Physical Activity In Modern Living:

Modern Lifestyle and Health: How Changes in the Environment Impacts Immune Function and Physiology

Laurence Macia,Olivier Galy,Ralph Kay Heinrich Nanan,2022-01-24 **The Hidden Risks of Modern Living** Joseph Hurts, Modern life presents itself as the safest most comfortable and most convenient period in human history and by many traditional measures this assessment is accurate We live longer than our ancestors have access to medical treatments that would have seemed miraculous just decades ago and enjoy material comforts that previous generations could never have imagined Yet beneath this veneer of safety and progress lies a complex web of new risks that are largely invisible to the average person living their daily life These hidden dangers emerge not from the obvious threats that our ancestors faced but from the very systems technologies and lifestyle choices that we have embraced as solutions to age old human problems The modern safety paradox reveals itself in how our attempts to eliminate traditional risks have created entirely new categories of danger that we are only beginning to understand Our ancestors worried about immediate threats like predators starvation and exposure to the elements Today we have largely conquered these immediate dangers but in doing so we have created environments and lifestyles that expose us to chronic long term risks that are much more difficult to perceive and understand These new risks operate on timescales that extend far beyond our natural ability to recognize cause and effect relationships making them particularly insidious The speed of technological and social change has outpaced our biological evolution creating fundamental mismatches between the environments we now inhabit and the bodies and minds that evolved over millions of years in very different circumstances Our nervous systems digestive systems sleep cycles and social bonding mechanisms all evolved for life in small groups engaged in physical activity in natural environments The radical departure from these conditions in modern life creates stress on our biological systems that manifests in ways we are only beginning to understand **Physical Education Health and Music Iii (worktext)1st Ed. 1993 , The Conduct of Physical**
