Philosophy The Young Child:

Philosophy and the Young Child Gareth B. Matthews, 1980 *Philosophy and the Young Child* presents striking evidence that young children naturally engage in a brand of thought that is genuinely philosophical. In a series of exquisite examples that could only have been gathered by a professional philosopher with an extraordinary respect for young minds, Gareth Matthews demonstrates that children have a capacity for puzzlement and mental play that leads them to tackle many of the classic problems of knowledge, value, and existence that have traditionally formed the core of philosophical thought. Matthews's anecdotes reveal children reasoning about these problems in a way that must be taken seriously by anyone who wants to understand how children think. *Philosophy and the Young Child* provides a powerful antidote to the widespread tendency to underestimate children's mental ability and patronize their natural curiosity. As Matthews shows, even child psychologists as insightful as Piaget have failed to grasp the subtlety of children's philosophical frame of mind. Only in children's literature does Matthews find any sensitivity to children's natural philosophizing. Old favorites like *Winnie the Pooh*, the *Oz* books, and *The Bear That Wasn't* are full of philosophical puzzlers that amuse and engage children. More important, these stories manage to strip away the mental defensiveness and conventionality that so often prevent adults from appreciating the way children begin to think about the world. Gareth Matthews believes that adults have much to gain if they can learn to do philosophy with children, and his book is a rich source of useful suggestions for parents, teachers, students, and anyone else who might like to try.

Philosophy for Young Children Berys Gaut, Morag Gaut, 2013-03-01 With this book, any teacher can start teaching philosophy to children today. Co-written by a professor of philosophy and a practising primary school teacher, *Philosophy for Young Children* is a concise practical guide for teachers. It contains detailed session plans for 36 philosophical enquiries, enough for a year's work, that have all been successfully tried, tested, and enjoyed with young children from the age of three upwards. The enquiries explore a range of stimulating philosophical questions about fairness, the environment, friendship, inclusion, sharing, right and wrong, manners, beauty, pictures, the emotions, dreaming, and reality. All the stories, drawings, and photographs that you'll need to carry out the enquiries are provided and can be used with your children directly from the book. Each step-by-step enquiry includes the philosophical topic and the aim of the enquiry, the stimuli you'll need, questions to ask the children, possible answers to help move the discussion forward, ideas to help you summarise and extend the enquiry. If you are an Early Years or primary school teacher, this complete resource will enable you to introduce philosophy to your children quickly and with confidence.

Philosophy with Young Children Philip Cam, 2007-01-01 *Doing philosophy* encourages us to explore beneath the surface of things. It challenges us to ask questions and go beyond easy, obvious answers. *Doing philosophy with children* is exciting. It is surprising, challenging, awe-inspiring, and fun.

The Philosophy of Childhood Gareth Matthews, 1994 Adult preconceptions about the mental life of children tend to discourage a child's philosophical bent. By exposing the underpinnings of adult views of childhood, Matthews clears the way for recognizing

the philosophy of childhood as a legitimate field of inquiry and conducts us through influential models for understanding what it is to be a child
