Militarization and Demilitarization in El Salvador's Transition to Democracy Philip J. Williams, Knut Walter, 1997-12-15 With the resignation of General Renee Emilio Ponce in March 1993 the Salvadorian army s sixty year domination of El Salvador came to an end The country s January 1992 peace accords stripped the military of the power it once enjoyed placing many areas under civilian rule Establishing civilian control during the transition to democracy was no easy task especially for a country that had never experienced even a brief period of democracy in its history In *Militarization and Demilitarization in El Salvador s Transition to Democracy* Phillip J Williams and Knut Walter argue that prolonged military rule produced powerful obstacles that limited the possibilities for demilitarization in the wake of the peace accords The failure of the accords to address several key aspects of the military s political power had important implications for the democratic transition and for future civil military relations Drawing on an impressive array of primary source materials and interviews this book will be valuable to students scholars and policy makers concerned with civil military relations democratic transitions and the peace process in Central America

LeoGrande, 2009-11-18 In this remarkable and engaging book William LeoGrande offers the first comprehensive history of U S foreign policy toward Central America in the waning years of the Cold War From the overthrow of the Somoza dynasty in Nicaragua and the outbreak of El Salvador's civil war in the late 1970s to the final regional peace settlements negotiated a decade later he chronicles the dramatic struggles in Washington and Central America that shaped the region's destiny For good or ill LeoGrande argues Central America's fate hinged on decisions that were subject to intense struggles among and within Congress the CIA the Pentagon the State Department and the White House decisions over which Central Americans themselves had little influence Like the domestic turmoil unleashed by Vietnam he says the struggle over Central America was so divisive that it damaged the fabric of democratic politics at home It inflamed the tug of war between Congress and the executive branch over control of foreign policy and ultimately led to the Iran contra affair the nation's most serious political crisis since Watergate

Healing the Body Politic Sandra C. Smith-Nonini, 2010 Healing the Body Politic examines the contested place of health and development in El Salvador over the last two decades It recounts the dramatic story of radical health activism from its origins in liberation theology and guerrilla medicine during the third world country's twelve year civil war through development of a remarkable popular health system administered by lay providers in a former war zone controlled by leftist rebels The ethnography contributes to the integration of medical and political anthropology by bringing the semiotics of health and the body to bear on cultural understandings of warfare the state and globalization

Democratization and Women's Grassroots Movements Jill M. Bystydzienski, Joti Sekhon, 1999 The book illustrates how community based actions programs and organizations that allow women to determine their lives and participate in decision making contribute to the creation of a civil society and thus enhance democracy The case studies show how participation in grassroots movements promotes women's involvement in their organizations communities and in societal institutions as it influences state policy and empowers women in personal relationships

Journeys of Fear Liisa North, Alan Burtham Simmons, 1999 Understanding democracy human rights and development in the conflict ridden societies of the third world is at the heart of Journeys of Fear a stimulating collection of papers prepared by Canadian and Guatemalan scholars Edited and with contributions by Liisa North and Alan Simmons this collection explores the participation of the oppressed and marginalised Guatemalan refugees most of them indigenous Mayas who fled from the army's razed earth campaign of the early 1980s in government negotiations regarding the conditions for return The essays adopt the refugees language concerning return defining it as a

self organized and participatory collective act that is very different from repatriation a passive process often organized by others with the objective of reintegration into the status quo Contributors examine the extent to which the organized returnees and other social organizations with similar objectives have been successful in transforming Guatemalan society creating greater respect for political social and economic rights They also consider the obstacles to democratization in a country just emerging from a history of oppressive dictatorships and a thirty six year long civil war Liisa L North is professor of political science and a fellow of the Centre for Research on Latin America and the Caribbean at York University Alan B Simmons is associate professor of sociology and a fellow of the Centre for Research on Latin America and the Caribbean at York University

The Commander's Dilemma Amelia Hoover Green, 2018-10-15 Why do some military and rebel groups commit many types of violence creating an impression of senseless chaos whereas others carefully control violence against civilians A classic catch 22 faces the leaders of armed groups and provides the title for Amelia Hoover Green's book Leaders need large groups of people willing to kill and maim but to do so only under strict control How can commanders control violence when fighters who are not under direct supervision experience extraordinary stress fear and anger The Commander's Dilemma argues that discipline is not enough in wartime Restraint occurs when fighters know why they are fighting and believe in the cause that is when commanders invest in political education Drawing on extraordinary evidence about state and nonstate groups in El Salvador and extending her argument to the Mano River wars in Liberia and Sierra Leone Amelia Hoover Green shows that investments in political education can improve human rights outcomes even where rational incentives for restraint are weak and that groups whose fighters lack a sense of purpose may engage in massive violence even where incentives for restraint are strong Hoover Green concludes that high levels of violence against civilians should be considered a default setting not an aberration

