## **Palaeolithic Europe:**

**Palaeolithic Europe** Jennifer C. French, 2021-12-09 In this book Jennifer French presents a new synthesis of the archaeological palaeoanthropological and palaeogenetic records of the European Palaeolithic adopting a unique demographic perspective on these first two million years of European prehistory Unlike prevailing narratives of demographic stasis she emphasises the dynamism of Palaeolithic populations of both our evolutionary ancestors and members of our own species across four demographic stages within a context of substantial Pleistocene climatic changes Integrating evolutionary theory with a socially oriented approach to the Palaeolithic French bridges biological and cultural factors with a focus on women and children as the drivers of population change She shows how within the physiological constraints on fertility and mortality social relationships provide the key to enduring demographic success Through its demographic focus French combines a big picture perspective on human evolution with careful analysis of the day to day realities of European Palaeolithic hunter gatherer communities their families their children and their lives

**Handbook to Life in Prehistoric Europe** Jane McIntosh, 2009 For most of Europe's long past we have no writing no named individuals no recorded deeds This means that its history is almost entirely that of the ordinary individual the hunter gatherer farmer or metallurgist rather than the king Evidence of privileged elites and material splendor is not lacking however The skills and expertise of prehistoric Europeans were often employed in the production of exquisite jewelry elaborately woven cloth beautifully made tools and finely wrought weapons Though the palaces that have attracted excavators in other lands are absent there are few monuments elsewhere in the world to rival Europe's massive megalithic tombs or great stone circles And though individuals preserve their anonymity and many of their secrets modern technology has made it possible to reveal parts of their life history in astonishing detail **Handbook to Life in Prehistoric Europe** gathers the results of recent archaeological discoveries and scholarly research into a single accessible volume Organized thematically the handbook covers all aspects of life in prehistoric Europe including the geography of the continent settlement trade and transport industry and crafts religion death and burial warfare language the arts and more Complemented with more than 75 illustrations and maps the result is a fascinating introduction to the 7 000 year period that immediately preceded the Roman Empire

Middle and Upper Paleolithic Sites in the Eastern Hemisphere Yoshihiro Nishiaki,Yasuhisa Kondo,2023-08-22 This book provides an overview of the archaeological sites and cultural assemblages in the world and presents an archaeological database that has been established through two large scale research projects conducted between 2010 and 2022 The projects were Replacement of the Neanderthals by Modern Humans 2010 2015 and The Cultural History of PaleoAsia 2016 2022 both of which were carried out with the aid of the Japanese Government They deal with multi disciplinary studies of the demise of more archaic hominins and the survival of anatomically modern humans Although the database is designated PaleoAsiaDB which may imply a focus on Asia it incorporates the dataset collected from Africa and Europe by the Replacement of the Neanderthals by Modern Humans project PaleoAsiaDB provides a list of more than 3 300 sites and 7 600 cultural assemblages of the Middle and Upper Paleolithic Middle and Late Stone Age of the Eastern Hemisphere as of 2020 This database is the first attempt of its kind to document the related sites of 200 20ka The full version of the database is available at the University Museum on the University of Tokyo homepage

**Learning Among Neanderthals and Palaeolithic Modern Humans** Yoshihiro Nishiaki,Olaf Jöris,2019-11-27 This book is based on the research performed for the Replacement of Neanderthals by Modern Humans Project The central issue of the project is the investigation of possible differences between the two populations in cognitive ability for learning The project aims to evaluate a unique working hypothesis coined as the learning hypothesis which postulates that differences in learning eventually resulted in the replacement of those populations The book deals with relevant archaeological records to understand the learning behaviours of Neanderthals and modern humans Learning behaviours are conditioned by numerous factors including not only cognitive ability but also cultural traditions social structure population size and life history The book addresses the issues in two parts comparing learning behaviours in terms

of cognitive ability and social environments respectively Collectively it provides new insights into the behavioural characteristics of Neanderthals and modern humans from a previously overlooked perspective Furthermore it highlights the significance of understanding learning in prehistory the driving force for any development of culture and technology among human society

*The Oxford Handbook of the Archaeology and Anthropology of Hunter-Gatherers* Vicki Cummings, Peter Jordan, Marek Zvelebil, 2014-04-24 For more than a century the study of hunting and gathering societies has been central to the development of both archaeology and anthropology as academic disciplines and has also generated widespread public interest and debate The Oxford Handbook of the Archaeology and Anthropology of Hunter Gatherers provides a comprehensive review of hunter gatherer studies to date including critical engagements with older debates new theoretical perspectives and renewed obligations for greater engagement between researchers and indigenous communities Chapters provide in depth archaeological historical and anthropological case studies and examine far reaching questions about human social relations attitudes to technology ecology and management of resources and the environment as well as issues of diet health and gender relations all central topics in hunter gatherer research but also themes that have great relevance for modern global society and its future challenges The Handbook also provides a strategic vision for how the integration of new methods approaches and study regions can ensure that future research into the archaeology and anthropology of hunter gatherers will continue to deliver penetrating insights into the factors that underlie all human diversity

**The Peopling of Britain** Paul Slack, Ryk Ward, 2002-03-07 This volume reviews the way in which over the centuries the evolving human presence in Britain has shaped the British landscape and how in turn the British landscape has moulded the development of British communities From the beginnings of human settlement Britain has represented a final frontier for successive waves of colonists each bringing its own set of cultural adaptations and its own ethos into the landscape Over time both landscape and culture have matured from raw frontier to settled centre moulded by the advent of agriculture towns and industry and by streams of migration both within Britain and from outside The chapters in this book by archaeologists historians and geographers present an interdisciplinary and accessible account of that long process Together they trace the various phases of the story showing how much of it has only recently been unearthed and how much remains to be discovered

**The Oxford Handbook of the European Iron Age** Colin Haselgrove, Katharina Rebay-Salisbury, Peter S. Wells, 2023-09-22 The Oxford Handbook of the European Iron Age presents a broad overview of current understanding of the archaeology of Europe from 1000 BC through to the early historic periods exploiting the large quantities of new evidence yielded by the upsurge in archaeological research and excavation on this period over the last thirty years Three introductory chapters situate the reader in the times and the environments of Iron Age Europe Fourteen regional chapters provide accessible syntheses of developments in different parts of the continent from Ireland and Spain in the west to the borders with Asia in the east from Scandinavia in the north to the Mediterranean shores in the south Twenty six thematic chapters examine different aspects of

Iron Age archaeology in greater depth from lifeways economy and complexity to identity ritual and expression Among the many topics explored are agricultural systems settlements landscape monuments iron smelting and forging production of textiles politics demography gender migration funerary practices social and religious rituals coinage and literacy and art and design *The Oxford Handbook of the Archaeology of Childhood* Sally Crawford,Dawn Hadley,Gillian Shepherd,2018-05-10

Real understanding of past societies is not possible without including children and yet they have been strangely invisible in the archaeological record Compelling explanation about past societies cannot be achieved without including and investigating children and childhood However marginal the traces of children s bodies and bricolage may seem compared to adults archaeological evidence of children and childhood can be found in the most astonishing places and spaces The archaeology of childhood is one of the most exciting and challenging areas for new discovery about past societies Children are part of every human society but childhood is a cultural construct Each society develops its own idea about what a childhood should be what children can or should do and how they are trained to take their place in the world Children also play a part in creating the archaeological record itself In this volume experts from around the world ask questions about childhood thresholds of age and growth childhood in the material culture the death of children and the intersection of the childhood and the social economic religious and political worlds of societies in the past **The Neanderthals**
