Sense And Nonsense In Psychology Pelican S:

Selfless: A Psychologist's Journey through Identity and Social Class Geoffrey Beattie, 2020-12-29 Selfless is a memoir reflecting on identity social class mobility education and on psychology itself how psychology as a discipline is conducted how it prioritises objects of study how it uncovers psychological truths about the world Geoffrey Beattie takes the reader on a journey through his early life in working class Belfast his Ph D at Trinity College Cambridge and subsequent academic and professional career to explore fundamental issues within psychology about social class and social identity Beattie discusses the difficulties inherent in this process of education and change and how social background affects how you view academic work and the subject matter of one's discipline This book movingly details a life and how it is changed by the processes of education the psychological pressures when abandoning those close to you the dissonance within and how it feels and operates The book takes a critical look at psychology from the other side and examines the process of becoming selfless meaning having little sense of self rather than being overly concerned with the wishes and needs of others Showing how our early experiences and their influence continues throughout life Beattie's emotionally engaging entertaining and witty text offers general readers students and academics fresh insights into psychology adaptation and personal change

The Experimental Psychology of Beauty C.W. Valentine, 2015-06-05 Originally published in 1962 the experimental study of aesthetics was a field particularly associated with the name of C W Valentine who in this book provided a critical review of research carried out since the end of the nineteenth century principally by British and American psychologists The investigations described many of them conducted by the author are concerned with individual responses to what is commonly regarded as beautiful in painting music and poetry an important distinction being made between the perception of objects as beautiful as opposed to pleasing The reactions of children and adults and of people having different ethnic and social backgrounds are explored in a variety of experiments dealing with specific elements including colour form and balance in painting musical intervals discord harmony melody and tempo and rhythm metre imagery and associations in classical and romantic poetry Other experiments seek to disclose the temperamental and attitudinal factors underlying individual differences in the judgement and appreciation of specific works of art Of particular interest are the studies of responses to modern paintings poems and musical compositions The findings throw light on the development of discrimination and taste and suggest the possibility of some common factor in the appreciation of these three arts It was felt that critics as well as psychologists and aestheticians would find much to encourage reflection and to stimulate further research **DREAMS**

AND YOU Frank Machovec, 2012-06 Dreams have fascinated people throughout history They connect us to deeper recesses of our minds By interpreting them we can better understand ourselves This handy pocket guide will help you do that

Disciplines of Education Ivor Morrish, 2019-08-13 First published in 1967 this book suggests that educational problems should not and indeed cannot be solved in isolation but that we need to bring all our disciplines and resources to bear upon

them It explores in turn philosophical psychological and sociological approaches to educational theory and examines great thinkers such as Plato R *A Biological and Psychological Background to Education* C. G. Ivan Hussell,Alice F.

Laing,2014-05-09 *A Biological and Psychological Background to Education* focuses on man s physical and psychological characteristics which influence education The publication first underscores the importance of man s biological background the biological nature of man and the nature of the vital processes Discussions focus on respiration nutrition object of vital activities characteristics of man as an animal primate characteristics diversity of man public education and human biology in the schools The book then examines the control of vital processes reproduction and sex education genetic factors in the life of man evolution and man and development and growth The manuscript takes a look at movement posture and exercise health and the teacher s responsibility social heritage of man higher mental processes and structure of personality Topics include social factors in personality remembering and forgetting intelligence perception contemporary pressures in society prevention of disease and the significance of levers in the body The publication is designed for students at colleges of education and colleges of physical education **Putting Psychology in its Place** Graham Richards,Paul

Stenner,2022-07-19 This fourth edition of *Putting Psychology in Its Place* builds on the previous three in introducing the history of Psychology and placing the discipline within its historical and social contexts Written by esteemed Psychologists Graham Richards and Paul Stenner this crucial text aims both to answer and raise questions about the role of Psychology in modern society by critically examining issues such as how Psychology developed and why psychoanalysis had such an impact It discusses enduring underlying conceptual problems and examines how the discipline has changed to deal with contemporary social issues such as religion race and gender The fourth edition features revised and updated chapters though the core structure remains unchanged The final chapter has been restructured and jointly re written This text was written to remain compatible with the British Psychological Society requirements for undergraduate courses and is imaginatively written and accessible to all *Putting Psychology in Its Place* is an invaluable introductory text for undergraduate students of the history of Psychology and will also appeal to postgraduates academics and anyone interested in Psychology or the history of science **Stories of Mental Health, Resilience and Recovery** Amanda Costello,Jerome Carson,2025-10-20 *Stories of*

