Philosophie Der Freude:

Manifesto of Evolutionary Humanism Michael Schmidt-Salomon, 2014-09-10 We are living in a time of asynchrony While technologically we are firmly in the 21st century our world views are still characterized by ancient legends which are thousands of years old This combination of high level technical ability and highly naive child like beliefs could have disastrous consequences in the long run We are behaving like five year olds who have been given responsibility for a jumbo jet One of the most depressing problems of our time lies in religious fundamentalists of all stripes casually making use of the fruits of the Enlightenment freedom of expression constitutionality science technology in order to prevent its principles being applied to the domain of their own belief For example to further their beliefs the 9 11 terrorists used airplanes constructed on the basis of scientific principles principles to which their beliefs could never stand up In return the fundamentalist with other means George W Bush led the world into a devastating crusade against terror and the axis of evil making use of a technology which could never have been developed if scientists had contented themselves with the American President's child like faith that the Bible's creation account is true In the face of the dangers arising from the renaissance of unenlightened thinking in a technologically highly developed era it is a matter of intellectual integrity to speak out clearly especially where religion is concerned Anyone who is capable of splitting the atom and communicating via satellites must possess intellectual and emotional maturity That certain people or groups of persons avoid exposure to criticism by establishing holy i.e. untouchable rules and uphold their fallacies as mandatory for all time may and can no longer be accepted practice in a modern society

The Art of Living and Morality* Otfried Hoffe, one of Europe's best known philosophers offers a far-reaching and foundational work in philosophical ethics. Hoffe uses clear, accessible language to present common understandings of happiness and freedom while illuminating the blind alleys in the history of philosophy. What has priority: good ends or right action? Is freedom always anarchy? Is it possible to think of a freedom enhanced by morality? Is morality merely a euphemism for stupidity? Does humanity have a good or a bad character? Is there such a thing as evil? Hoffe offers no simple formulas but provides enlightened philosophical reflection to fuel the reader's own examination of these questions. Book Jacket

Gewaltgenuss, Zorn und Gelächter Claudia Ansorge, Cora Dietl, Titus Knäpper, 2015-06-17 Violence and the escalation of violence are often linked with emotion and passion. Emotions function to prepare, stir and perform violence which again stimulates emotions and might lead to a loss of control and in the case of collective violence to an intensified coherence of the violent community. Literary or historiographic texts that depict collective violence functionalise the factor emotions in different ways depending on the respective context. They might serve at justifying violence or making it plausible, at condemning it or making it more comprehensible or even enjoyable. This is true.
