Palace Of Secrets Beroalde De Verville And Renaissance Conceptions Of Knowledge:

The Palace of Secrets Neil Kenny, 1991 Encyclopaedism proposed the organization of knowledge on an ordered and unified basis Its tenets were gainsaid by Montaigne among others Beroalde began his career as an encyclopaedist but gradually modified his views Kenny uses his career as the focus of this study of Renaissance thought **The Palace of Secrets** Neil Kenny, 1991 During the Renaissance different conceptions of knowledge were debated Dominant among these was encyclopaedism which treated knowledge as an ordered and unified circle of learning in which branches were logically related to each other By contrast writers like Montaigne saw human knowledge as an inherently unsystematic and subjective flux This study explores the tension between these two views examining the theories of knowledge uses of genre and the role of fiction in philosophical texts Drawing on examples from sixteenth and seventeenth century texts and particularly focusing on the polymath Beroalde de Verville Kenny provides an in depth study of the two competing conceptions of knowledge

The Cambridge History of Science: Volume 4, Eighteenth-Century Science David C. Lindberg, Roy Porter, Ronald L. Numbers, 2003-03-17 The fullest and most complete survey of the development of science in the eighteenth century

Encyclopaedic Visions Richard Yeo, 2001-03-29 The eighteenth century English dictionaries of arts and sciences claimed to contain all knowledge that a person of education should possess These early encyclopaedias responded to the explosion of information by reducing knowledge to essentials stressing the need for a coherent account of the sciences and for some time excluding biography and history Richard Yeo places these scientific dictionaries in a rich cultural framework of debate that includes the arrangement of knowledge the Republic of Letters the Enlightenment public sphere copyright issues and the specialisation of science He discusses dilemmas involved in the quest for knowledge to be both organised and readily available examining assumptions about the organisation communication and control of knowledge in these works Elegantly illustrated and accessibly written *Encyclopaedic Visions* provides a major contribution to Enlightenment studies and the history of ideas in general **Studies on Beroalde de Verville** Michael Giordano, 1992 **Pre-modern Encyclopaedic**

Texts Peter Binkley, 1997 This proceedings volume contains contributions from many areas of literature history and philosophy and comprises five extended essays on the problems and opportunities facing researchers into encyclopaedic texts and 21 research papers on specific topics *Same-Sex Desire in the English Renaissance* Kenneth Borris, 2004-06-01 The readings gathered here include many rare texts that have not been reprinted for centuries excerpted from biblical commentary legal writings medical and scientific writings popular encyclopedias and literature as well as continental vernacular and Latin sources never before available in English translation The selections are assembled in ten chapters addressing particular discursive fields Theology Law Medicine Astrology Physiognomics Encyclopedias and Reference Works Prodigious Monstrosities Love and Friendship the Sapphic Renaissance and Erotica Each chapter includes a substantial introduction summarizing its topic and its relation to early modern homoeroticism The volume also poignantly addresses key

issues in Renaissance thinking about sexual identity and newly clarifies central problems and debates in the historiography of same sex love

Orientalism in Louis XIV's France Nicholas Dew, 2009-07-02 Before the Enlightenment and before the imperialism of the later eighteenth century how did European readers find out about the varied cultures of Asia Orientalism in Louis XIV's France presents a history of Oriental studies in seventeenth century France mapping the place within the intellectual culture of the period that was given to studies of Arabic Persian Turkish and Chinese texts as well as writings on Mughal India The Orientalist writers studied here produced books that would become sources used throughout the eighteenth century Nicholas Dew places these scholars in their own context as members of the republic of letters in the age of the scientific revolution and the early Enlightenment

Travel Narratives, the New Science, and Literary Discourse, 1569-1750 Judy A. Hayden, 2016-03-03 The focus of this volume is the intersection and the cross fertilization between the travel narrative literary discourse and the New Philosophy in the early modern to early eighteenth century historical periods Contributors examine how in an historical era which realized an emphasis on nation and during a time when exploration was laying the foundation for empire science and the literary discourse of the travel narrative become intrinsically linked Together the essays in this collection point out the way in which travel narratives reflect the anxiety from changes brought about through the discoveries of the new knowledge and the way this knowledge in turn provided a new and more complex understanding of the expanding world in which the writers lived The worlds in this text are many for no world is monomial from the antipodes to the New World from the heavens to the seas and from fictional worlds to the world which contains and or constructs one's nation and empire All of these essays demonstrate the manner in which the New Philosophy dramatically changed literary discourse

Born to Write Neil Kenny, 2020-02-27 It is easy to forget how deeply embedded in social hierarchy was the literature and learning that has come down to us from the early modern European world From fiction to philosophy from poetry to history works of all kinds emerged from and through the social hierarchy that was a fundamental fact of everyday life Paying attention to it changes how we might understand and interpret the works themselves whether canonical and familiar or largely forgotten But a second related fact is much overlooked too works also often emanated from families not just from individuals Families were driving forces in the production that is in the composing editing translating or publishing of countless works Relatives collaborated with each other edited each other or continued the unfinished works of deceased family members some imitated or were inspired by the works of long dead relatives The reason why this second fact about families is connected to the first about social hierarchy is that families were in the period a basic social medium through which social status was claimed maintained threatened or lost So producing literary works was one of the many ways in which families claimed their place in the social world The process was however often fraught difficult or disappointing If families created works as a form of socio cultural legacy that might continue to benefit their future members not all members benefited equally women sometimes produced or claimed the legacy for themselves but they were often

sidelined from it Relatives sometimes disagreed bitterly about family history identity not least religious and so about the picture of themselves and their family that they wished to project more widely in society through their written works whether printed or manuscript So although family was a fundamental social medium out of which so many works emerged that process could be conflictual as well as harmonious The intertwined role of family and social hierarchy within literary production is explored in this book through the case of France from the late fifteenth to the mid seventeenth century Some families are studied here in detail such as that of the most widely read French poet of the age Clément Marot But the extent of this phenomenon is quantified too some two hundred families are identified as each containing more than one literary producer and in the case of one family an extraordinary twenty seven

Wonders, Marvels, and Monsters in Early Modern Culture Peter G. Platt, 1999 The marvelous follows us always or so the Italian philosopher Francesco Patrizi asserted in 1587 The essays in this book collectively make the case that this assertion could be an epigraph for the Renaissance For Wonder was a concept absolutely central to the early modern period Encompassing both inquiry and astonishment wonder indeed followed the Renaissance everywhere into redefinitions of the mind the body art literature the known world Often called the age of discovery the Renaissance should also be seen as the age of the marvelous However defining just what la maraviglia would have meant for Patrizi and his age is no small task This volume then seeks to explore early modern views of wonder and the marvelous by revealing the complexity of la maraviglia in the Renaissance

Poisoned Words Emily Butterworth, 2006 Slander and satire were contentious practices in early seventeenth century France Seeking to wound ridicule destroy or reform they occupied either side of a dangerous border zone between legitimate and illegitimate criticism In the first monograph on the subject Emily Butterworth explores the literary and historical contexts that enabled language to become poisoned and words to wound The legal background the many seventeenth century treatises on slander early modern linguistic theory and the satirical moral and polemical works of François Béroalde de Verville Marie de Gournay and Jean Pierre Camus are treated in this wide ranging and original book The study of early modern concepts of slander and satire develops significant conclusions on the nature of language the construction of community and the responsibility of the writer
