## **Philosophy Technology And Human Affairs:**

Philosophy, Technology, and Human Affairs Larry Hickman, 1985      *Digital McLuhan* Paul Levinson, 2003-09-02

Marshall McLuhan died on the last day of 1980 on the doorstep of the personal computer revolution Yet McLuhan's ideas anticipated a world of media in motion and its impact on our lives on the dawn of the new millennium Paul Levinson examines why McLuhan's theories about media are more important to us today than when they were first written and why the Wired generation is now turning to McLuhan's work to understand the global village in the digital age      **Thinking through Technology** Carl Mitcham, 2024-05-31 What does it mean to think about technology philosophically Why try These are the issues that Carl Mitcham addresses in this work a comprehensive critical introduction to the philosophy of technology and a discussion of its sources and uses Tracing the changing meaning of technology from ancient times to our own Mitcham identifies the most important traditions of critical analysis of technology the engineering approach which assumes the centrality of technology in human life and the humanities approach which is concerned with its moral and cultural boundaries Mitcham bridges these two traditions through an analysis of discussions of engineering design of the distinction between tools and machines and of engineering science itself He looks at technology as it is experienced in everyday life as material objects from kitchenware to computers as knowledge including recipes rules theories and intuitive know how as activity design construction and use and as volition knowing how to use technology and understanding its consequences By elucidating these multiple aspects Mitcham establishes criteria for a more comprehensive analysis of ethical issues in applications of science and technology This book will guide anyone wanting to reflect on technology and its moral implications      **Technology and Contemporary Life** P.T. Durbin, 2012-12-06 Nearly everyone agrees that life has changed in our technological society whether the contrast is with earlier stages in Western culture or with non Western cultures Modernization is just one of various terms that have been applied to the process by which we have arrived at the peculiar lifestyle typical of our age whatever the term for the process almost all analysts agree in finding technology to be one of its key ingredients This is the judgment of critics of all sorts anthropologists historians literary figures sociologists theologians Volume 4 in the Philosophy and Technology series brings the perspectives of philosophers to bear on the issue of characterizing contemporary life mainly in high technology societies Some of the philosophers look at the issue directly Others focus on work life or on the living arrangements that surround or condition or offer refuge from work life in technological society Still others reflect on particular technologies especially biotechnology and computer technology that are increasingly affecting both work and family life There is also a paper on the nature of thinking in technological praxis along with two papers on whether it is appropriate to export this sort of thinking to Third World countries and another paper on the issue of responsibility in technology which would have fit better in volume 3 of the series entitled Technology and Responsibility 1987 Finally volume 4 closes with a broad ranging bibliography that takes work and technology as its focus

**The Practice of Technology** Alan Drengson,1995-10-12 Asks why current practices of technology negatively impact humans and the earth and how we can gain a holistic understanding so technology practices can be changed to support the environment *John Dewey's Pragmatic Technology* Larry A. Hickman,1990 This book does much to dispel the old canard that John Dewey was guilty of scientism and a reverent worship of technological progress Indeed Dewey predated the Frankfurt school in his warnings about the dangers inherent in a machine culture With new advances come new problems and these can only be dealt with through an instrumentalist approach Dewey also argued that we have no guarantee of success Natural events can terminate human life and human greed laziness or error could have the same result

Ormiston,Raphael Sassower,1989-01-01 Attempts to show that traditional definitions of science and technology fail to capture the complex discursive construction of scientific knowledge Argues accompanied by many literary and philosophical examples that science technology and the humanities developed in concert with each other and that their reciprocal relationship transcends traditional disciplinary boundaries Cloth edition unseen 35 Annotation copyrighted by Book News Inc Portland OR The Critical Ihde Don Ihde,2023-04-01 Don Ihde is one of the world's foremost thinkers on the place of technologies in our lives Over the course of a long career he has built a unique and useful perspective by expanding on

phenomenological and American pragmatist philosophy and has developed wide ranging insights and conceptual tools for describing the details of our experience across the various areas of human activity including scientific practice anthropological history computer interface design art history and the technologies of everyday life The Critical Ihde brings together many of Ihde s most influential writings as well as a number of under recognized gems Across these works are examples of his influential contributions to the phenomenology of human auditory and visual experience his foundational work on the phenomenology of technology and his thoughts on the technologies of scientific practice including laboratory and medical imaging Further these chapters reveal the development of postphenomenology Ihde s original philosophical perspective one that continues to flourish today across the work of a growing interdisciplinary and international collective of scholars

