Phoenix In The Twentieth Century:

Phoenix in the Twentieth Century G. Wesley Johnson, 1993 Phoenix Arizona if it is to live up to its name has four hundred years before it burns and then rises from its own ashes In the meantime visitors and residents exposed to the city's summer temperatures have cause to think that the legend is fulfilled In fact the city did spring from the ashes of an earlier civilization The Hohokam who vanished mysteriously left a brilliantly engineered system of canals and irrigation ditches and when westward moving Anglo Americans found these cleaned them out and began farming and ranching the future of Phoenix was secured The twelve contributors to this volume have told the story of the city Each writes about a facet of Phoenix its economy its elites its women its ethnic groups its water and labor management problems its development and transportation growing pains its politics and its never ending drive to become as important as Los Angeles and Dallas Today Phoenix suffers the same growing pains it had in its youth Industrial agricultural and business enterprises drawn to the city during the two world wars but particularly during World War II have grown and attracted still more of their kind success begetting success Phoenix in the Twentieth Century portrays the city and its Valley of the Sun in their first one hundred years of glory as a Sunbelt jewel and in their down to earth humanity as a metroplex serving a multitude of needs and desires in a pollution threatened setting With an enthusiastic can do philosophy Phoenicians are not about to consign their beloved home to the flames of legend Phoenix in the Twentieth Century G. Wesley Johnson, Jr., 1993-06-01 The 12 contributors to this volume have told the story of Phoenix Arizona Each writes about a face of the city its economy its elites its women its ethnic groups its water and labor management problems its development and transportation growing pains its politics and its never ending drive to become as important as Los Angeles and Dallas Today Phoenix suffers the same growing pains it had in its youth This book portrays the city and its Valley of the Sun in their first 100 years of glory as a Sunbelt jewel and in their down to earth humanity as a metroplex serving a multitude of needs and desires in a pollution threatened setting Photos

Yuan Nancy Shatzman Steinhardt, 2023-12-12 A monumental illustrated survey of the architecture of thirteenth and fourteenth century China The Yuan dynasty endured for a century leaving behind an architectural legacy without equal from palaces temples and pagodas to pavilions tombs and stages With a history enlivened by the likes of Khubilai Khan and Marco Polo this spectacular empire spanned the breadth of China and far far beyond but its rulers were Mongols Yuan presents the

first comprehensive study in English of the architecture of China under Mongol rule In this richly illustrated book Nancy Shatzman Steinhardt looks at cities such as the legendary Shangdu inspiration for Samuel Taylor Coleridge's Xanadu as well as the architecture the Mongols encountered on their routes of conquest She examines the buildings and monuments of diverse faiths in China during the period from Buddhist and Daoist to Confucian Islamic and Christian as well as unusual structures such as observatories archways stone and metal buildings and sarcophaguses Steinhardt dispels long standing views of the Mongols as destroyers of cities and architecture across Asia showing how the khans and their families built more than they tore down She demonstrates that the stipulations of the Chinese building system were powerful and resilient enough to guide the architecture that rose under Mongolian rule Drawing on Steinhardt's groundbreaking textual research in numerous languages as well as her pioneering fieldwork at sites across East Asia Yuan will become the standard reference on this critical period of cultural and artistic exchange

Native Students at Work Kevin Whalen, 2016-06-01 Native Students at Work tells the stories of Native people from around the American Southwest who participated in labor programs at Sherman Institute a federal Indian boarding school in Riverside California The school placed young Native men and women in and around Los Angeles as domestic workers farmhands and factory laborers For the first time historian Kevin Whalen reveals the challenges these students faced as they left their homes for boarding schools and then endured an outing program that aimed to strip them of their identities and cultures by sending them to live and work among non Native people Tracing their journeys Whalen shows how male students faced low pay and grueling conditions on industrial farms near the edge of the city yet still made more money than they could near their reservations Similarly many young women serving as domestic workers in Los Angeles made the best of their situations by tapping into the city's Indigenous social networks and even enrolling in its public schools As Whalen reveals despite cruel working conditions Native people used the outing program to their advantage whenever they could forming urban indigenous communities and sharing money and knowledge gained in the city with those back home A mostly overlooked chapter in Native American and labor histories Native Students at Work deepens our understanding of the boarding school experience and sheds further light on Native American participation in the workforce

Expanding the View of Hohokam Platform Mounds Mark D. Elson, 2016-12-15 For more than a hundred years archaeologists have investigated the function of earthen platform mounds in the American Southwest Built by the Hohokam groups between A D 1150 and 1350 these mounds are among the few monumental structures in the Southwest yet their use and the nature of the groups who built them remain unresolved Mark Elson now takes a fresh look at these monuments and sheds new light on their significance He goes beyond previous studies by examining platform mound function and social group organization through a cross cultural study of historic mound using groups in the Pacific Ocean region South America and the southeastern United States Using this information he develops a number of important new generalizations about how people used mounds Elson then applies these data to the study of a

prehistoric settlement system in the eastern Tonto Basin of Arizona that contained five platform mounds He argues that the mounds were used variously as residences and ceremonial facilities by competing descent groups and were an indication of hereditary leadership They were important in group integration and resource management after abandonment they served as ancestral shrines Elson s study provides a fresh approach to an old puzzle and offers new suggestions regarding variability among Hohokam populations Its innovative use of comparative data and analyses enriches our understanding of both Hohokam culture and other ancient societies

