Ricci, 2017-09-29 Travel Tourism and Identity addresses the psychological and social adjustments that occur when people make contact with others outside their social cultural or linguistic groups Whether such contact is the result of tourism seeking exile or relocating abroad the volume's contributors demonstrate how one's identity cultural assumptions and worldview can be brought into question In some cases the traveller finds that bridging the social and cultural gap between himself and the new society is fairly easy In other cases the traveller discovers that reorienting himself requires absorbing a new cultural history and traditions The contributors argue that making these adjustments will surely enhance the traveller's or tourist's experience otherwise the traveller or tourist will be at risk of becoming a marginalized figure one disconnected from the society that surrounds him This latest volume in the Culture Civilization series features a collection of essays on travel and tourism The essays cover a range of topics from historical travels to modern social identities They discuss ancient travels contemporary travels in Europe Africa and sustainable eco tourism and the politics of tourism Essays also address experiences of Grenada's Spice Island identity and the effects of globalization and migrations on personal identity *Machine Learning: Concepts, Methodologies, Tools and Applications* Management Association, Information Resources, 2011-07-31 This reference offers a wide ranging selection of key research in a complex field of study discussing topics ranging from using machine learning to improve the effectiveness of agents and multi agent systems to developing machine learning software for high frequency trading in financial markets Provided by publisher **The Democratic Leader** John Kane, Haig Patapan, 2012-03-29 The Democratic Leader argues that leaders occupy a unique place in democracies The foundational principle of democracy popular sovereignty implies that the people must rule Yet the people can rule only by granting a trust of authority to individual leaders This produces a tension that results in a unique type of leadership specifically democratic leadership Democratic leaders once they have the confidence and authority of the people are very powerful because they rule through consent and not through fear Yet in many respects they are the weakest of leaders because democrats distrust leaders and impose on them a range of far reaching constraints legal moral and political The democratic leader must perpetually navigate the powerful and contending forces of public cynicism founded in the suspicion that all leaders are self interested power seekers and of public idealism founded in a perennial hope that good leaders will act nobly by sacrificing themselves for the people The Democratic Leader suggests that

the inherent difficulty of this form of leadership cannot be resolved and indeed is necessary for securing the strength and stability of democracy
