Sherman,Rodman B. Webb,2004-08-02 Published in the year 1988 Qualitative Research In Education is a valuable contribution to the field of Education **The Literature of Education** W. Kenneth Richmond,2019-01-15 Original blurb The volume of writing on educational topics has increased so prodigiously

in recent years that the student is likely to lose himself in a sea of print This may lead him to opt for the first book that comes to hand or waste time rifling through half a dozen when a thorough grasp of one key text is all that is needed Reading lists commonly look impressive not to say daunting In fact the multifarious titles conceal an enormous amount of duplication an endless raking over of other people s research findings It is a safe bet writes W Kenneth Richmond that less than 5 percent of the contents of any new book on education will be in any way original This critical bibliography originally published in 1972 is concerned with the noteworthy books and major official reports that had appeared in the English language during the twenty five years prior to publication In his introduction and in the commentaries prefacing each section the author explains the background to the genuinely new departures of the period and describes successive changes in the climate of educational opinion

Qualities of Experience and Educational Philosophy John Peter Wynne, 1960 In 1955 the American Association of Colleges for Teacher Education and the Philosophy of Education Society collaborated on a study examining the qualities of experience important to teacher education Their report entitled *Qualities of Experience for Prospective Teachers* was published in 1957 A symposium on the report was held in 1958 hosted by the Philosophy of Education Society and this book includes the paper read at it The introduction includes a brief synopsis of the report itself for readers unfamiliar with it and the summary at the end deals with general criticisms questions and suggestions regarding it This book may clarify the meaning of certain terms and the nature of issues for those who use the report in practical situations As a cooperative discussion by representatives of varying schools of thought it has a place in course in the philosophy or principles of education especially if they include consideration of qualities of experience as educational ends aims or values
