colonial contexts *Exiled in Modernity* David O'Brien,2018-05-03 Notions of civilization and barbarism were intrinsic to Eug ne Delacroix s artistic practice he wrote regularly about these concepts in his journal and the tensions between the two were the subject of numerous paintings including his most ambitious mural project the ceiling of the Library of the Chamber of Deputies in the Palais Bourbon *Exiled in Modernity* delves deeply into these themes revealing why Delacroix s disillusionment with modernity increasingly led him to seek spiritual release or epiphany in the sensual qualities of painting While civilization implied a degree of control and the constraint of natural impulses for Delacroix barbarism evoked something uncontrolled and impulsive Seeing himself as part of a grand tradition extending back to ancient Greece Delacroix was profoundly aware of the wealth and power that set nineteenth century Europe apart from the rest of the world Yet he was fascinated by civilization s chaotic underbelly In analyzing Delacroix s art and prose David O Brien illuminates the artist s effort to reconcile the erudite tradition bound aspects of painting with a desire to reach viewers in a more direct unrestrained manner Focusing chiefly on Delacroix s musings about civilization in his famous journal his major mural projects on the theme of civilization and the place of civilization in his paintings of North Africa and of animals O Brien links Delacroix s increasingly pessimistic view of modernity to his desire to use his art to provide access to a more fulfilling experience With more than one hundred illustrations this original astute analysis of Delacroix and his work explains why he became an inspiration for modernist painters over the half century following his death Art historians and scholars of modernism especially will find great value in O Brien s work
