Pakistans Nuclear Policy:

Pakistan's Nuclear Policy Zafar Khan, 2014-07-17 In May 1998 in reaction to India's nuclear weapons tests Pakistan tested six nuclear weapons. Following this the country opted for a policy of minimum deterrence and within a year Pakistan had altered its policy stance by adding the modifier of minimum credible deterrence. This book looks at how this seemingly innocuous shift seriously impacted on Pakistan's nuclear policy direction and whether the concept of minimum has lost its significance in the South Asian region's changed strategic environment. After providing a brief historical background exploring why and how Pakistan carried out the nuclear development program the book questions why Pakistan could not sustain the minimum deterrence that it had conceptualized in the immediate aftermath of the 1998 test. It examines the conceptual theoretical framework of the essentials of minimum deterrence in order to question whether Pakistan's nuclear policy remained consistent with this as well as to discover the rudimentary factors that are responsible for the inconsistencies with regard to minimum deterrence conceived in this study. The book goes on to look at the policy options that Pakistan had after acquiring the nuclear capability and what the rationale was for selecting minimum deterrence. The book not only highlights Pakistan's deterrent force building but also analyzes closely Pakistan's doctrinal posture of first use option. Furthermore it examines the policy towards arms control and disarmament and discusses whether these individual policy orientations are consistent with the minimum deterrence. Conceptually providing a deeper understanding of Pakistan's post 1998 nuclear policy this book critically examines whether the minimum deterrence conceived could be sustained both at the theoretical and operational levels. It will be a useful contribution in the field of Nuclear Policy Security Studies Asian Politics Proliferation Non Proliferation Studies and Peace Studies. This book will be of interest to policy makers scholars and students of nuclear policy nuclear proliferation and arms control related research. *Democratic Transition and Security in Pakistan* Shaun Gregory, 2015-10-23 This volume examines the trajectory of Pakistan's democratic transition and the implications of this change for its security. In May 2013 for the first time in its 66 year history Pakistan saw an elected government complete a full term in office and transfer power through the ballot box to another civilian government. At this important moment in Pakistan's history this collection brings together twelve leading academics and writers with an aim to provide a far reaching analysis of the current situation in Pakistan and emergent trends. Drawing on history diverse theoretical perspectives and empirical evidence three themed sections deal respectively with democratic transition including Islam and democracy civil military relations and economics contested borders and contested spaces the Pashtun belt Kashmir and intra Islamic conflict and regionalism bilateral relations from both Pakistani and Indian perspectives US Pakistan relations and nuclear weapons dynamics. Together the contributors explore the status of Pakistan's democratic transition contemporary security dynamics and wider regional security and political dynamics and the complex interplay of the three to provide a wide ranging analysis of Pakistan's contemporary national and regional challenges its impact on the region and

evidence of some positive trends for Pakistan's future. The book will be of much interest to students of South Asian politics, Asian security, governance and IR in general as well as policy makers, diplomats and military professionals. *America, Britain and Pakistan's Nuclear Weapons Programme, 1974-1980* Malcolm M. Craig, 2017-06-26. This book analyses US and UK efforts to shut down Pakistan's nuclear programme in the 1970s between the catalytic Indian nuclear test of May 1974 and the decline of sustained non-proliferation activity from mid 1979 onwards. It is a tale of cooperation between Washington and London but also a story of divisions and disputes. The brutal economic realities of the decade, globalisation and wider geopolitical challenges all complicated this relationship. Policy and action were also affected by changes elsewhere in the world. Iran's 1979 revolution brought a new form of political Islamic radicalism to prominence. The fears engendered by the Ayatollah and his followers coupled to the blustering rhetoric of Pakistani leaders gave rise to the Islamic bomb, a nuclear weapon supposedly created by Pakistan to be shared amongst the Muslim ummah. This study thus combines cultural, diplomatic, economic and political history to offer a rigorous, deeply researched account of a critical moment in nuclear history. *Pakistan's Pathway to the Bomb* Mansoor Ahmed, 2022. In *Pakistan's Pathway to the Bomb*, author Mansoor Ahmed provides a groundbreaking account of Pakistan's rise as a nuclear power. By drawing on elite interviews and previously untapped primary sources, Ahmed reveals how bureaucratic politics shaped the nuclear programme's development and where it stands today. **Nuclear Deterrence in South Asia** Rizwana Abbasi, Zafar Khan, 2019-06-25. This book explores evolving patterns of nuclear deterrence, the impact of new technologies and changing deterrent force postures in the South Asian region to assess future challenges for sustainable peace and stability. Under the core principles of the security dilemma, this book analyzes the prevailing security environment in South Asia and offers unilateral, bilateral and multilateral frameworks to stabilize peace and ensure deterrence stability in the South Asian region. Moreover, contending patterns of deterrence dynamics in the South Asian region are further elaborated as becoming inextricably interlinked with the broader security dynamics of the Asia Pacific region and the interactions with the United States and China's Belt and Road Initiative. As India and Pakistan are increasingly becoming part of the competing strategies exercised by the United States and China, the authors analyze how strategic uncertainty and fear faced by these rival states cause the introduction of new technologies which could gradually drift these competing states into more serious crises and military conflicts. Presenting innovative solutions to emerging South Asian challenges and offering new security mechanisms for sustainable peace and stability, this book will be of interest to academics and policymakers working on Asian Security studies, Nuclear Strategy and International Relations. *Journal of Legal Studies*, 1994. **India-Pakistan Strategic Relations** Christoph Mumtaz, Uzma Bluth, 2020-05-25. India and Pakistan have been in a state of persistent conflict that goes back to the very creation of these states after decolonization. This conflict has resulted in several wars and continuing armed clashes. After both states became nuclear powers, one would have expected a fundamental change in the way they wage war since it is a fundamental principle

of International Relations theory that nuclear armed states do not go to war with each other But the situation in South Asia seems to defy this principle India's conventional superiority should be neutralized by Pakistan's nuclear capability while Pakistan's risk taking behavior should be reduced But as a matter of fact the situation has turned out quite differently Although large scale conventional wars have not occurred the nuclear status seems to have encouraged conflict and risk taking The number of armed clashes rose Bluth and Mumtaz scrutinize the atypical and seemingly paradoxical impact of nuclearization on the conflict between India and Pakistan paying extra attention on the question of how stable this paradoxical strategic relationship is They demonstrate that the dominant paradigm used in the International Relations literature is by far not adequate to explain the strategic relations between India and Pakistan and set to work on developing a more coherent explanation A must read for everyone interested in International Relations and conflict resolution research

Pakistan's Nuclear Weapons Bhumitra Chakma, 2012-10-12 Pakistan is a vitally important country in the contemporary global political system It is a de facto nuclear state and a pivotal country in the War on Terror This book provides a comprehensive study of a nuclear armed Pakistan investigating the implications of its emergence as a nuclear weapons state Setting out the historical background of Pakistani nuclear development the book examines the lessons for proliferation that can be drawn from the Pakistan case It explains the changes and continuities of Pakistan's nuclear policy assessing its emerging force posture and the implications for Pakistani South Asian and global security It also considers the extent to which Pakistan can be said to have a nuclear doctrine the Pakistani nuclear command and control system and the relationship between Pakistan and the Non Proliferation regime Addressing the issue of whether Pakistan should be viewed as a proliferator and the implications of a nuclear Pakistan for global terrorism Pakistan's Nuclear Weapons is an important study of all the major issues surrounding Pakistan's emergence as a nuclear power **New Frontiers in Conflict**
