Pakistan's National Security Approach and Post-Cold War Security Arshad Ali, 2021-03-30 This book analyzes the paradox that despite being a national security state Pakistan has become even more insecure in the post Cold War era It provides an in depth analysis of Pakistan's foreign and security policies and their implications for the overall state and society The book identifies the immediate security challenges to Pakistan and charts the distinctive evolution of Pakistan's national security

state in which the military elite became the dominant actor in the political sphere of government during and after the Cold War period. By examining the national security state, militarization, democracy and security proxy wars and the hyper military industrial complex, the author illustrates how the vanguard role of the military created considerable structural sociopolitical, economic and security problems in Pakistan. Furthermore, the author argues that the mismatch between Pakistan's national security stance and the transformed security environment has been facilitated and sustained by the embedded interests of the country's military industrial complex. A critical evaluation of the role of the military in the political affairs of the government and how it has created structural problems for Pakistan, this book will be of interest to academics in the field of South Asian Politics and Security, South Asian Foreign and Security Policy, International Relations, Asian Security and Cold War Studies. *India's National Security Dilemma* Rajpal Budania, 2001

Nuclear Weapons and International Security Ramesh Thakur, 2015-02-11 This volume brings together more than three decades of research and writings by Professor Ramesh Thakur on the challenges posed by nuclear weapons. Following an introduction to the current nuclear state of play, the book addresses the challenge of nuclear weapons in three parts. Part I describes the scholar-practitioner interface in trying to come to grips with this challenge, the main policy impact on security strategy and the various future nuclear scenarios. Part II addresses regional nuclear challenges from the South Pacific to East South and West Asia and thereby highlights serious deficiencies in the normative architecture of the nuclear arms control and disarmament regime. In the third and final part, the chapters discuss regional nuclear weapon-free zones, NPT anomalies and their implications for the future of the nuclear arms control regime and finally assess the global governance architecture of nuclear security in light of the three Nuclear Security Summits between 2010 and 2014. The concluding chapter argues for moving towards a world of progressively reduced nuclear weapons, reduced salience of nuclear weapons in national security doctrines and deployments and ultimately a denuclearized world. This book will be of much interest to students of nuclear proliferation, global governance, international organisations, diplomacy and security studies. *Parameters*, 1993

The Changing Security Dynamics of the Persian Gulf Kristian Coates Ulrichsen, 2018-02-01 The contradictory trends of the post-Arab Spring landscape form both the backdrop to and the focus of this volume on the changing security dynamics of the Persian Gulf, defined as the six GCC states plus Iraq and Iran. The political and economic upheaval triggered by the uprisings of 2011 and the rapid emergence of the Islamic State of Iraq and Syria in 2014 have underscored the vulnerability of regional states to an intersection of domestic pressures and external shocks. The initial phase of the uprisings has given way to a series of messy and uncertain transitions that have left societies deeply fractured and ignited violence both within and across states. The bulk of the protests, with the notable exception of Bahrain, occurred outside the Gulf region, but Persian Gulf states were at the forefront of the political, economic and security response across the Middle East. This volume provides a timely and comparative study of how security in the Persian Gulf has evolved and adapted to the growing uncertainty of the post-2011

