**Dialogue**, 1983 **A History of Modern Psychology in Context** Wade Pickren, Alexandra Rutherford, 2010-02-19 In A History of Modern Psychology in Context the authors resist the traditional storylines of great achievements by eminent people or schools of thought that rise and fall in the wake of scientific progress Instead psychology is portrayed as a network of scientific and professional practices embedded in specific contexts The narrative is informed by three key concepts indigenization reflexivity and social constructionism and by the fascinating interplay between disciplinary Psychology and everyday psychology **Historical Mechanisms** Andreas Boldt, 2017-03-16 Historical Mechanisms argues that scientific method can provide key new insights about events that took place long ago Taking a fresh approach to historical method and theory this book contends that there is enough data to show that under certain circumstances societies have behaved and will continue to behave in similar ways throughout history In this book Andreas D Boldt discusses the possibility of utilizing natural scientific theories in order to explain historical processes focusing on the question of how nations and empires rise succeed fail and then assume another form in which they begin the cycle again Scientific methods are utilized metaphorically as a means of establishing connections between events and trends throughout history and this book argues that these methods can explain historical patterns such as chaos and stability the relationship between power centres and power vacuums the necessary conditions for the expansion of empires and the influence of natural and man made borders Exploring the ways in which concepts from science can be employed to shed new light on the analysis of historical data Historical Mechanisms is valuable reading for all scholars of the theory and method of history **Post-Colonial Nations in**

**Historical and Cultural Context** Dmitri M. Bondarenko, 2023-05-30 Using historical and anthropological analysis in Post Colonial Nations in Historical and Cultural Context Dmitri M Bondarenko examines nation building in Tanzania Uganda and Zambia He examines the nation and state as concepts and how these are changing globally particularly in regard to the idea that the fundamental characteristic of a nation is a culturally homogeneous community This feature became a cornerstone of the concept of the nation at its formation in the West by the end of the eighteenth century but post colonial migration flows from the Global South to the Global North are increasing multi culturalism in the North In contrast liberated states of Asia and Africa have been multi cultural from earlier on as they inherited the colonial borders in which typically many peoples were united Throughout the book Bondarenko argues that this history of multi culturalism is an advantage to development in

the Global South and that it is necessary to depart from the classical Western concept of the nation to simultaneously support citizen unity while preserving cultural diversity      *Religious Fundamentalism in the Contemporary World* Santosh C. Saha, 2004-01-01 Today new and ever more pernicious forms of terrorist violence threaten the world Because these new forms of violence are so often linked to religious radicalism modern terrorism has challenged the secular ethics of contemporary civil society There is a pressing need to understand modern religious movements that have added militancy and belligerence as fundamental elements of religious practice Contributors to this volume painstakingly tackle the question of how to define the contours of current religious fundamentalism as they examine the private and public postures of fundamentalist rhetoric the importance of its regional variants and the damage it can do to regional and national education systems Their analysis tracks trends in religious movements that aspire to radicalize reform and violently topple governments and nations while highlighting the difference between fundamentalist interpretations and other longstanding juridical political and intellectual traditions      *South Asia's Modern History* Michael Mann, 2014-10-24 This comprehensive history of modern South Asia explores the historical development of the Subcontinent from the beginning of the eighteenth century to the present day from local and regional as opposed to European perspectives Michael Mann charts the role of emerging states within the Mughal Empire the gradual British colonial expansion in the political setting of the Subcontinent and shows how the modern state formation usually associated with Western Europe can be seen in some regions of India linking Europe and South Asia together as part of a shared world history This book looks beyond the Subcontinent's post colonial history to consider the political economic social and cultural development of Pakistan and Bangladesh as well as Sri Lanka and Nepal and to examine how these developments impacted the region's citizens South Asia's Modern History begins with a general introduction which provides a geographical environmental and historiographical overview This is followed by thematic chapters which discuss Empire Building and State Formation Agriculture and Agro Economy Silviculture and Scientific Forestry Migration Circulation and Diaspora Industrialisation and Urbanisation and Knowledge Science Technology and Power demonstrating common themes across the decades and centuries This book will be perfect for all students of South Asian history      **The 'Ulama in Contemporary Pakistan** Mashal Saif, 2020-10-22 In this book Mashal Saif explores how contemporary ulama the guardians of religious knowledge and law engage with the world's most populated Islamic nation state Pakistan In mapping these engagements she weds rigorous textual analysis with fieldwork and offers insight into some of the most significant and politically charged issues in recent Pakistani history These include debates over the rights of women the country's notorious blasphemy laws the legitimacy of religiously mandated insurrection against the state sectarian violence and the place of Shi'as within the Sunni majority nation These diverse case studies are knit together by the project's most significant contribution a theoretical framework that understands the ulama's complex engagements with their state as a process of both contestation and cultivation of the Islamic Republic by citizen subjects This framework provides a