**The Joy of Sets** Chris Horrocks, 2017-12-22 It is a modern activity one of the primary ways we consume information and entertainment something we ll do over dinner at a bar or even standing on the street peering into a store window watch TV Many of us spend countless hours in front of the tube and even those of us who have proudly eliminated it from our lives can probably still rattle off the names of today s most popular shows But for as crucial as television viewing is in modern culture the television set itself as a ubiquitous object in our environment rarely captures our attention turn one off and it seems to all but disappear In this book Chris Horrocks tells the story of the television set exploring its contradictory presence in our lives as both a material object and a conveyor of illusory images Horrocks begins in the nineteenth century and television s prehistory as a fantastic futuristic concept He follows the television s journey from its strange roots in spiritualism imperialism and Victorian experiments in electro magnetism to the contested accounts of its actual invention looking at the work of engineering pioneers such as Philo Farnsworth and John Logie Baird Unboxing sets all across the world he details how it arrived as an essential consumer product and began to play an extraordinary role as a bridge between public and private life Horrocks describes how the console and cabinet themselves expressed status and good taste and how their designs drew on cultural phenomena such as the space race and the avant garde He discusses how we have both loved it for what it can provide and reviled it as a sinister object literally controlling our thoughts and he shows how it has figured in other cultural realms such as the work of artists like Wolf Vostell and Nam June Paik Finally Horrocks laments the death of the cathode ray tube and the emergence of the flat screen which has reduced the presence of the television as a significant material object Altogether The Joy of Sets brings this most elusive object into crystal clear critical and historical focus

The Monster in the Machine Zakiya Hanafi, 2000-10-25 A study of monstrosity and baroque poetics in the cultural context of 17 century Italy Technology and the Contested Meanings of Sustainability Aidan Davison, 2001-04-19 This transdisciplinary inquiry presents a new way of thinking about sustainability and technology that takes us beyond the familiar preoccupation with ecoefficiency and toward the contested moral question of what most nourishes our ability to care for our world In contrast to the technocratic aim of controlling a perilous future the author proposes that we develop the practical

craft of sustenance Beginning with debates in environmental policy he draws upon recent philosophical interest in ecology technology and moral experience to argue that the challenge of sustainability is that of undermining those traditions that present technology as somehow external to our inherent moral ambiguity This discussion responds to the work of Langdon Winner Albert Borgmann Charles Taylor Martin Heidegger David Abram and others      **From Artifact to Habitat** Gayle L. Ormiston, 1990 Bringing together philosophy literary criticism and textual theory social and political theory and the philosophy of language and cognitive science this collection intends to establish an interpretive framework for exploring the ubiquity and mediacy of technology      **Literature and Technology** Mark L. Greenberg, Lance Schachterle, 1992 Major authors investigated include Chaucer Blake Romaine Pynchon and Prigogine      *Controlling Technology* ,      *Lifeworld and Technology* Timothy Casey, Lester Embree, 1990-01-30 Technology does not belong to the province of just one philosophical school or even to philosophy itself It is complex and deep enough to transcend the bounds of any one method of research and of any particular set of philosophical presuppositions So conclude the editors of *Lifeworld and Technology* which grew out of a conference held at Duquesne University In this volume of essays written by philosophers of a variety of backgrounds pragmatist phenomenological existentialist deconstructionist analytic hermeneutic technology its place in modern life and its ramifications are discussed in detail The essays touch on such varied topics as turbojets biomedical technology architecture reading and politics Contents Technology and Liberation by Algis Mickunas Nazi Biomedical Technologies by Robert N Proctor On Going to Church and Technology by Carl Mitcham and more Index Co published with Center for Advanced Research in Phenomenology
