Philosophy in the Development of Law Pierre de Tourtoulon, 1969 *Philosophy in the Development of Law* Pierre de Tourtoulon, 1922 **Philosophy in the Development of Law** Pierre de Tourtoulon, 2015-06-16 Excerpt from Philosophy in the Development of Law Until either philosophers become kings said Socrates or kings philosophers States will never succeed in remedying their shortcomings And if he was loath to give forth this view because as he admitted it might sink him beneath the waters of laughter and ridicule so to day among us it would doubtless resound in folly if we sought to apply it again in our own field of State life and to assert that philosophers must become lawyers or lawyers philosophers if our law is ever to be advanced into its perfect working And yet there is hope as there is need among us today of some such transformation Of course history shows that there always have been cycles of legal progress and that they have often been heralded and guided by philosophies But particularly there is hope that our own people may be the generation now about to exemplify this There are several reasons for thinking our people apt thereto But without delaying over the grounds for such speculations let us recall that as shrewd and good natured an observer as DeTocqueville saw this in us He admits that in most of the operations of the mind each American appeals to the individual exercise of his own understanding alone therefore in no country in the civilized world is less attention paid to philosophy than in the United States About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Dray, 1957 This book challenges the popular view that the logical structure of explanation

in history can in every case be elucidated in terms of subsumption under covering law. It argues that departures from this logical model in ordinary historical writing cannot satisfactorily be explained away as incomplete or defective cases and it endeavours to show how the attempt to do this may lead philosophers to read into explanations offered by historians more than is really intended while at the same time important features of what is intended are missed. In a series of independent but converging arguments some problems raised by the uniqueness of historical events, the rationality of human actions and the logical grammar of casual language are discussed in this connexion and the pragmatic dimension of explanation is also explored.

Publisher Law and Development Piotr Szwedo, Richard Peltz-Steele, Dai Tamada, 2019-09-14. This book examines the concept of development from alternative perspectives and analyzes how different approaches influence law. Sustainable development focuses on balancing economic progress, environmental protection, individual rights and collective interests. It requires a holistic approach to human beings in their individual and social dimensions which can be seen as a reference to integral human development, a concept found in ethics. Development can be considered as a value or a goal. But it also has a normative dimension influencing lawmaking and legal application; it is a rule of interpretation which harmonizes the application of conflicting norms and which is often based on the ethical and anthropological assumptions of the decision maker. This research examines how different approaches to development and their impact on law can coexist in pluralistic and multicultural societies and how to evaluate their legitimacy, analyzing the problem from an overarching theoretical perspective. It also discusses case studies stemming from different branches of law.

Law, Order and Freedom C.W. Maris,F.C.L.M. Jacobs,2011-09-08 The central question in legal philosophy is the relationship between law and morality The legal systems of many countries around the world have been influenced by the principles of the Enlightenment freedom equality and fraternity The position is similar in relation to the accompanying state ideal of the democratic constitutional state as well as the notion of a welfare state The foundation of these principles lies in the ideal of individual autonomy The law must in this view guarantee a social order which secures the equal freedom of all This freedom is moreover fundamental because in modern pluralistic societies a great diversity of views exist concerning the appropriate way of life This freedom ideal is however also strongly contested In *Law Order and Freedom* a historical overview is given pertaining to the question of the extent to which the modern Enlightenment values can serve as the universal foundation of law and society

Jacob Brucker, Critical History of Philosophy: 'Preliminary Discourse' and 'On The Socratic School', 2024-10-19 It is well known that philosophy has a history that spans over more than two thousand years It is less known however that the discipline narrating philosophy s past emerged much later namely in the 18th century That new discipline was called history of philosophy The German historian and theologian Johann Jacob Brucker 1696 1770 had a decisive influence upon the formation of this new discipline through his Latin work *Historia critica philosophiae* Critical

history of philosophy which was first published in 1742 1744 and which came out in a second edition in 1766 1767 To Brucker it was paramount to define history of philosophy as a philosophical discipline and not merely as a historical discipline In order to achieve this it was vital to define the new discipline s object and explain which material should be included or excluded and it was crucial to define an interpretative and philosophical method to be deployed on the material selected Brucker s Historia provided these definitions in the opening chapter in the present volume translated as the Preliminary Discourse where he also outlined a global scheme of periodization and geographical regions Moreover he put his own precepts to practice in the remaining part of the work which accounted for what he regarded as a global history of philosophy from the beginning of the world up till his own times The second chapter translated in the present book The Socratic School illustrates the hermeneutical consequences of the method laid down in the Preliminary Discourse but it also offers a unique insight into the 18th century understanding and evaluation of Socrates In quantitative terms Brucker s Historia was the most extensive account of philosophy s past produced in the 18th century It was cited and paraphrased in the most authoritative encyclopaedias and histories of philosophy produced in Europe in the 18th and 19th centuries and its key concepts were often transferred to histories of philosophy produced outside Europe For this reason Brucker s Historia has exerted an enormous influence upon historical consciousness among Europeans but also among peoples living outside Europe The present book provides first time English translations of parts of Brucker s work *Contemporary Natural Philosophy and Philosophies - Part 1* Gordana Dodig-Crnkovic, Marcin J. Schroeder, 2019-06-11 Modern information communication technology eradicates barriers of geographic distances making the world globally interdependent but this spatial globalization has not eliminated cultural fragmentation The Two Cultures of C P Snow that of science technology and that of humanities are drifting apart even faster than before and they themselves crumble into increasingly specialized domains Disintegrated knowledge has become subservient to the competition in technological and economic race leading in the direction chosen not by the reason intellect and shared value based judgement but rather by the whims of autocratic leaders or fashion controlled by marketers for the purposes of political or economic dominance If we want to restore the authority of our best available knowledge and democratic values in guiding humanity first we have to reintegrate scattered domains of human knowledge and values and offer an evolving and diverse vision of common reality unified by sound methodology This collection of articles responds to the call from the journal Philosophies to build a new networked world of knowledge with domain specialists from different disciplines interacting and connecting with other knowledge and values producing and knowledge and values consuming communities in an inclusive extended contemporary natural philosophic manner In this process of synthesis scientific and philosophical investigations enrich each other with sciences informing philosophies about the best current knowledge of the world both natural and human made while philosophies scrutinize the ontological epistemological and methodological foundations of sciences providing scientists with questions and conceptual
