Philosophie De Lhistoire 2nd Edition Revised:

History of Philosophy Volume 2 Frederick Copleston, 2003-06-12 Copleston an Oxford Jesuit and specialist in the history of philosophy created his history as an introduction for Catholic ecclesiastical seminaries The 11 volume series gives an accessible account of each philosopher s work and explains their relationship to the work of other philosophers The Philosophy of History: A Re-examination William Sweet, 2019-09-25 The philosophy of history is an area of interest not only to philosophers but to historians and to social scientists It has been of central importance in continental European philosophy since the late 18th century and for the past half century has had a significant place in Anglo American philosophy Interest in the philosophy of history continues to grow This volume offers both an introduction to contemporary discussion in the philosophy of history and a reassessment of some of the major movements in the philosophy of history since the beginning of the 20th century Including the work of leading international scholars in the field the book presents a wide range of perspectives from different schools in philosophy and in political and social theory history and the history of ideas Traditional questions raised in the philosophy of history are explored with fresh insight the nature of history historical understanding historical objectivity the nature of the past the psychological factors in historical explanation the human significance of history alongside issues which are less frequently examined including the role of science and mathematics in history history as a social science and history as an art form As history itself remains disputed ground it is important to consider what clues history can provide for our response to issues of contemporary concern such as political realignments and economic globalisation this volume offers important insights from leading scholars in the philosophy of history **Models of the History of Philosophy** Gregorio Piaia, Giuseppe Micheli, Giovanni Santinello, 2022-03-08 This is the fourth volume of Models of the History of Philosophy a collaborative work on the history of the history of philosophy dating from the Renaissance to the end of the nineteenth century The volume covers the so called Hegelian age in which the approach to the past of philosophy is placed at the foundation of doing philosophy up to identifying with the same philosophy A philosophy which is however understood in a different way as dialectical development as hermeneutics as organic development as eclectic option as a philosophy of experience as a progressive search for truth through the repetition of errors The material is divided into four large linguistic and cultural areas the German French Italian and British It offers the detailed analysis of 10 particularly significant works of the way of conceiving and reconstructing the general history of philosophy from its origins to the contemporary age This systematic exposure is preceded and accompanied by lengthy introductions on the historical background and references to numerous other works bordering on philosophical historiography **The Historiographical Concept 'System of Philosophy'** Leo Catana, 2008-03-31 Jacob Brucker 1696 1770 established the history of philosophy as a philosophical discipline in the 1740s In order to separate this new discipline from other historical disciplines he introduced the historiographical concept system of philosophy The historian of philosophy should use this concept as a criterion of

inclusion of past philosophies and as an ideal form of exposition The present book describes the origin of this historiographical notion its implicit Protestant assumptions and it traces the concept's impact upon the methods of history of philosophy and history of ideas as developed over the following centuries Finally it discusses the concept's strengths and weaknesses as a historiographical tool arguing that it ought to be given up

Logic, Epistemology, and Scientific Theories - From Peano to the Vienna Circle Paola Cantù, Georg Schiemer, 2024-01-03 This book provides a collection of chapters on the development of scientific philosophy and symbolic logic in the early twentieth century The turn of the last century was a key transitional period for the development of symbolic logic and scientific philosophy The Peano school the editorial board of the *Revue de Métaphysique et de Morale* and the members of the Vienna Circle are generally mentioned as champions of this transformation of the role of logic in mathematics and in the sciences The scholarship contained provides a rich historical and philosophical understanding of these groups and research areas Specifically the contributions focus on a detailed investigation of the relation between structuralism and modern mathematics In addition this book provides a closer understanding of the relation between symbolic logic and previous traditions such as syllogistics This volume also informs the reader on the relation between logic the history and didactics in the Peano School This edition appeals to students and researchers working in the history of philosophy and of logic philosophy of science as well as to researchers on the Vienna Circle and the Peano School

Volume 9: Kierkegaard and Existentialism Jon Stewart, 2016-12-05 There can be no doubt that most of the thinkers who are usually associated with the existentialist tradition whatever their actual doctrines were in one way or another influenced by the writings of Kierkegaard This influence is so great that it can be fairly stated that the existentialist movement was largely responsible for the major advance in Kierkegaard's international reception that took place in the twentieth century In Kierkegaard's writings one can find a rich array of concepts such as anxiety despair freedom sin the crowd and sickness that all came to be standard motifs in existentialist literature Sartre played an important role in canonizing Kierkegaard as one of the forerunners of existentialism However recent scholarship has been attentive to his

