Oceans Participant, Jon Bowermaster, 2010-03-23 This unique tie in to the major motion picture *Oceans* coming this April from Disney National Geographic explores the health of our oceans and what we can do to improve it More than 75 percent of the globe is covered by the oceans It is sometimes difficult to understand why it is called Planet Earth rather than Planet Ocean Since half the world's human population lives within a stone's throw of an ocean coastline the oceans health is increasingly important Rich with resources and potential as a source of renewable energy new drugs drinking water for years we have treated them as both infinite and undamageable But they are not Over fishing climate change pollution acidification and more have put the world's oceans and marine life at great risk *Oceans* gathers some of the most insightful visionaries explorers and ocean lovers marine biologists politicians environmentalists fishermen sportsmen deep divers and more in a unique anthology in which each speaks to a unique aspect of our world's most dimly understood dimension Trekking the Shore Nuno F. Bicho, Jonathan A. Haws, Loren G. Davis, 2011-05-19 Human settlement has often centered around coastal areas and waterways Until recently however archaeologists believed that marine economies did not develop until the end of the Pleistocene when the archaeological record begins to have evidence of marine life as part of the human diet This has long been interpreted as a postglacial adaptation due to the rise in sea level and subsequent decrease in terrestrial resources Coastal resources particularly mollusks were viewed as fallback resources which people resorted to only when terrestrial resources were scarce included only as part of a more complex diet Recent research has significantly altered this understanding known as the Broad Spectrum Revolution BSR model The contributions to this volume revise the BSR model with evidence that coastal resources were an important part of human economies and subsistence much earlier than previously thought and even the main focus of diets for some Pleistocene and early Holocene hunter gatherer societies With evidence from North and South America Europe Africa Asia and Australia this volume comprehensively lends a new understanding to coastal settlement from the Middle Paleolithic to the Middle Holocene **Many Wests** David M. Wrobel, Michael C. Steiner, 1997 What does it mean to live in the West today Do people tend to identify with states with regions or with the larger West This book examines the development of regional identity in the American West demonstrating that it is a regionally diverse entity made up of many different wests Great Plains Southwest Rocky Mountains and more in which American regionalism finds its fullest expression These fourteen original essays tell how a sense of place emerged among residents of various regions and how a sense of those places was developed by people outside of them Wrobel and Steiner first offer a compelling overview of the West's regional nature then thirteen other rising or renowned scholars from history American Studies geography and literature tell how regional consciousness formed among inhabitants of particular regions All of the essays address the larger issue of the centrality of place in determining social and cultural forms and individual and collective identities Some focus on race and culture as the primary influences on regional consciousness while

others emphasize environmental and economic factors or the influence of literature Some even examine western regionalism in areas that lie beyond the West as it has traditionally been conceived Each of the contributors believes that where a people live helps determine what they are and they write not only about the many wests within the larger West but also about the constant state of flux in which regionalism exists Many books speak of the West as a place but few others deal with the West s different places Many Wests presents a vision of the West that reflects both the common heritage and unique character of each major subregion building on the revisionist impulse of the last decade to help redirect New Western History toward an appreciation of regional diversity and integrate scholarship in the regional subfields It is a book for everyone who lives in studies or loves the West for it confirms that it is home to very different peoples economies histories and regions

Mountain in the Clouds Bruce Brown,1995 As the struggle to protect Northwest salmon runs and the urgency of the fight against environmental deterioration escalates Mountain in the Clouds remains an important and illuminating story as timely now as when it was first written The 1995 edition includes a selection of historical photographs

Beyond the Moon Crater Myth Katherine Johnson Ringsmuth,2007 **Recovering a Lost River** Steven Hawley,2011-03-15 A powerful argument for why dam removal makes good scientific economic and environmental sense and requires our urgent attention The Snake River flowing through the Northwest was once one of the world s greatest salmon rivers As recently as a hundred years ago it retained some of its historic bounty with seven million fish coming home to spawn there Now due to damming for hydroelectricity over the past fifty years the salmon population has dropped close to extinction Efforts at salmon recovery through fish ladders hatcheries and even trucking them over the dams have failed Hawley argues that the solution for the Snake River lies in dam removal pitting the power authority and Army Corps of Engineers against a collection of conservationists farmers commercial and recreational fishermen and the Nez Perce tribe He also demonstrates the interconnectedness of the river s health to Orca whales in Puget Sound local economies fresh water rights and energy independence This regional battle has garnered national interest and is part of a widespread river restoration movement that stretches from Maine s Kennebec to California s Klamath In one instance Butte Creek salmon rebounded from a paltry fourteen fish to twenty thousand within just a few years of rewilding their river showing the incredible resiliency of nature when given the slightest chance In this timely book Hawley shows how river restoration with dam removal as its centerpiece is not only virtuous ecological practice but a growing social and economic enterprise

