Edition reflects current evidence based knowledge and practice and promotes critical thinking as the foundation for providing quality care. Rapidly assessing a trauma patient to identify life saving care is at the heart of PHTLS for First Responders. Second Edition. It takes 2 minutes or less for a patient to exsanguinate. No other intervention first responders perform is more important than stopping that level of bleeding in trauma patients. To reflect this PHTLS for First Responders Second Edition utilizes the XABCDE patient assessment mnemonic to place exsanguinating hemorrhage at the forefront of every patient encounter. The importance of XABCDE: exsanguinating hemorrhage, airway, breathing, circulation, disability and expose environment is reinforced in every clinical chapter. PHTLS for First Responders Second Edition features a new course manual which reinforces and clarifies key concepts from the course, features an engaging interactive design and is written so you feel like you are participating in a conversation versus listening to a lecture.