Mental Health Resilience and Recovery is a compelling exploration of personal strength in the face of adversity This volume brings together seven deeply moving first person accounts highlighting the resilience of individuals who have faced trauma discrimination and profound psychological struggles **The Dynamics of Anxiety and Hysteria** Hans Eysenck,2018-04-27 Here Hans Eysenck applies the principles of modern learning theory to account for the observed phenomena of hysteria and anxiety Such principles were initially developed through the experiments and theories of Pavlov Hull and Tolman When *The Dynamics of Anxiety and Hysteria* initially appeared these were considered the most advanced relevant and applicable to the subject matter They have not been superseded by later work *The Dynamics of Anxiety and Hysteria* has never been published

in the United States It was the fifth book Eysenck authored as part of a series of experimental studies and theoretical work carried out under the auspices of the Institute of Psychiatry at the University of London Two of the first four books Dimensions of Personality and The Psychology of Politics have been reissued with new introductions These focus on dimensional analysis of personality based on experimental and empirical studies The present work on the other hand goes beyond classification to a study of dynamics from nosology to aetiology from description to causation Eysenck scientifically explores such topics as learning theory and human behavior personality and learning theory personality and perceptual processes socialization and personality drugs and personality and psychological theory and psychiatric practice This volume which complements Transaction's other new editions of Eysenck's groundbreaking work will be of lasting significance to psychologists psychiatrists behaviorists and students of personality disorders He provided for modern psychology the empirical foundations of themes that previously were the monopoly of psychoanalysis Hans J Eysenck 1916-1997 a professor of psychology at the University of London and the director of its psychological department at the Institute of Psychiatry was best known for his experimental researches in the field of personality He was a prolific author and wrote among others Rebel with a Cause Dimensions of Personality and Intelligence all available from Transaction

Assessment and Testing Harry Schofield, 2020-03-12 Originally published in 1972 there were many classics dealing with assessment and testing on the market at the time but most of these left the inexperienced reader bewildered in the early stages because of their size and insufficient explanation of the many technical terms used There were a distinct lack of books which gave students in Colleges of Education dealing with psychology for the first time a simple explanation of basic terms in assessment and testing and which introduced them briefly to the different types of tests available *Assessment and Testing* aimed to fill this large gap It looks at such key psychological terms as sample objectivity subjectivity and such basic statistical terms such as mean standard deviation and normal curve of distribution Because it assumes that the reader has no knowledge of such terms it gives careful and simply illustrated explanations of each In the same way in simple language with any technical terms explained and illustrated it explains intelligence and personality tests questionnaires sociometric measures projection techniques and other areas of assessment and testing which every practising teacher will meet The book aims to be essentially practical It is appreciated all the time that the readers are those who will teach children It is designed to provide a solid foundation upon which the reader can build later to augment his own experience of identifying children's particular needs

Culture and Islamic Adaptation Psychology Malik Badri, Humanology, 2018-03-15 The indiscriminate exportation of

Western psychology to Muslim and third world countries can pose serious cultural and ideological dilemmas When the exported commodity from North to South is physical in nature the harm done can easily be identified for example the quick detection of the life threatening birth defects caused by the drug thalidomide when taken during pregnancy or the flaws in the braking system of a Japanese car However when the exported product is ideas and beliefs and ways of life the indirect and sneaky damage is often much more malevolent and long lasting because it attacks the worldview of the recipients and it shakes their cherished beliefs Because of its technological supremacy Islamic and developing countries got used to wholeheartedly accepting any information coming from the West if it is under the tag of science By presenting itself under this prestigious mantra of science students in Muslim countries swallow the kernel of psychology with its nutshell the baby with its filthy water The danger of this approach is greatly augmented by the shortcomings of our educational systems that discourages critical thinking and encourages the submissive acceptance of the words of the teacher and that of printed material

The Journal of the American Society for

Psychical Research ,1958 **Rebel with a Cause** Hans J. Eysenck,2017-07-05 Hans Eysenck is one of the world's leading psychologists and undoubtedly the most controversial. Throughout a long and illustrious career his work on personality and intelligence has aroused impassioned debate and attacks both verbal and physical on Eysenck himself. In his compelling and absorbing autobiography Eysenck recounts in some detail the battles he had to fight in order to establish his major conclusions as well as the reasons why he investigated these subjects. He also discusses his work on such topics as the health hazards of smoking, the prophylactic effects of behavior therapy on cancer and coronary heart disease, parapsychology, astrology and other matters. In a new foreword written for this edition Eysenck expresses his pleasure regarding the fact that his autobiography is now being published in the United States. He discusses how much of his scientific life has been bound up with American psychology. Also new to this American edition is a chapter titled *Genius, Creativity and Vitamins* in which Eysenck talks about the research he has worked on since his retirement in 1983. *Rebel with a Cause* is an intriguing autobiography and will be of paramount interest to psychologists, sociologists and genetic scientists.
