**From the Yenisei to the Yukon** Ted Goebel, Ian Buvit, 2011-04-01 Who were the first people who came to the land bridge joining northeastern Asia to Alaska and the northwest of North America Where did they come from How did they organize technology especially in the context of settlement behavior During the Pleistocene era the people now known as Beringians dispersed across the varied landscapes of late glacial northeast Asia and northwest North America The twenty chapters gathered in this volume explore in addition to the questions posed above how Beringians adapted in response to climate and

environmental changes. They share a focus on the significance of the modern human inhabitants of the region. By examining and analyzing lithic artifacts, geoarchaeological evidence, zooarchaeological data, and archaeological features, these studies offer important interpretations of the variability to be found in the early material culture of the first Beringians. The scholars contributing to this work consider the region from Lake Baikal in the west to southern British Columbia in the east. Through a technological organization approach, this volume permits investigation of the evolutionary process of adaptation as well as the historical processes of migration and cultural transmission. The result is a closer understanding of how humans adapted to the diverse and unique conditions of the late Pleistocene.

Geoarchaeology and Radiocarbon Chronology of Stone Age Northeast Asia Vladimir V. Pitul'ko, Elena Yu. Pavlova, 2016-04-15. This English translation of a work previously published in Russian *Geoarkheologiya i radiouglerodnaya khronologiya kamennogo veka Severo Vostochnoi Azii* St Petersburg Nauka 2010 presents an overview of the Paleolithic archaeology of Northeast Asia with emphasis on geoarchaeological and radiocarbon based chronology. Although archaeological investigations above the Arctic Circle began more than two hundred years ago, access to and publication of findings has been difficult. In *Geoarchaeology and Radiocarbon Chronology of Stone Age Northeast Asia*, veteran researchers Vladimir V. Pitul'ko and Elena Yu. Pavlova have gathered and analyzed the available data to provide comprehensive documentation of human occupation of continental territories far above the Arctic Circle in the late Neopleistocene, also known as the Late Pleistocene era. By using uncalibrated radiocarbon dating, Pitul'ko and Pavlova have been able to establish reliable correlations between the artifacts and phenomena being studied. The increased number of radiocarbon age determinations for these Arctic sites is the most important data to come from the latest studies of Northeast Asia, offering a significant opportunity for re-evaluation of older materials in light of these new findings. The authors include reporting on recent work performed at two of the most important sites in the region: the mammoth cemetery site at Berelekh and the Yana Rhinoceros Horn Site.
