Documenting the World Gregg Mitman, Kelley Wilder, 2016-12-20 Imagine the twentieth century without photography and film Its history would be absent of images that define historical moments and generations the death camps of Auschwitz the assassination of John F Kennedy the Apollo lunar landing It would be a history in other words of just artists renderings and the spoken and written word To inhabitants of the twenty first century deeply immersed in visual culture such a history seems insubstantial imprecise and even perhaps unscientific Documenting the World is about the material and social life of photographs and film made in the scientific quest to document the world Drawing on scholars from the fields of art history visual anthropology and science and technology studies the chapters in this book explore how this documentation from the initial recording of images to their acquisition and storage to their circulation has altered our lives our ways of knowing our social and economic relationships and even our surroundings Far beyond mere illustration photography and film have become an integral transformative part of the world they seek to show us *Suspended Conversations* Martha Langford, 2021-10-13 In *Suspended Conversations* Martha Langford shows how photographic albums tell intimate and revealing stories about individuals and families Rather than isolate the individual photograph treat albums as texts or argue that photography has supplanted memory she demonstrates that the photographic album must be taken as a whole and interpreted as a visual and verbal performance that extends oral consciousness Exhibiting a collection of photographic travelogues memoirs thematic collections and family sagas compiled between 1860 and 1960 and held by the McCord

Museum of Canadian History this second edition includes a revised and expanded preface along with new photographs of the Notman albums Printed in colour throughout the enhanced material draws out the distinct nuances and details of each album giving them new life to tell their stories Albums are treasured by families collected as illustrations of the past by museums of social history and examined by scholars for what they can reveal about attitudes and sensibilities but when no one is left to tell the tale the intrigue of the album becomes a puzzle a suspended conversation Langford argues that oral consciousness provides the missing key Correlating photography and orality she explains how albums were designed to work as performances and how we can unlock their mysteries A fascinating glimpse of the preoccupations of previous centuries *Suspended Conversations* brings photography into the great conversation of how we remember and how we send our stories into the future

Popular Fiction and Brain Science in the Late Nineteenth Century Anne Stiles, 2011-12-22 In the 1860s and 1870s leading neurologists used animal experimentation to establish that discrete sections of the brain regulate specific mental and physical functions These discoveries had immediate medical benefits David Ferrier's detailed cortical maps for example saved lives by helping surgeons locate brain tumors and haemorrhages without first opening up the skull These experiments both incited controversy and stimulated creative thought because they challenged the possibility of an extra corporeal soul This book examines the cultural impact of neurological experiments on late Victorian Gothic romances by Robert Louis Stevenson Bram Stoker H G Wells and others Novels like *Dracula* and *Dr Jekyll and Mr Hyde* expressed the deep seated fears and visionary possibilities suggested by cerebral localization research and offered a corrective to the linearity and objectivity of late Victorian neurology