ideological use of Kierkegaard Indeed Sartre seemed to be exploiting Kierkegaard for his own purposes and suspicions of misrepresentation and distortions have led recent commentators to go back and reexamine the complex relation between Kierkegaard and the existentialist thinkers The articles in the present volume feature figures from the French German Spanish and Russian traditions of existentialism They examine the rich and varied use of Kierkegaard by these later thinkers and most importantly they critically analyze his purported role in this famous intellectual movement *Augustin Thierry: Social and Political Consciousness in the Evolution of a Historical Method* Rulon Nephi Smithson, 1972 **Lives of Seventy of the Most Eminent Painters, Sculptors and Architects** Giorgio Vasari, 1896 **Vico's New Science of the Intersubjective World** Vittorio Hösle, 2016-11-15 Among the classics of the history of philosophy the *Scienza nuova* New Science by Giambattista Vico 1668-1744 was largely neglected and generally misunderstood during the author's lifetime From the nineteenth century onwards Vico's views found a wider audience and today his influence is widespread in the humanities and social sciences The New Science is often taught in courses at colleges and universities both in philosophy and Italian departments and in general humanities courses Despite the excellent English translations of this enigmatic book and numerous studies in English of Vico many sections of the work remain challenging to the modern reader Vico's New Science of the Intersubjective World offers both an in-depth analysis of all the important ideas of the book and an evaluation of their contribution to our present understanding of the social world In the first chapter Vittorio Hösle examines Vico's life sources and writings The second and third chapters discuss the concerns and problems of the *Scienza nuova* The fourth chapter traces the broader history of Vico's reception Hösle facilitates the understanding of many passages in the work as well as the overarching structure of its claims which are often dispersed over many sections Hösle reformulates Vico's vision in such a way that it is not only of historical interest but may inspire ongoing debates about the nature of the humanities and social sciences as well as many other issues on which Vico sheds light from the relation of poetry and poetics to the development of law This book will prepare students and scholars for a precise study of the *Scienza nuova* equipping them with the necessary categories and context and familiarizing them with the most important problems in the critical debate on Vico's philosophy

New Essays on the Political Thought of the Huguenots of the Refuge John Christian Laursen, 1994-11-01 The Revocation of the Edict of Nantes in 1685 led to a large diaspora of French Huguenots known as the Refuge Spreading throughout Europe many of these Huguenots used their literary and polemical talents in the development of political ideas that would help them in their efforts to return to France or in their adjustment to living outside of France Arguably their predicament turned some of them into cosmopolitans and instigated their contributions to the theory and practice of freedom of the press and economic freedom As in the case of other diaspora cultures expulsion from France evidently drove the refugees to new levels of political awareness and new heights of argumentative creativity The work of the famous and industrious refugee Pierre Bayle has been credited with inspiring the great figures of Enlightenment and modernity Too often

however the work of less famous figures who contributed to the ethos of this period has been neglected This volume contains explorations in the originality and influence of many of those figures while pointing to the need for more work in the area Contributors include Daniel Br hlmeier Pauline Haour T J Hochstrasser John Christian Laursen Fabrizio Lomonaco Bertram E Schwarzbach and Simone Zurbuchen

Unbelief and Revolution Groen van Prinsterer, 2018-11-28 God's word illumines the darkness of society Groen van Prinsterer's *Unbelief and Revolution* is a foundational work addressing the inherent tension between religion and modernity As a historian and politician Groen was intimately familiar with the growing divide between secular culture and the church in his time Rather than embrace this division these lectures originally published in 1847 argue for a renewed interaction between the two spheres Groen's work served as an inspiration for many contemporary theologians and as a mentor to Abraham Kuyper he had a profound impact on Kuyper's famous public theology Harry Van Dyke the original translator reintroduces this vital contribution to our understanding of the relationship between religion and society

Hegel and Schelling in Early Nineteenth-Century France Kirill Chepurin, Adi Eyal-Lautenschläger, Daniel Whistler, Ayşe Yuva, 2023-11-29 Hegel and Schelling in Early Nineteenth Century France is a two volume work that documents the French reception of G W F Hegel and F W J Schelling from 1801 to 1848 It shows that the story of the French Hegel didn't begin with Wahl and Kojve by giving readers a solid understanding of the various ways in which German Idealism impacted nineteenth century French philosophy as well as providing the first ever English language translations of excerpts from the most important philosophical texts of the era Inside volume one readers will find a number of interpretative frameworks to help them get to grips with this neglected field in the history of ideas In addition to excerpted translations and a narrative of Hegel's and Schelling's fate in France during the early nineteenth century this volume includes an introduction on transnational reception history as well as an analytical catalogue of the translations of their work produced in French at this time of the publications which appropriated or interrogated their philosophical legacy and of the journals institutional structures and other mechanisms of dissemination that brought Hegel's and Schelling's philosophy into France The book thus details the ways in which French philosophers of the period took up the debates and concepts of German Idealism transformed them or rejected them In this way it aims to contribute to a reversal of the serious neglect of early nineteenth century French thought in English language scholarship and in so doing goes beyond a nation based narrative of the history of philosophy Figures covered in the volumes include major philosophers such as Cousin Leroux Proudhon Quinet Ravaisson Renouvier and Vira as well as more neglected figures
