Philosophy Music And Emotion:

Philosophy, Music and Emotion Geoffrey Madell, 2019-08-05 Philosophy Music and Emotion explores two issues which have been intensively debated in contemporary philosophy the nature of music's power to express emotion and the nature of emotion itself It shows how closely the two topics are related and provides a radically new account of what it means to say that music expresses emotion Geoffrey Madell maintains that most current accounts of musical expressiveness are fundamentally misguided He attributes this fact to the influence of a famous argument of the nineteenth century critic Hanslick and also to the dominant cognitivist approach to the nature of emotion which sees the essence of emotion to be the entertaining of evaluative judgements and beliefs of a certain sort an account very much in accord with Hanslick's position Such an approach results either in the unpersuasive view that musical expressiveness is somehow akin to human expressive gesture or in the view that music arouses feelings which have no specific object and unavoidably no necessary connection with the music The book argues that the cognitivist account of the nature of emotion is quite false and that it needs to be replaced with a conception of emotions as states of feeling towards states of intentional feeling whose objects are often evaluatively characterised states of affairs however in the context of the emotions that are aroused by music these objects are always musical events or states Central to this bold analysis of emotion is a new account of two closely connected mental states those of desire and of pleasure and of what role these states have in human motivation and value *Music and the Emotions* Malcolm Budd, 2002-11-01 It has often been claimed and frequently denied that music derives some or all of its artistic value from the relation in which it stands to the emotions This book presents and subjects to critical examination the chief theories about the relationship between the art of music and the emotions **Handbook of Music and Emotion**

Patrik N. Juslin, John Sloboda, 2011-03-17 A successor to the acclaimed Music and Emotion The Handbook of Music and Emotion provides comprehensive coverage of the field in all its breadth and depth As well as summarizing what is currently known about music and emotion it will also stimulate further research in promising directions that have been little studied

Themes in the Philosophy of Music Stephen Davies, 2003-01-02 Representing Stephen Davies's best shorter writings these essays outline developments within the philosophy of music over the last two decades and summarize the state of play at the beginning of a new century Including two new and previously unpublished pieces they address both perennial questions and contemporary controversies such as that over the authentic performance movement and the impact of modern technology on the presentation and reception of musical works Rather than attempting to reduce musical works to a single type Davies recognizes a great variety of kinds and a complementary range of possibilities for their rendition Among the questions that Davies considers are these How can expressiveness be in a musical work when music experiences nothing Is music a language of the emotions How do recorded pop songs and purely electronic pieces differ from works created for live performance Is John Cage's silent piece 4'33" music To what extent is the performer free to create her own interpretation and

to what extent is she constrained by the composer's score Is training in musical technicalities a prerequisite for a full appreciation of musical works and performances Is an awareness of the socio historical setting in which a work is created relevant to its appreciation How does the value of individual musical works go beyond the worth of an interest in music in general Stimulating and insightful both as individual discussions and as a coherent argument these essays will be greatly enjoyed by philosophers aestheticians art theorists and musicologists

Musical Meaning and Expression Stephen Davies, 1994 We talk not only of enjoying music but of understanding it Music is often taken to have expressive import and in that sense to have meaning But what does music mean and how does it mean Stephen Davies addresses these questions in this sophisticated and knowledgeable overview of current theories in the philosophy of music Reviewing and criticizing the aesthetic positions of recent years he offers a spirited explanation of his own position Davies considers and rejects in turn the positions that music describes like language or depicts like pictures or symbolizes in a distinctive fashion emotions Similarly he resists the idea that music's expressiveness is to be explained solely as the composer's self expression or in terms of its power to evoke a response from the audience Music's ability to describe emotions he believes is located within the music itself it presents the aural appearance of what he calls emotion characteristics The expressive power of music awakens emotions in the listener and music is valued for this power although the responses are sometimes ones of sadness Davies shows that appreciation and understanding may require more than recognition of and reaction to music's expressive character but need not depend on formal musicological training

A Brief Introduction to A Philosophy of Music and Music Education as Social Praxis Thomas A. Regelski, 2015-12-07 Music and Music Education as Social Praxis is a brief introduction to a praxial theory of music education defined by author It is grounded in an interdisciplinary approach for undergraduate and graduate students in music education Drawing upon scholarship from a range of disciplines including philosophy and sociology the book emphasizes and highlights thinking of music as an active social practice and offers an alternative to existing approaches to music education This text advocates for an alternative approach to teaching music rooted in the social practice of music and will supplement Foundations or Methods courses in the Music Education curriculum