Peterson, 1997-01-01 Martyrdom and the Politics of Religion explores the ways that Salvadoran Catholics sought to make sense of political violence in their country in the 1970s and 1980s by constructing a theological ethics that could both explain repression in religious terms and propose specific responses to violence Drawing on extensive fieldwork the book highlights the ways that progressive Catholicism offered a justification and tools for political resistance in the face of extraordinary destruction Using the case of Catholicism in El Salvador the book explores the nature of religious responses to social crisis and the ways that ordinary believers construct and strive to live by ethical systems By highlighting the importance of theological belief of narrative and of religious rationality in political mobilization it touches questions of general interest to readers concerned with the social role of religion and ethics **After Insurgency** Ralph Sprenkels, 2018-04-30 El Salvador's 2009 presidential elections marked a historical feat Frente Farabundo Martí para la Liberación Nacional FMLN became the first former Latin American guerrilla movement to win the ballot after failing to take power by means of armed struggle In 2014 former comandante Salvador Sánchez Cerón became the country's second FMLN president After Insurgency focuses on the development of El Salvador's FMLN from armed insurgency to a competitive political party At the end of the war in 1992 the historical ties between insurgent veterans enabled the FMLN to reconvert into a relatively effective electoral machine However these same ties also fueled factional dispute and clientelism Drawing on in depth ethnographic fieldwork Ralph Sprenkels examines El Salvador's revolutionary movement as a social field developing an innovative theoretical and methodological approach to the study of insurgent movements in general and their aftermath in particular while weaving in the personal stories of former revolutionaries with a larger historical study of the civil war and of the transformation process of wartime forces into postwar political contenders This allows Sprenkels to shed new light on insurgency's persistent legacies both for those involved as well as for Salvadoran politics at large In documenting the shift from armed struggle to electoral politics the book adds to ongoing debates about contemporary Latin America politics the pink tide and post neoliberal electoralism It also charts new avenues in the study of insurgency and its aftermath **The**

Image before the Weapon Helen M. Kinsella, 2011-05-02 Since at least the Middle Ages the laws of war have distinguished between combatants and civilians under an injunction now formally known as the principle of distinction. The principle of distinction is invoked in contemporary conflicts as if there were an unmistakable and sure distinction to be made between combatant and civilian. As is so brutally evident in armed conflicts, it is precisely the distinction between civilian and combatant upon which the protection of civilians is founded, cannot be taken as self-evident or stable. Helen M. Kinsella documents that the history of international humanitarian law itself admits the difficulty of such a distinction. In *The Image before the Weapon*, Kinsella explores the evolution of the concept of the civilian and how it has been applied in warfare. A series of discourses including gender, innocence, and civilization have shaped the legal, military, and historical understandings of the civilian, and she documents how these discourses converge at particular junctures to demarcate the difference between civilian and combatant. Engaging with works on the law of war from the earliest thinkers in the Western tradition, including St. Thomas Aquinas and Christine de Pisan, to contemporary figures such as James Turner Johnson and Michael Walzer, Kinsella identifies the foundational ambiguities and inconsistencies in the principle of distinction, as well as the significant role played by Christian concepts of mercy and charity. She then turns to the definition and treatment of civilians in specific armed conflicts: the American Civil War and the U.S. Indian wars of the nineteenth century and the civil wars of Guatemala and El Salvador in the 1980s. Finally, she analyzes the two modern treaties most influential for the principle of distinction: the 1949 IV Geneva Convention Relative to the Protection of Civilian Persons in Times of War and the 1977 Protocols Additional to the 1949 Conventions, which for the first time formally defined the civilian within international law. She shows how the experiences of the two world wars, but particularly World War II and the Algerian war of independence, affected these subsequent codifications of the laws of war. As recognition grows that compliance with the principle of distinction to limit violence against civilians depends on a firmer grasp of its legal, political, and historical evolution, *The Image before the Weapon* is a timely intervention in debates about how best to protect civilian populations.
