*With a Foreword by*

*"Photo Art Therapy: A Jungian Perspective offers an exemplary inquiry into one of the myriad channels through which art therapy can be practiced as a discipline of archetypal knowing . . . Although the book is based on Jungian theory and practice, the authors assiduously explore cooperation with other therapeutic perspectives, all of which are in keeping with Jung's belief in transcendent universals and multifaceted therapeutic practices. A spirit of collaboration permeates every aspect of the coauthored book which not only demonstrates innovative ways of combining artistic media, but allows clients to articulate the inner workings of the therapeutic process through an engaging series of dialogues and narrations. The book establishes a twofold landmark in elucidating art therapy's close and vital connections to both photography and the discipline of Jungian psychotherapy . . . Rather than creating yet another creative arts therapy specialization as an offspring from the union of art therapy and phototherapy, Fryrear and Corbit show how art therapy can expand its scope without threatening the integrity of the discipline."*