Marine Conservation News ,1994 **Tales from the Edge** Larry Kaniut,2013-08-06 From the Klondike to the Bering Sea from Alaska s bounty that brought fortunes to some to its wilderness that claimed the lives of others Tales from the Edge explores the myth beauty and peril of the arctic landscape Editor Larry Kaniut brings together some of the world s best outdoor adventure writers to celebrate the land and the people who have measured themselves against it Tales from the Edge is a celebration of Alaska featuring such notable contributors as Peter Jenkins Spike Walker Jay Hammond Nick Jans Dana Stabenow Larry Kaniut and more Tales

from the Edge will stir the soul and imagination of every armchair adventurer 106-2 Hearings: Department Of The Interior And Related Agencies Appropriations For 2001, Part 4, Justification Of The Budget Estimates ,2000 *Rapture of the Deep* Ray Troll,2004 In addition to celebrating the extraordinary fish artist this beautiful book also pays tribute to the world of zoological and anthropological creatures he renders with a blend of biological accuracy and surreal offbeat humor

Making Salmon Joseph E. Taylor,1999 Making Salmon is of critical importance for everyone interested in understanding the origins of and finding a solution for the current environmental crisis in the Pacific Northwest BOOK JACKET

Humanities ,1996 Fresh Susanne Freidberg,2010-10-01 That rosy tomato perched on your plate in December is at the end of a great journey not just over land and sea but across a vast and varied cultural history This is the territory charted in *Fresh* Opening the door of an ordinary refrigerator it tells the curious story of the quality stored inside freshness We want fresh foods to keep us healthy and to connect us to nature and community We also want them convenient pretty and cheap *Fresh* traces our paradoxical hunger to its roots in the rise of mass consumption when freshness seemed both proof of and an antidote to progress Susanne Freidberg begins with refrigeration a trend as controversial at the turn of the twentieth century as genetically modified crops are today Consumers blamed cold storage for high prices and rotten eggs but ultimately aggressive marketing advances in technology and new ideas about health and hygiene overcame this distrust Freidberg then takes six common foods from the refrigerator to discover what each has to say about our notions of freshness Fruit for instance shows why beauty trumped taste at a surprisingly early date In the case of fish we see how the value of a living quivering catch has ironically hastened the death of species And of all supermarket staples why has milk remained the most stubbornly local Local livelihoods global trade the politics of taste community and environmental change all enter into this lively surprising yet sobering tale about the nature and cost of our hunger for freshness **Upstream** National Research Council,Division on Earth and Life Studies,Commission on Life Sciences,Committee on Protection and Management of Pacific Northwest Anadromous Salmonids,1996-08-17 The importance of salmon to the Pacific Northwest economic recreational symbolic is enormous Generations ago salmon were abundant from central California through Idaho Oregon and Washington to British Columbia and Alaska Now they have disappeared from about 40 percent of their historical range The decline in salmon numbers has been lamented for at least 100 years but the issue has become more widespread and acute recently The Endangered Species Act has been invoked federal laws have been passed and lawsuits have been filed More than 1 billion has been spent to improve salmon runs and still the populations decline In this new volume a committee with diverse expertise explores the complications and conflicts surrounding the salmon problem starting with available data on the status of salmon populations and an illustrative case study from Washington state s Willapa Bay The book offers specific recommendations for salmon rehabilitation that take into account the key role played by genetic variability in salmon survival and the urgent need for habitat protection and management of fishing The committee presents a comprehensive discussion of

the salmon problem with a wealth of informative graphs and charts and the right amount of historical perspective to clarify today's issues including Salmon biology and geography their life's journey from fresh waters to the sea and back again to spawn and their interaction with ecosystems along the way The impacts of human activities grazing damming timber agriculture and population and economic growth Included is a case study of Washington state's Elwha River dam removal project Values attitudes and the conflicting desires for short term economic gain and long term environmental health The committee traces the roots of the salmon problem to the extractive philosophy characterizing management of land and water in the West The impact of hatcheries which were introduced to build fish stocks but which have actually harmed the genetic variability that wild stocks need to survive This book offers something for everyone with an interest in the salmon issue policymakers and regulators in the United States and Canada environmental scientists environmental advocates natural resource managers commercial tribal and recreational fishers and concerned residents of the Pacific Northwest

