Photography A Concise History:

PHOTOGRAPHY: A CONCISE HISTORY Donald Kahn, 2014-07-10 A dedicated amateur photographer all my adult life I have often thought of writing a concise history of the subject It isn't that there are no other histories of the subject But most of these are reference works or just specialized studies dedicated to one or a few photographers I know of no work that pretends to cover the entire subject yet could be read over a weekend One might think of including enough references so that a potential reader could track down all the further details There is no longer a need for a Monster Book where every thought is illustrated by a picture

Exposed Jennifer Tucker, 2013-08-15 In *Nature Exposed* Jennifer Tucker studies the intersecting trajectories of photography and modern science in late Victorian Britain. She examines the role of photograph as witness in scientific investigation and explores the interplay between photography and scientific authority. Almost immediately after the invention of photography in 1839, photographs were characterized as offering objective access to reality unmediated by human agency, political ties, or philosophy. This mechanical objectivity supposedly eliminated judgment and interpretation in reporting and picturing scientific results. But photography is a labor-intensive process that allows for and sometimes requires manipulation. In the late nineteenth century, the nature of this new technology sparked a complex debate about scientific practices and the value of the photographic images in the production and dissemination of scientific knowledge. Recovering the controversies and commentary surrounding the early creation of scientific photography and drawing on a wide range of new sources and critical theories, Tucker establishes a greater understanding of the rich visual culture of Victorian science and alternative forms of knowledge, including psychical research.

On Video Roy Armes, 2006-05-23 Though video systems are now growing ever more accessible and practical, video work is undertaken at every level of education. This is the first book-length historical and theoretical study of the medium. *On Video* explores video on two levels: first, it examines the relationship between technology and society; and second, it probes the connection between production methods and the communication of meaning.

The Image of the Popular Front Simon Dell, 2006-11-17 During the 1930s, Europe was convulsed by political violence. The National Socialists rose to power in Germany, and Fascists campaigned in Britain, Spain, and France. Yet Europe was also transformed in this decade through new applications of film, photography, and radio. In fact, these political and technological developments were closely intertwined.

Photography: History and Theory Jae Emerling, 2013-03-01 *Photography: History and Theory* introduces students to both the history of photography and critical theory. From its inception in the nineteenth century, photography has instigated a series of theoretical debates. In this new text, Jae Emerling therefore argues that the most insightful way to approach the histories of photography is to address simultaneously the key events of photographic history alongside the theoretical discourse that accompanied them. While the nineteenth century is discussed, the central focus of the text is on modern and contemporary photographic theory. Particular attention is paid to key thinkers such as Baudelaire, Barthes, and Sontag. In addition, the centrality of photography to contemporary art practice is addressed through the theoretical work of Allan Sekula, John Tagg, Rosalind Krauss, and Vilém Flusser. The text also includes readings of many canonical photographers and exhibitions, including Atget, Brassai, August Sander, Walker Evans, *The Family of Man*, Diane Arbus, Lee Friedlander, Cindy Sherman, Bernd and Hilla Becher, Sebastião Salgado, Jeff Wall, and others. In addition, Emerling provides close readings of key passages from some major theoretical texts. These glosses come between the chapters and serve as a conceptual line that connects them. Glosses include Roland Barthes, *The Rhetoric of the Image* (1964), Susan Sontag, *Regarding the Pain of Others* (2002), Michel Foucault on the archive (1969), Walter Benjamin, *Little History of*

Photography 1931 Vil m Flusser Towards a Philosophy of Photography 1983 A substantial glossary of critical terms and names as well as an extensive bibliography make this the ideal book for courses on the history and theory of photography

The Oxford History of Western Art Martin Kemp, 2000 The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis Another key feature of the narrative is the re definition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major religious and secular functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union India Africa and Afro Caribbean Australia and Canada

Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students

Photography Theory James Elkins, 2013-10-18 Photography Theory presents forty of the world's most active art historians and theorists including Victor Burgin Joel Snyder Rosalind Krauss Alan Trachtenberg Geoffrey Batchen Carol Squiers Margaret Iversen and Abigail Solomon Godeau in animated debate on the nature of photography Photography has been around for nearly two centuries but we are no closer to understanding what it is For some people a photograph is an optically accurate impression of the world for others it is mainly a way of remembering people and places Some view it as a sign of bourgeois life a kind of addiction of the middle class whilst others see it as a troublesome interloper that has confused people's ideas of reality and fine art to the point that they have difficulty even defining what a photograph is For some the whole question of finding photography's nature is itself misguided from the beginning This provocative second volume in the Routledge The Art Seminar series presents not one but many answers to the question what makes a photograph a photograph
