Cat Musculature Gordon Greenblatt, 1981-01-15 This series of brilliant photographs shows the dissection of the cat musculature. It is designed for use in conjunction with the third edition of Hyman's *Comparative Vertebrate Anatomy* edited by Marvalee Wake, although it can be used with other textbooks. Every possible step has been taken to make the photographs easy to interpret and to follow. Reference indications to the Wake texts are included and also concise data on the origin, insertion and action of each muscle. The scale is such that in most cases no more than five muscles are shown per photograph, thus simplifying the task of visualizing the individual muscles.