Humanities National Endowment for the Humanities,1995 **Fishing Club** Bob Rich,2006-05-01 Bob Rich may very well be the Don Quixote of fishing always on a quest for the most memorable experiences on the water His first book *Fish Fights* followed his attempt to qualify for membership in the Metropolitan South Florida Fishing Hall of Fame In *The Fishing Club* he expands his geography worldwide and the result is a delightful and inspiring chronicle about his search to discover what drives all anglers in their hunt for fish A former president of the United States George Herbert Walker Bush a Hall of Fame slugger Ted Williams the world's most famous bass fisherman Bill Dance and an Olympic skier Andy Mill are just a few of the friends Bob enlists to help in his search Interesting people and passionate anglers all they share with a fishing buddy their first memories of fishing reflections on what impact the sport has had on their lives and why they love to fish Their stories as told to an ardent and articulate brother of the angle make *The Fishing Club* a very special book and an enjoyable read Through it all you'll feel part of the fishing fraternity that includes Bob his friends and the many anglers he meets on his journey around the fresh and salt waters of the world *Why We Fish* Bob Rich,2025-06-10 In *Why We Fish* Bob Rich uncovers the universal bond that connects anglers across the globe revealing how the simple act of casting a line can inspire optimism forge friendships and celebrate our shared humanity Described by friends as the Don Quixote of fishing and an ardent and articulate brother of the angle successful businessman dedicated philanthropist and passionate angler Bob Rich takes readers on an enlightening expedition through the waters of the world both fresh and salt in search of the common thread that bonds all fishermen together From the frosty brilliance of the Bering Sea to the sun soaked splendor of the Florida Keys Rich seeks out the stories of what motivates everyone who is drawn to fish whether it's a search for solitude or a restlessness for adventure I like people who fish explains Rich They are categorically the most positive optimistic people in the world Like sitting around a campfire with your favorite fishing fraternity *Why We Fish* tells the larger than life stories of some of history's most compelling anglers including a former US president an Olympic downhill skier a world renowned

heart surgeon a retired steelworker and a baseball Hall of Famer Always on a quest for the most memorable experiences on the water Rich introduces readers to individuals from all walks of life equipped with different kinds of tackle who are drawn to a variety of waters across the country and around the world As they tell their stories of who first taught them to fish the incredible impact fishing has had on their lives and what keeps them looking ahead to the next adventure their individual stories merge into one collective greater tale of celebrating our differences while cherishing our common humanity

Meditations on Nature, Meditations on Silence Roderick MacIver, 2009-11-18 *Meditations on Nature* *Meditations on Silence* is a collection of hundreds of quotes on the beauty and mystery of the natural world by writers and thinkers including Aldo Leopold Rachel Carson Edward Abbey Rainer Maria Rilke Henry David Thoreau Louise Dickinson Rich and Lewis Thomas Through their inspirational poetry and other writings and Rod MacIver's beautiful watercolors *Meditations on Nature* *Meditations on Silence* offers readers a retreat from our complex fast paced world This book explores the beauty strange cohesion and complexity of the natural world and universe drawing on sources as diverse as ancient Chinese poets contemporary songwriters wilderness adventurers homesteaders and modern scientists *Fish, Markets, and Fishermen* Suzanne Iudicello, Michael L. Weber, Robert Wieland, 2012-06-22 A significant number of the world's ocean fisheries are depleted and some have collapsed from overfishing Although many of the same fishermen who are causing these declines stand to suffer the most from them they continue to overfish Why is this happening What can be done to solve the problem The authors of *Fish Markets and Fishermen* argue that the reasons are primarily economic and that overfishing is an inevitable consequence of the current sets of incentives facing ocean fishermen This volume illuminates these incentives as they operate both in the aggregate and at the level of day to day decision making by vessel skippers The authors provide a primer on fish population biology and the economics of fisheries under various access regimes and use that information in analyzing policies for managing fisheries The book provides a concise statistical overview of the world's fisheries documents the decline of fisheries worldwide gives the reader a clear understanding of the economics and population biology of fish examines the management issues associated with regulating fisheries offers case studies of fisheries under different management regimes examines and compares the consequences of various regimes and considers the implications for policy making The decline of the world's ocean fisheries is of enormous worldwide significance from both economic and environmental perspectives This book clearly explains for the nonspecialist the complicated problem of overfishing It represents a basic resource for fishery managers and others fishers policymakers conservationists the fish consuming public students and researchers concerned with the dynamics of fisheries and their sustenance **Mānoa**, 2013