Imagination, Music, and the Emotions Saam Trivedi, 2017-08-07 Articulates an imaginationist solution to the question of how purely instrumental music can be perceived by a listener as having emotional content Both musicians and laypersons can perceive purely instrumental music without words or an associated story or program as expressing emotions such as happiness and sadness But how In this book Saam Trivedi discusses and critiques the leading philosophical approaches to this question including formalism metaphorism expression theories arousalism resemblance theories and persona theories Finding these to be inadequate he advocates an imaginationist solution by which absolute music is not really or literally sad but is only imagined to be so in a variety of ways In particular he argues that we as listeners animate the music ourselves imaginatively projecting life and mental states onto it Bolstering his argument with empirical data from

studies in neuroscience psychology and cognitive science Trivedi also addresses and explores larger philosophical questions such as the nature of emotions metaphors and imagination

A Concise Survey of Music Philosophy Donald A. Hodges, 2016-10-04

A Concise Survey of Music Philosophy helps music students choose a philosophy that will guide them throughout their careers The book is divided into three sections central issues that any music philosophy ought to consider e g beauty emotion and aesthetics secondly significant philosophical positions exploring what major thinkers have had to say on the subject and finally opportunities for students to consider the ramifications of these ideas for themselves Throughout the book students are encouraged to make choices that will inform a philosophy of music and music education with which they are most comfortable to align Frequently music philosophy courses are taught in such a way that the teacher as well as the textbook used promotes a particular viewpoint *A Concise Survey of Music Philosophy* presents the most current prevalent philosophies for consideration Students think through different issues and consider practical applications There are numerous musical examples each with links from the author's home website to online video performances Examples are largely from the Western classical canon but also jazz popular and world music styles In the last two chapters students apply their views to practical situations and learn the differences between philosophy and advocacy Hodges has written an excellent resource for those wanting a short but meaningful introduction to the major concepts in music philosophy

Applicable to a number of courses in the music curriculum this much needed book is both accessible and flexible containing musical examples tables and diagrams and additional readings that make it particularly useful for a student's general introduction to the topic I especially like the emphasis on the personal development of a philosophical position which makes the material especially meaningful for the student of music

Deeper than Reason Jenefer Robinson, 2005-04-07

Deeper than Reason takes the insights of modern psychological and neuroscientific research on the emotions and brings them to bear on questions about our emotional involvement with the arts Robinson begins by laying out a theory of emotion one that is supported by the best evidence from current empirical work on emotions and then in the light of this theory examines some of the ways in which the emotions function in the arts Written in a clear and engaging style her book will make fascinating reading for anyone who is interested in the emotions and how they work as well as anyone engaged with the arts and aesthetics especially with questions about emotional expression in the arts emotional experience of art forms and more generally artistic interpretation

Part One develops a theory of emotions as processes having at their core non cognitive instinctive appraisals deeper than reason which automatically induce physiological changes and action tendencies and which then give way to cognitive monitoring of the situation Part Two examines the role of the emotions in understanding literature especially the great realistic novels of the nineteenth century Robinson argues that such works need to be experienced emotionally if they are to be properly understood A detailed reading of Edith Wharton's novel *The Reef* demonstrates how a great novel can educate us

emotionally by first evoking instinctive emotional responses and then getting us to cognitively monitor and reflect upon them Part Three puts forward a new Romantic theory of emotional expression in the arts Part Four deals with music both the emotional expression of emotion in music whether vocal or instrumental and the arousal of emotion by music The way music arouses emotion lends indirect support to the theory of emotion outlined in Part One While grounded in the science of emotion Deeper than Reason demonstrates the continuing importance of the arts and humanities to our lives **The Fine Art of Repetition** Peter Kivy,1993-02-26 Collection of essays on the following issues music and the liberal education work and performance the world of opera music and the history of ideas music and emotion and music alone *The Oxford Handbook of Religion and Emotion* John Corrigan,2008 This volume collects essays under four categories religious traditions religious life emotional states and historical and theoretical perspectives They describe the ways in which emotions affect various world religions and analyse the manner in which certain components of religious represent and shape emotional performance Feeling in Theory Rei Terada,2009-07-01 Because emotion is assumed to depend on subjectivity the death of the subject described in recent years by theorists such as Derrida de Man and Deleuze would also seem to mean the death of feeling This revolutionary work transforms the burgeoning interdisciplinary debate on emotion by suggesting instead a positive relation between the death of the subject and the very existence of emotion Reading the writings of Derrida and de Man theorists often seen as emotionally contradictory and cold Terada finds grounds for construing emotion as nonsubjective This project offers fresh interpretations of deconstruction s most important texts and of Continental and Anglo American philosophers from Descartes to Deleuze and Dennett At the same time it revitalizes poststructuralist theory by deploying its methodologies in a new field the philosophy of emotion to reach a startling conclusion if we really were subjects we would have no emotions at all Engaging debates in philosophy literary criticism psychology and cognitive science from a poststructuralist and deconstructive perspective Terada s work is essential for the renewal of critical thought in our day

