**Paisley Patterns** Valerie Reilly, 1989 One of the most enduring motifs that man has ever devised is that known to the English speaking world as the Paisley Pattern Originating in pre historic times as a representative plant form it has been in constant use in one way or another for over 2000 years When introduced into Europe late in the eighteenth century the pattern was seen as something exotic and was soon enthusiastically copied by textile manufacturers in Britain and France The shawls which were the principle garments to be decorated with the motif remained an essential part of a woman s wardrobe for virtually a century adapting in size and shape as each new dress fashion came along During that time millions of shawls were produced in thousands of different varieties The town of Paisley was the largest producer of the shawls and although the industry no longer dominates the fame of the Paisley Pattern lives on The Paisley Museum established in 1871 has over the years built up an enormous collection of shawls for display and research purposes Just as important as the shawls themselves however are the manufacturers original pattern books which contain large numbers of examples of the various stages in producing a design for a shawl One hundred and fifty of the best pieces of artwork have been selected and have been faithfully reproduced in this lavishly illustrated volume Dates of the designs and historical information have been included wherever possible making the book important for both textile historians and students of design With the current revival of fashionable interest in both the pattern and the shawl itself the contents of the book will surely provide a vital source of inspiration for yet more variations of this exquisite and enduring design Provided by publisher **Silk and**

**Documenting Design** Howard Collinson, Royal Ontario Museum. European Department, 1993 To understand the history of decorative arts and design it is necessary to study the ways in which designs are created and transmitted Documenting Design seeks to show how prints and drawings can demonstrate numerous aspects of the role of works on paper in the history of design From early in the history of printmaking prints were used to communicate designs both for specific objects and for ornamental patterns that could be applied to different kinds of objects including architectural elements A special category is the pattern or model book intended to promote a particular style or approach to the design of furniture or decoration Printed ornament sheets may also be self contained works of art unsuited to direct application to objects Here printed ornament becomes simply a genre of fine art like landscape and portraiture for example This was especially so during the Rococo era Countless buildings rooms objects and decorative schemes some of them famous in their day no longer exist Important design events such as festivities and ceremonies have often comprised great quantities of ephemeral architecture decoration and decorated objects Such products of design can often only be studied in the prints and drawings that record their existence Unlike prints drawings can document and therefore present a unique

insight into the process by which a designer develops and finalizes an idea Drawings can also demonstrate the collaborative nature of the decorative arts designers and makers were and are rarely identical Many drawings have survived because they were contract drawings meant to be shown to a potential customer or patron and kept as a record of a transaction Designs for metalwork were frequently drawn at full scale both for maximum clarity and in order to create a vivid impression of the amounts of precious metal required Since the 15th century prints have been designed to be used as objects themselves either in conjunction with other objects or as devices of communication The variety of such works is vast Documenting Design includes a theatre program a menu design and posters among other types Products of graphic design are often collected as documents of stylistic movements Examples as various as Japonisme late 19th century and Psychedelic 1960s are included From Heinrich Aldegrever's jewel like engraving Two Spoons and a Hunting Whistle of 1539 to Neo Op Psychedelic Revival handbills of 1988 Documenting Design illuminates the importance of prints and drawings as documents of design history BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **The Mentor**, 1923