Morning Glories Amy Bridges,1999-08-15 George Washington Plunkitt once dismissed municipal reformers as morning glories who looked good early on but soon faded Political scientist Amy Bridges shows how that description fit the Northeast when Tammany Hall ruled New York City but not the Southwest Here Bridges traces reform politics and government in large Southwestern cities since 1901 *Coast Banker* ,1913 Ways to the West Tim Sullivan,2015-08-09 In Ways to the West Tim Sullivan embarks on a car less road trip through the Intermountain West exploring how the region is taking on what may be its greatest challenge sustainable transportation Combining personal travel narrative historical research and his professional expertise in urban planning Sullivan takes a critical yet optimistic and often humorous look at how contemporary Western cities are making themselves more hospitable to a life less centered on the personal vehicle The modern West was built by the automobile but so much driving has jeopardized the West s mystic hold on the American future At first automobility heightened the things that made the West great but love became dependence and dependence became addiction Via his travels by bicycle bus and train through Las Vegas Phoenix Denver Boise Salt Lake City and Portland Sullivan captures the modern transportation evolution taking place across the region and the resulting ways in which contemporary Western communities are reinterpreting classic American values like mobility opportunity adventure and freedom Finding a West created lost and reclaimed Ways to the West will be of great interest to anyone curious about sustainable transportation and the history geography and culture of the American West

Design with the Desert Richard Malloy,John Brock,Anthony Floyd,Margaret Livingston,Robert H. Studio Ghibli Animation as Adaptations Dominic J. Nardi, Keli Fancher, 2025-05-15 This collection investigates how Hayao Miyazaki Isao Takahata and other Studio Ghibli storytellers have approached the process of reimagining literary sources for animation Studio Ghibli is renowned for its original storytelling in films like *My Neighbor Totoro* but many of its most famous films including *Howl's Moving Castle* and *Ponyo* have their origins in pre-existing novels manga or fairy tales Studio Ghibli's adaptations seldom directly translate source material to animation but instead transform the works to incorporate themes or imagery central to the studio's sensibilities *Studio Ghibli Animation as Adaptations* explores how these adaptations often blur genre boundaries and raise questions about what constitutes fidelity to source material The collection also shows how the studio reinterprets and recontextualizes stories across cultures for Japanese audiences and across mediums like manga

Mexico and the United States Lee Stacy, 2002-10 Examines the history and culture of Mexico and its relations with its neighbors to the north and east from the Spanish Conquest to the current presidency of Vicente Fox

American Oasis Kyle Paoletta, 2025-01-14 An expansive and revelatory historical exploration of the multicultural water seeking land destroying settlers of the most arid corner of North America arguing that in order to know where the United States is going in the era of mass migration and climate crisis we must understand where the Southwest has already been Albuquerque Phoenix Tucson El Paso Las Vegas Iconic American cities surrounded by desert and rust Teeming metropolises that seem to exist independently of the seemingly inhospitable and arid landscape that surrounds them belying the rich insight they offer into American stories of migration industry bloodshed and rebirth Charting a geographic path through America's largest and hottest deserts acclaimed journalist Kyle Paoletta maps the past and future of these cities and the many other settlements from rural town to urban sprawl that make up the region that has come to be called the American Southwest Weaving together the stories of immigrants and indigenous populations *American Oasis* pulls back the layers of settlement sediment habit and effect that successive empires have left on the region from the Athapaskan Din Tewa Apache and Comanche to the Spanish Mexican and finally American As Paoletta's journey into the Southwest's history becomes inextricably linked to an exploration of its dependency on water he begins to ask where ultimately will cities like Las Vegas and Phoenix find themselves once the Colorado River and its branches dry up Richly reported and sweeping in its history *American Oasis* is the story of what one iconic region's past can tell us about our shared environmental and cultural future

Worlds Within Worlds Robert D. Mowry, Claudia Brown, 1997 Revered by Chinese connoisseurs and literati since the Tang dynasty 618-907 or earlier scholars rocks have been little known in the West As refined indoor kin of the more widely recognized Chinese garden stones these rocks intended for studio display combine the charm of microcosm

with sheer abstract beauty whether regarded as fantastical miniature landscapes or as nonrepresentational sculpture they invite and reward contemplation The book accompanies an exhibition organized by Robert D Mowry curator of Chinese art Arthur M Sackler Museum Harvard University Art Museums Essays provide rich insights into the rocks history and social context as well as their web of poetic religious and philosophical associations Along with an abundance of research on Chinese records the book offers ground breaking scientific analyses in an effort to establish materials and provenance of the rocks and of their accompanying stands which are often regarded as minor works of art in their own right Color plates of the eighty rocks in the exhibition are accompanied by full descriptions and extensive background materials Maps tables graphs and comparative figures further enhance this striking foundation study