The Routledge Handbook of Philosophy of Imagination Amy Kind,2016-01-22 Imagination occupies a central place in philosophy going back to Aristotle However following a period of relative neglect there has been an explosion of interest in imagination in the past two decades as philosophers examine the role of imagination in debates about the mind and cognition aesthetics and ethics as well as epistemology science and mathematics This outstanding Handbook contains over thirty specially commissioned chapters by leading philosophers organised into six clear sections examining the most important aspects of the philosophy of imagination including Imagination in historical context Aristotle Descartes Hume Kant Husserl and Sartre What is imagination The relation between imagination and mental imagery imagination contrasted with perception memory and dreaming Imagination in aesthetics imagination and our engagement with music art and fiction the problems of fictional emotions and imaginative resistance Imagination in philosophy of mind and cognitive science imagination and creativity the self action child development and animal cognition Imagination in ethics and political

philosophy including the concept of moral imagination and empathy Imagination in epistemology and philosophy of science including learning thought experiments scientific modelling and mathematics The Routledge Handbook of Philosophy of Imagination is essential reading for students and researchers in philosophy of mind and psychology aesthetics and ethics It will also be a valuable resource for those in related disciplines such as psychology and art

Dao Companion to Xuanxue 道 (Neo-Daoism) David Chai,2020-09-29 This comprehensive volume surveys an important but neglected period of Chinese intellectual history Xuanxue Neo Daoism It provides a holistic approach to the philosophical and religious traits of this movement via the concepts of non being being and oneness Thinkers and texts on the periphery of Xuanxue are also examined to show readers that Xuanxue did not arise in a vacuum but is the result of a long and continuous evolution of ideas from pre Qin Daoism The 25 chapters of this work survey the major philosophical figures and arguments of Xuanxue a movement from the Wei Jin dynastic period 220 420 CE of early medieval China It also examines texts and figures from the late Han dynasty whose influence on Xuanxue has yet to be made explicitly clear In order to fully capture the multifaceted nature of this movement the contributors brilliantly highlight its more socially oriented characteristics Overall this volume presents an unrivaled picture of this exciting period It details a portrait of intellectual and cultural vitality that rivals if not surpasses what was achieved during the Warring States period Readers of the Yijing Daodejing and Zhuangzi will feel right at home with the themes and arguments presented herein while students and those coming to Xuanxue for the first time will acquire a wealth of knowledge

Expression of emotion in music and vocal communication Anjali Bhatara,Petri Laukka,Daniel J. Levitin,2014-08-18 Two of the most important social skills in humans are the ability to determine the moods of those around us and to use this to guide our behavior To accomplish this we make use of numerous cues Among the most important are vocal cues from both speech and non speech sounds Music is also a reliable method for communicating emotion It is often present in social situations and can serve to unify a group s mood for ceremonial purposes funerals weddings or general social interactions Scientists and philosophers have speculated on the origins of music and language

and the possible common bases of emotional expression through music speech and other vocalizations They have found increasing evidence of commonalities among them However the domains in which researchers investigate these topics do not always overlap or share a common language so communication between disciplines has been limited The aim of this Research Topic is to bring together research across multiple disciplines related to the production and perception of emotional cues in music speech and non verbal vocalizations This includes natural sounds produced by human and non human primates as well as synthesized sounds Research methodology includes survey behavioral and neuroimaging techniques investigating adults as well as developmental populations including those with atypical development Studies using laboratory tasks as well as studies in more naturalistic settings are included
