

WRITING A PHILOSOPHY PAPER

Philosophical writing is different from the writing you are asked to do in other courses; these guidelines might be helpful, but do not assume that following them is enough to write a good philosophy paper.

1. What you are trying to accomplish: The virtues of a philosophy paper

A philosophy paper consists in a critical analysis of a thesis and in a reasoned defense of some claims. If you advance a claim, your claim should be supported by argument. If you attribute a view to someone, you should support your attribution with reference to the original text and interpretative remarks. When you make claims about a philosopher you have read, make sure that you support your interpretation with references to specific passages. When you take a specific formulation of a point from a text, use quotations.

The virtues of a philosophy paper are:

- **clarity:** say what you have to say simply and straightforwardly
- **depth of analysis and critical questioning:** offer a critical analysis of a philosophical issue, present and question different approaches to the same issue, and compare them.
- **consideration of arguments:** the reader is not interested in your own opinion, but in the way you reason about a particular issue, how you argue about it, how you defend your claims. You must exhibit reasons for what you hold, not just voice your concern about a particular matter. Make your reasons explicit.
- **logical organization:** everything that you write must be justified: there should be a reason why you wrote what you wrote the way you did. Use only the sentences that you need to express your claims. In order to construct an argument, each step of your reasoning should be clear and in the right order. Each paragraph should follow the previous one logically,

of the most influential and imaginative of contemporary American philosophers **Philosophical Papers and Letters** G.W. Leibniz, 2012-12-06 The selections contained in these volumes from the papers and letters of Leibniz are intended to serve the student in two ways first by providing a more adequate and balanced conception of the full range and penetration of Leibniz's creative intellectual powers second by inviting a fresher approach to his intellectual growth and a clearer perception of the internal strains in his thinking through a chronological arrangement Much confusion has arisen in the past through a neglect of the development of Leibniz's ideas and Couturat's impressive plea in his edition of the *Opusculi et fragmenta* p xii for such an arrangement is valid even for incomplete editions The beginning student will do well however to read the maturer writings of Parts II III and IV first leaving Part I from a period too largely neglected by Leibniz criticism for a later study of the still obscure sources and motives of his thought The Introduction aims primarily to provide cultural orientation and an exposition of the structure and the underlying assumptions of the philosophical system rather than a critical evaluation I hope that together with the notes and the Index it will provide those aids to the understanding which the originality of Leibniz's scientific ethical and metaphysical efforts deserve **Philosophical Papers: Volume 1, Mathematics, Matter and Method** Hilary Putnam, 1979-04-30 This volume deals with the philosophy of mathematics and of science and the nature of philosophical and scientific enquiry **Truth and Progress** Richard Rorty, 1991 The volume complements two highly successful previously published volumes of Richard Rorty's philosophical papers *Objectivity Relativism and Truth* and *Essays on Heidegger and Others* The essays in the volume engage with the work of many of today's most innovative thinkers including Robert Brandom Donald Davidson Daniel Dennett Jacques Derrida Juergen Habermas John McDowell Hilary Putnam John Searle and Charles Taylor The collection also touches on problems in contemporary feminism raised by Annette Baier Marilyn Frye and Catherine MacKinnon and considers issues connected with human rights and cultural differences **Philosophical Papers** Friedrich Waismann, 1977-01-31 Friedrich Waismann was born in Vienna in 1896 and lived there until the time of the Anschluss in 1938 From then until his death in 1959 he lived in England this apart from a brief period at Cambridge early on was almost wholly at Oxford Where he held the posts first of reader in the philosophy of mathematics and then of reader in the philosophy of science He was of Jewish descent his father being Russian his mother German He studied mathematics and physics at the University of Vienna and attended the lectures of Hahn Beginning his career as a teacher of mathematics he soon became an unofficial assistant to Moritz Schlick It was Schlick's concern to see that the new philosophical ideas developed by Wittgenstein from the time of his return to philosophy in the later 1920s were made public that determined the subsequent shape of Waismann's activities Until the outbreak of the war in 1939 his main task was the preparation of a book in which Wittgenstein's thought was to be systematically expounded Between 1927 and 1935 this project was carried on in close personal conjunction with Wittgenstein A first version of the planned book *Logik Sprache Philosophie* seems to have been completed by 1931 A very different version came to England
