Michael Oakeshott

Philosophy Of Being:

The Philosophy of Being Henri Renard, 1942 This book is an introduction to metaphysics It proposes to lay the metaphysical foundation for right thinking It is primarily intended to be a positive not a negative work The emphasis is not so much upon answering difficulties or on expounding and refuting adversaries as upon giving a clear concise and unified presentation of the metaphysics of St Thomas Foreword BEING & EDENTATION - PRELIMINARY Augustin Ostace, 2017-05-03 To my mother Victoria the greatest Incentor Being throughout my life and which proved to be more than any encouragement by creating the monumental opera of the AERA OF PHILOSOPHICAL SYSTEMS Being and Edentation is a combination between Gnathology Dentistry as human pathology in total edentation with an interpretation between dentistry philosophy psychology theology in their videological togetherness Video Gnathologist *Metaphysic. (System of phil., 2).* Rudolf Hermann Lotze, 1884 Pre-scholastic and scholastic philosophy Albert Stöckl, 1911 *Heidegger and Aquinas* John D. Caputo, 2024-10-22 Available in a new digital edition with reflowable text suitable for e readers The purpose of the present study is to undertake a confrontation of the thought of Martin Heidegger and Thomas Aquinas on the question of Being and the problem of metaphysics Now a confrontation which does no more than draw up a catalogue of common traits and points of difference is no more than a curiosity an idle comparison which bears no fruit *Philosophies of Place* Peter D. Hershock, Roger T. Ames, 2019-06-30 Humanity takes up space Human beings like many other species also transform spaces What is perhaps uniquely human is the disposition to qualitatively transform spaces into places that are charged with distinctive kinds of intergenerational significance There is a profound felt difference between a house as domestic space and a home as familial place or between the summit of a mountain one has climbed for the first time and the same rock pinnacle celebrated in ancestral narratives Contemporary philosophical uses of the word place often pivot on the distinction between space and place formalized by geographer philosopher Yi fu Tuan who suggested that places incorporate the experiences and aspirations of a people over the course of their moral and aesthetic engagement with sites and locations While spaces afford possibilities for different kinds of presence physical emotional cognitive dramatic spiritual places emerge as different ways of being present fuse over time and saturate a locale with distinctively collaborative patterns of significance This approach to issues of place however is emblematic of what Edward S Casey has argued are convictions about the primacy of absolute space and time that evolved along with the progressive dominance of the scientific imagination and modern imaginations of the universal The recent reappearance of place in Western philosophy represents a turn away from abstract and a priori reasoning and back toward phenomenal experience and the primacy of embodied and emplaced intelligence Places are enacted through the sustainably shared practices of mutually responsive and mutually vulnerable agents and are as numerous in kind as we are divergent in the patterns of values and intentions The contributors to this volume draw on resources from Asian European and North American traditions of thought to engage in intercultural reflection on the

significance of place in philosophy and of the place of philosophy itself in the cultural social economic and political domains of contemporary life The conversation of place that results explores the meaning of intercultural philosophy the critical interplay of place and personal identity the meaning of appropriate emplacement the shared place of politics and religion and the nature of the emotionally emplaced body *Metaphilosophy* Henri Lefebvre,2016-07-12 Leading French thinker with his key work on philosophical thought In *Metaphilosophy* Henri Lefebvre works through the implications of Marx s revolutionary thought to consider philosophy s engagement with the world Lefebvre takes Marx s notion of the world becoming philosophical and philosophy becoming worldly as a leitmotif examining the relation between Hegelian Marxist supersession and Nietzschean overcoming *Metaphilosophy* is conceived of as a transformation of philosophy developing it into a programme of radical worldwide change The book demonstrates Lefebvre s threefold debt to Hegel Marx and Nietzsche but it also brings a number of other figures into the conversation including Sartre Heidegger and Axelos A key text in Lefebvre s oeuvre *Metaphilosophy* is also a milestone in contemporary thinking about philosophy s relation to the world **A Brief**

Essays on Marxism and Asia Murzban Jal, 2021-11-24 *Essays on Marxism and Asia* begins with the largely forgotten prophet of ancient Iran Zarathushtra remembered and immortalised by Friedrich Nietzsche's *Also Sprach Zarathustra* In contrast to the infamous clash of civilisation thesis this book argues for a humanist theory of civilisations and studies the Parsis or Persians who left Iran to settle in India and make it their home It claims that Parsis despite being a migrant community took strength from their Persian heritage and civilisation and rose to become the architects of industrial modernity in India This book locates this humanist theory in the larger genre of the Asiatic mode of production with caste as its sub text It then takes a phenomenological reading of caste in India and says that India is afflicted by a very strange illness called silent blindness where humanity is silenced and blinded in front of the caste apparatus It then analyzes how capitalism and modernity fashioned caste in the image of capitalism and how the Indian right wing imagined its fascistic politics of race and racial superiority based on the image of caste hierarchy The problem in India has been that the liberals could not take caste seriously so as to confront it and then annihilate this violent apartheid structure This the book argues has led to the rise of fascism in India The book concludes with positing two different strands of secularism namely liberal or bourgeois secularism which merely separates religion and the state but mixes these when required and revolutionary secularism which humanises religion and politics first in order to find the human and class content in both The chapters in this book were originally published in *Critique Journal of Socialist Theory*