regional landscape *Pakistan's Arms Procurement and Military Buildup, 1979-99* A. Siddiq-Agha, 2001-03-20 The strategic imperative is held as the primary explanation for Pakistan's military buildup This book presents a fundamental departure in presenting an analysis of the internal dynamics of defence management and decisionmaking in Pakistan a new nuclear weapon state This is an in depth study of Pakistan's security link with its arms suppliers and defence industrial capacity and the influence of Pakistan's Army on conventional and non conventional defence decisions The analysis is backed with numerous case studies of defence decisions carried out from 1979-99 *Afghanistan's Political Stability* Ahmad Shaye Qassem, 2016-03-16 Political stability has been a central theme of policy for all governments and political systems in the history of modern Afghanistan Since its inception in the mid nineteenth century the country experimented with a diverse succession of political systems and state ideologies matched by few other countries political histories In the span of less than nine decades since independence in 1919 the Afghan state was substantially restructured at least a dozen times This volume looks at Afghanistan's historic relations with Central and South Asia ethno nationalism and development Soviet occupation and transformation of relations with Pakistan stability of the Islamic State and regional cooperation It examines how Afghanistan's different political systems reformed and readjusted policies to make them more conducive to political stability Yet political stability at best has remained a dream unrealized in Afghanistan *Defence and Media*, 1990 **Culture, Conflict, and Counterinsurgency** Thomas H. Johnson, Barry Zellen, 2014-01-22 The authors of Culture Conflict and Counterinsurgency contend that an enduring victory can still be achieved in Afghanistan However to secure it we must better understand the cultural foundations of the continuing conflicts that rage across Afghanistan and neighboring Pakistan and shift our strategy from an attritional engagement to a smarter war plan that embraces these cultural dimensions They examine the nexus of culture conflict and strategic intervention and attempt to establish if culture is important in a national security and foreign policy context and to explore how cultural phenomena and information can best be used by the military In the process they address just how intimate cultural knowledge needs to be to counter an insurgency effectively Finally they establish exactly how good we've been at building and utilizing cultural understanding in Afghanistan what the operational impact of that understanding has been and where we must improve to maximize our use of cultural knowledge in preparing for and engaging in future conflicts *India's Evolving Deterrent Force Posturing in South Asia* Zulfkar Khan, Zafar Khan, 2020-12-16 The book discusses India's evolving deterrent force posturing in South Asia under the conceptual essentials of nuclear revolution when it comes to various combinations of conventional and nuclear forces development and the strategic implications it intentionally or unintentionally poses for the South Asian region The book talks about how the contemporary restructuring of India's deterrent force posture affects India's nuclear strategy in general and how this in turn could affect the policies of its adversaries China and Pakistan in particular Authors discuss the motivations of such posturing that broadly covers India's restructuring of its Nuclear Draft Doctrine DND the ballistic missile development

program including that of its Ballistic Missile Defence BMD system and the possibility of conflicts between China India and India Pakistan given their transforming strategic force postures and their recurring adversarial behavior against each other in the Southern Asian region

Maull,Kerstin Lukner,2019-11-26 Can Germany and Japan do more militarily to uphold the international order Since the end of World War II Germany and Japan have been the most reluctant of all major U S allies to take on military responsibilities Given their histories this reluctance certainly is understandable But because of their size and economic importance Germany and Japan are the most important U S allies in Europe and in East Asia respectively and their long term reluctance to share the defense burden has become a perennial source of frustration for Washington The potential security roles of Germany and Japan are becoming increasingly important given the uncertainty indeed volatility of today s international environment Under President Trump friction among allies over burden sharing is more intense than ever before Meanwhile the security environments in Europe and Asia have deteriorated because of the resurgence of a belligerent Russia under Vladimir Putin the steady rise of an increasingly assertive China and North Korea s worrisome acquisition of nuclear weapons Partly in response to these developments Germany and Japan in recent years have boosted their security efforts mainly by increasing defense spending and taking on a somewhat broader range of military missions Even so because of their cultures of anti militarism resistance remains strong in both countries to rebuilding the military and assuming more responsibility for sustaining regional or even global peace In Reluctant Warriors a team of noted international experts critically examines how and why Germany and Japan have modified their military postures since 1990 so far and assesses how far the countries still have to go and why The contributors also highlight the risks the United States takes if it makes too simplistic a demand for the two countries to do more Pakistan's War on Terrorism Samir Puri,2012-02-20 This book examines Pakistan s strategies in the war against Islamist armed groups that began late 2001 following the 9 11 attacks The significance of the war inside Pakistan can hardly be understated Starting in the tribal territories adjacent to Afghanistan Pakistan s war has come to engulf the majority of the country through a brutal campaign of suicide bombings Thousands of Pakistani lives have been lost and the geostrategic balance of the region has been thrown into deep uncertainty Pakistan s War on Terrorism is an account of a decade long war following the 9 11 attacks that is yet to be chronicled in systematic fashion as a campaign of military manoeuvre and terrorist reprisal It is also an analytic account of Pakistan s strategic calculus during this time both in military and political terms and how these factors

have been filtered by Pakistan's unique strategic culture.
